# CAPSTEAD

Capstead Mortgage Corporation  
2012 Annual Report

# How we invest

Capstead invests in a conservatively leveraged portfolio of residential adjustable-rate mortgage ("ARM") securities issued and guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. These agency-guaranteed mortgage securities are considered to have limited, if any, credit risk, particularly in light of federal government support for Fannie Mae and Freddie Mac.

Our investment strategy is designed to produce attractive risk-adjusted returns over the long term, while reducing, but not eliminating, sensitivity to changes in interest rates. This strategy differentiates us from our peers because ARM securities reset to more current interest rates within a relatively short period of time allowing for:

- The recovery of financing spreads diminished during periods of rising interest rates, and
- Smaller fluctuations in portfolio values, and therefore book value, caused by changes in interest rates compared with portfolios that contain a significant amount of fixed-rate mortgage securities.

From a credit risk perspective, the credit quality of agency-guaranteed mortgage securities helps ensure that fluctuations in value due to credit risk should be limited and financing at reasonable rates and terms should remain available under stressed market conditions.

# TO OUR STOCKHOLDERS:

**We are pleased to report that Capstead posted another strong performance in 2012. Combining this year's \$1.49 in common dividends with a \$1.06 increase in book value per common share, we produced a total return on our beginning book value of over 20% in 2012, which compares favorably to most of the market averages for the year and follows a 19% return in 2011.**

That being said, 2012 had its challenges. November's contentious presidential election and a lack of consensus in Washington on how to solve the country's fiscal issues created plenty of uncertainty in the financial markets. The economy showed signs of improvement, particularly in the housing markets; however, employment growth was weak and the unemployment rate remains stubbornly high. Citing these concerns, the Federal Reserve continues to provide economic stimulus in the form of low short-term interest rates and quantitative easing through purchases of agency-guaranteed fixed-rate mortgage securities and U.S. Treasury bonds.

We stayed the course in this environment, maintaining our portfolio leverage near eight times our long-term investment capital while deploying newly raised common equity capital into additional holdings of agency-guaranteed, adjustable-rate ("ARM") securities. This contributed to a \$1.6 billion, or 13%, increase in our portfolio to nearly \$13.9 billion at

December 31, 2012. Our book value benefited from higher portfolio pricing levels as well as accretion resulting from raising \$142 million in new common equity capital through September and repurchasing \$35 million in common equity under our \$100 million share repurchase authorization that was announced late in the year. On a combined basis, these elements contributed to increasing our long-term investment capital by \$204 million, or nearly 15%, to \$1.6 billion at December 31, 2012.

Yields earned on our portfolio softened as the year progressed as a significant number of the underlying mortgages reset to lower rates, reflecting the current low interest rate environment. Also affecting yields were somewhat higher mortgage prepayments spurred by low prevailing mortgage interest rates. Higher prices paid for new investments the last several years were a factor as well. Mortgage prepayment rates and prices paid for acquisitions impact yields because investment premiums are amortized to earnings as

