TO OUR SHAREHOLDERS:

Fiscal 2004 was another remarkable year for our company, as we generated outstanding financial results in all dimensions of our business. Our performance reflected the growing strength of the Coach brand, and consumers’ continued enthusiasm for our fresh and relevant product offering. Our results also speak to our philosophy of operating Coach as a small business with large sales, which we manage very actively. We understand that we are not simply selling product, but building lasting relationships with our consumers, one at a time.

Sales for fiscal 2004 rose 39% to $1.3 billion, with all channels of distribution posting increases from prior year levels. We were particularly pleased with the performance of our full-priced businesses in the U.S. – where we saw strong growth in our accessory category – and the rapid market share growth we achieved in Japan, where we attained the number two market share position. Both new and existing stores generated excellent results driven by distinctive newness in our product offering, which addresses the active lifestyles of our broad and loyal consumer base. In addition, we saw ongoing momentum in collections such as Soho and Signature, which were updated and enhanced during the fiscal year.

Gross margin for the year climbed to nearly 75%, driven by channel mix, product mix, and sourcing cost initiatives. At the same time, selling, general, and administrative expenses as a percentage of net sales declined to about 41%, due to operating leverage achieved in the U.S. and other non-Japan businesses. For the full year, the company’s operating margin rose to 33.6%, a remarkable 800 basis point expansion from fiscal 2003 levels.

• Direct to consumer sales, which consist primarily of sales at Coach stores, rose 30% to $726 million in fiscal 2004. These results were generated by higher comparable store sales as well as new and expanded stores.

• Indirect sales increased 51% to $595 million, driven by strong gains in all channels including Coach Japan, U.S. department stores international wholesale, and business-to-business. In fiscal 2004, sales at Coach Japan accounted for nearly 21% of total revenues.

Fiscal 2004 was another year of continued distribution and market share growth for Coach. In the U.S., we added 19 new full price stores and expanded nine others. Through Coach Japan we continued to develop our opportunity in Japan, adding eight new locations and expanding 15 highly productive shop-in-shops as well as one retail store. We also opened our third Japanese flagship store, located in the Marunouchi section of Tokyo, with great success.

While our accomplishments this year have been significant, based on the increasing vibrancy and strength of the Coach brand, we have never felt more positive than we do today about our prospects for future organic growth. We have built a diversified business model, which yields highly predictable results. We have a well articulated vision, which rests on our distinctive proposition, strong brand equities, and expanding market share. At the same time, our diversified distribution model, multiple product platforms, monthly product flow, and market research activities help us mitigate risk. Finally, we have the systems in place, along with a flexible, nimble and highly responsive supply chain, to support our growth in the years ahead. In summary, we have clarity to our growth, and we are confident in our ability to continue to generate superior financial results.

Lew Frankfort,
Chairman and CEO
our brand

The Coach proposition is unique. We are America’s number one accessible luxury accessories brand, and the fastest growing imported handbag and accessory brand in Japan. In fact, we recently captured the number two position in Japan and each year as our market share increases, our leadership position strengthens.

The touchstone of the Coach brand is our products. They are made one at a time by skilled craftspeople from natural materials, proprietary hardware and exceptional leathers. From the beginning, Coach’s classic American design combined with an identifiably New York spirit immediately gave the product a unique and desirable look.

Today, Coach products, which originally came to stand for durability, function and exceptional value, also stand for fashion, femininity and fun. The Council of Fashion Designers of America (CFDA) agree, recognizing Coach’s President and Executive Creative Director, Reed Krakoff, with the coveted Accessories Designer of the Year Award for the second time in 2004.
Coach has an extremely broad and loyal consumer base, who form an emotional bond with the brand. Part of our everyday mission is to cultivate our consumer relationships by reinforcing this personal connection. In fact, nine out of ten consumers express a positive intent to re-purchase.

We understand that our business is about building relationships with our customers, not just selling product. We do this by enhancing the shopping experience in the stores and offering specialized marketing programs, designed to elevate the level of service at all times. Whether a consumer is shopping in our retail stores, visiting Coach.com, or speaking with our customer service department, we treat them as if they are guests in our home.
We recognize that all brands need to evolve and change. Continuous improvement is built into our culture. From the transformation of our supply chain, and the modernization of our product, to the rejuvenation of our retail environments, we embrace change.