## FINANCIAL HIGHLIGHTS

*(In thousands, except per share data)*

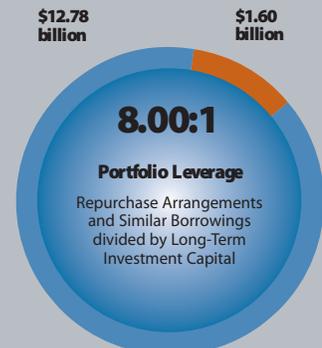

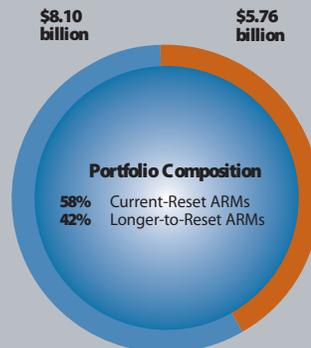

|  | 2012       | 2011       | 2010       |
|--|------------|------------|------------|
| <b>For the year ended December 31:</b>         |            |            |            |
| Net interest margin                            | \$ 178,781 | \$ 177,298 | \$ 143,527 |
| Net income                                     | 163,626    | 160,204    | 126,896    |
| Net income per diluted common share            | 1.50       | 1.75       | 1.52       |
| Cash dividends per common share                | 1.49       | 1.76       | 1.51       |
| <b>As of December 31:</b>                      |            |            |            |
| Residential mortgage investments               | 13,860,158 | 12,264,906 | 8,515,691  |
| Repurchase arrangements and similar borrowings | 12,784,238 | 11,352,444 | 7,792,743  |
| Long-term investment capital:                  |            |            |            |
| Unsecured borrowings, net                      | 99,978     | 99,978     | 99,978     |
| Preferred stockholders' equity                 | 188,992    | 184,514    | 179,323    |
| Common stockholders' equity                    | 1,308,133  | 1,108,193  | 848,102    |

yield adjustments over the life of the portfolio. Meanwhile, our overall borrowing rates were flat year over year, as higher market rates for short-term borrowings offset benefits of lower hedging costs as older, higher-rate interest rate swap agreements were replaced at more favorable rates. We reported net income of \$164 million for 2012, up from \$160 million in 2011, while net income per diluted common share declined 14% year over year to \$1.50. This reflects a 19% increase in average diluted common shares outstanding resulting from raising \$374 million in new common equity capital over the past two years.

Looking forward, we believe many of the factors leading to declining yields and higher short-term borrowing rates during 2012 have largely run their course. Further declines in weighted average coupons should be muted given that an increasing number of mortgage loans underlying our portfolio are at or near fully indexed levels. Prevailing mortgage rates are off the lows seen last fall, contributing to expectations that refinancing activity may decline as 2013 progresses. Furthering our optimism is our exclusive focus on ARM securities, over half of which were originated prior to 2008. Most of the mortgage loans underlying these securities carry coupon interest rates at or below current fixed mortgage rates, diminishing the economic advantage, if any, of refinancing. Additionally, for many of these homeowners, refinancing continues to be hampered by low housing prices and credit problems. As a result, we anticipate that mortgage prepayment rates will remain manageable in 2013. As for our borrowing costs, we are seeing lower market rates for

short-term borrowings than rates that were common late in 2012. Additionally, we will benefit from lower hedging costs as older and higher-rate interest rate swap agreements expiring during 2013 are replaced at significantly lower rates. Considering these positive developments, we are expecting relatively stable quarterly results in 2013.

We believe our focus on investing in a portfolio of agency-guaranteed ARM securities is a prudent investment strategy that can produce attractive risk-adjusted returns over the long term while reducing, but not eliminating, sensitivity to changes in interest rates. By focusing solely on agency-guaranteed ARM securities we have differentiated Capstead from our mortgage REIT peers, many of which invest in fixed-rate and/or private label residential mortgage securities. Coupon interest rates on mortgage loans underlying ARM securities reset to more current interest rates within a relatively short period of time. This allows for a recovery of financing spreads diminished during periods of rising interest rates and better insulates our book value from changes in the interest rate environment because resulting fluctuations in the value of ARM securities are typically smaller compared to fixed-rate mortgage securities. From a credit risk perspective, agency-guaranteed securities are considered to have limited, if any, credit risk, in light of federal government support for Fannie Mae and Freddie Mac. This support has largely alleviated concerns regarding the ability of these government-sponsored enterprises to fulfill their guarantee obligations.

We finance our investment portfolio using leverage provided by a variety of lending counterparties consisting primarily of large commercial banking institutions based all over the world. These borrowings typically mature within 30 to 90 days.

A woman with blonde hair, wearing a brown long-sleeved shirt and blue jeans, is lying on a light-colored, tufted sofa. She is laughing and looking towards a young child who is running away from her in the foreground. The child is wearing a white t-shirt and dark pants. The room has a light-colored wall and a large window in the background. The floor is covered with some dry leaves or petals.

We believe our focus on investing in a portfolio of agency-guaranteed ARM securities is a prudent investment strategy that can produce attractive risk-adjusted returns over the long term while reducing, but not eliminating, sensitivity to changes in interest rates.

## KEY OPERATING DATA

| Total average financing spreads   | 1.26        | 1.56        | 1.74        | 2.23        | 1.59        |
| Average mortgage prepayment rate (expressed as a constant prepayment rate or CPR) | 17.18       | 16.10       | 29.11       | 16.56       | 16.00       |
| Return on average long-term investment capital                                    | 10.98       | 13.14       | 12.08       | 13.34       | 16.52       |
| Return on average common equity capital   | 11.15       | 13.94       | 12.68       | 14.90       | 21.03       |
| Return on beginning book value (change in book value plus dividends)              | 20.37       | 18.80       | 12.84       | 55.69       | 20.65       |

Another differentiating factor between us and most other mortgage REITs is that we are internally managed, meaning all of our investing activities are performed by Capstead employees, not by an external advisor. Additionally, approximately two-thirds of our employee compensation expense for 2012 was performance-based, with a significant amount of this compensation awarded in shares of Capstead stock. We believe this internally managed structure not only avoids concerns regarding conflicts of interest unique to externally managed companies, it also provides a higher level of transparency regarding how we have aligned the financial interests of our employees with those of our stockholders through our compensation practices. This strong alignment of interests through the use of performance-based compensation practices is reflected in an 11% year over year decrease in our employee compensation costs for 2012.

Our future returns are predicated on our ability to continue to produce attractive dividends while preserving book value, both of which can fluctuate with changes in market conditions. These returns may be augmented by accretive capital raises when we can invest new capital at attractive prices, as well as opportunistic share repurchases should our shares trade at a significant discount to book value and attractively-priced investments are not available. We believe that by staying focused on our investment strategy of

managing a conservatively levered portfolio of agency-guaranteed ARM securities, we are providing our stockholders the opportunity to continue to prosper over time.

On behalf of our board of directors and all of our employees, thank you for your continued support and investment.

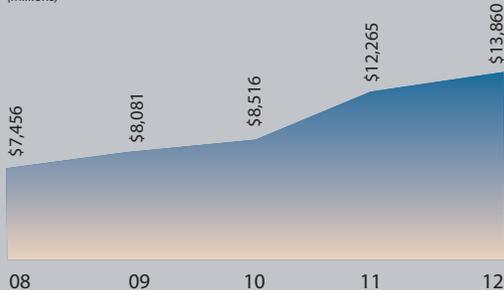

Sincerely,

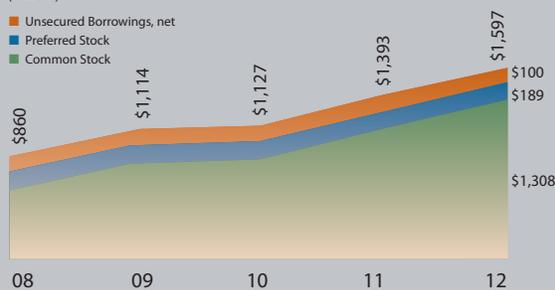

Andrew F. Jacobs  
President and CEO

## Corporate Shareholder Information

### Transfer Agent and Registrar

Inquiries concerning dividend payments, lost certificates, change of address and account information should be directed to:

Wells Fargo Shareowner Services  
 Post Office Box 64854  
 St. Paul, Minnesota 55164-0854  
 (800) 468-9716  
[www.wellsfargo.com/shareownerservices](http://www.wellsfargo.com/shareownerservices)

### Preferred Share Conversions

Holders of the Series A and Series B preferred shares may convert into common shares at any time.

Holders of the Series A and Series B preferred shares are advised to carefully consider whether or not it is economically advantageous to convert into common shares, considering the conversion ratio as well as the prevailing market prices and dividends of both the common and preferred shares.

If conversion is requested after one or more preferred record dates and on or before the record date for payment of quarterly dividends on the common shares, the preferred holder requesting conversion must return to us all preferred share dividends declared and paid for the corresponding quarter.

### Available Information

We make available on our website at [www.capstead.com](http://www.capstead.com), free of charge, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, investor presentations, quarterly fact sheets, press releases, charters for the committees of the board of directors, our Board of Director's Guidelines, Code of Business Conduct and Ethics, Financial Code of Professional Conduct and other company information, including amendments to such documents and waivers, if any, to the codes. Such information is also furnished upon written request to:

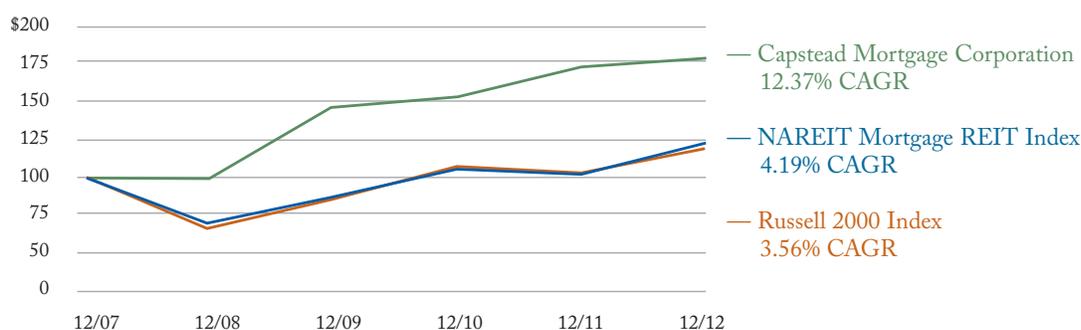

Capstead Mortgage Corporation  
 Attention: Stockholder Relations  
 8401 North Central Expressway  
 Suite 800  
 Dallas, Texas 75225-4404

### Annual Meeting

Our annual meeting of stockholders will be held at 9:00 a.m. Central Time on Wednesday, April 24, 2013 at:

8401 North Central Expressway  
 Suite 220  
 Dallas, Texas 75225-4404

## Total Return Performance\*

\* Total Returns and compound annual growth rates ("CAGR") are based on the following cumulative total returns assuming the investment of \$100 on December 31, 2007 and the reinvestment of dividends. The performance shown is not necessarily indicative of future results.

|                               | Cumulative Periods Ended December 31, |         |          |          |          |          |
|-------------------------------|---------------------------------------|---------|----------|----------|----------|----------|
|                               | 2007                                  | 2008    | 2009     | 2010     | 2011     | 2012     |
| Capstead Mortgage Corporation | \$100.00                              | \$97.32 | \$146.21 | \$152.96 | \$173.47 | \$179.13 |
| Russell 2000                  | 100.00                                | 66.21   | 84.20    | 106.82   | 102.36   | 119.09   |
| NAREIT Mortgage               | 100.00                                | 68.69   | 85.61    | 104.95   | 102.42   | 122.79   |

## FORWARD-LOOKING STATEMENTS

This document contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain the words “believe,” “anticipate,” “expect,” “estimate,” “intend,” “will be,” “will likely continue,” “will likely result,” or words or phrases of similar meaning. Forward-looking statements are based largely on the expectations of our management and are subject to a number of risks and uncertainties including, but not limited to, the following:

- changes in general economic conditions;
- fluctuations in interest rates and levels of mortgage prepayments;
- the effectiveness of risk management strategies;
- the impact of differing levels of leverage employed;
- liquidity of secondary markets and credit markets;
- the availability of financing at reasonable levels and terms to support investing on a leveraged basis;
- the availability of new investment capital;
- the availability of suitable qualifying investments from both an investment return and regulatory perspective;
- changes in legislation or regulation affecting exemptions for mortgage REITs from regulation under the Investment Company Act of 1940;
- changes in legislation or regulation affecting Fannie Mae, Freddie Mac, Ginnie Mae and similar federal government agencies and related guarantees;
- deterioration in credit quality and ratings of existing or future issuances of agency-guaranteed mortgage securities; and
- increases in costs and other general competitive factors.

In addition to the above considerations, our actual results and liquidity are affected by other risks and uncertainties which could cause actual results to be significantly different from those expressed or implied by any forward-looking statements included herein. It is not possible to identify all of the risks, uncertainties and other factors that may affect future results. In light of these risks and uncertainties, the forward-looking events and circumstances discussed herein may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. Forward-looking statements speak only as of the date the statement is made and we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Accordingly, readers of this document are cautioned not to place undue reliance on any forward-looking statements included herein.