We also embrace trends. To this end, we conduct extensive consumer research, interviewing over 10,000 consumers individually a year, and we work hard to anticipate their changing needs.

Key to Coach’s success is keeping our product offering fresh and relevant to our consumer’s lifestyle. We introduce new product monthly, supported by dynamic integrated marketing communications – from store windows to the website – matching the shopping cadence of our best consumers.
Coach’s business is based on a multi-channel international distribution model, which allows us to maintain a critical balance. Our success does not depend solely on the performance of a single channel.

This year about 55% of our revenues were derived from direct to consumer channels. These channels comprise our Coach full price and factory stores, our catalog and internet businesses. The remaining 45% of our business comes from indirect channels – international, U.S. department stores and business-to-business.

Similarly, Coach’s product offering is also well balanced with multiple product platforms. Again, our success does not depend solely on the performance of one collection. From Soho leather and suede to Hamptons Weekend and seasonal offerings, each collection has proprietary and distinctive elements, appealing to a broad and diversified customer base.
Coach is a small business with large sales, managed very actively. Over the past several years, we have created a business model that yields superior growth and predictable returns—and we are not even at the halfway point.

To drive this growth we have a strong management team who are knowledge-driven and focused on the details, and we move seamlessly between strategy and tactics. We have a performance based corporate culture, who share our vision. And lastly, we have systems to yield timely information and a supply chain that is both nimble and flexible, allowing us to react rapidly to changes in requirements.
Our strategy

Our growth strategy is twofold. First, focusing on the U.S. and Japan, we will grow our distribution through store openings, expansions and relocations. We will enter new markets as well as strengthen our presence in existing ones. In Japan, we are accelerating our flagship store openings allowing us to leverage Coach’s heightened brand awareness. Osaka, Sapporo and Sendai, three key cities where Coach is targeting to expand, were selected as flagship locations to broaden Coach’s appeal with Japanese consumers. We remain underdeveloped in these major markets, and we believe our growth potential is significant.

Second, we will improve the productivity of our store locations by gaining a greater share of our consumers accessories wardrobe. We are intensifying awareness as an everyday lifestyle accessory resource by offering aspirational, stylish, well-made product at a great price. We’re also emphasizing new usage occasions, and offering items at a broader range of prices. We’ve evolved our marketing programs to create a more satisfying shopping experience. Finally, we introduced a tiered merchandising strategy enabling us to tailor our product assortment to different consumer segments, capitalizing on the opportunity within our total retail sales base.

(1) Coach’s fiscal year ends on the Saturday closest to June 30. Fiscal year 2004 was a 53-week year, while fiscal years 2003, 2002, 2001 and 2000 were 52-week years.

(2) During fiscal 2001, Coach committed to and completed a reorganization plan involving the complete closure of its Medley, Florida, manufacturing operation. These actions, intended to reduce costs, resulted in the transfer of production to lower cost third-party manufacturers and the consolidation of all of its distribution functions at the Jacksonville, Florida, distribution center. During fiscal 2002, Coach committed to and completed a reorganization plan involving the complete closure of its Lares, Puerto Rico, manufacturing operation. These actions, also intended to reduce costs, resulted in the transfer of production to lower cost third-party manufacturers.

(3) The two-for-one stock splits in August 2003 and July 2002 have been retroactively applied to all prior periods.
The following discussion of Coach's financial condition and results of operations should be read together with Coach's financial statements and notes to those statements included elsewhere in this document.

EXECUTIVE OVERVIEW

Founded in 1941, Coach is a designer and marketer of high-quality, modern American classic accessories. Coach's primary product offerings include handbags, women's and men's accessories, business cases, weekend and travel accessories, outerwear and related accessories.

Coach generates revenue by selling its products directly to consumers, indirectly through wholesale customers and Coach Japan, and by licensing its brand name to select manufacturers. Direct-to-consumer sales consist of sales of Coach products through its 174 Company-operated North American retail stores, 76 Company-operated North American factory stores, its on-line store and its catalogs. Indirect sales consist of sales of Coach products to nearly 1,100 department store locations in the United States, 115 international department store, retail store, factory store and duty-free shop locations in 17 countries and 100 department store shop-in-shops, and retail and factory store locations managed by its joint venture, Coach Japan, Inc. Coach generates additional wholesale sales through business-to-business programs, in which companies purchase Coach products to use as gifts or incentive rewards. Licensing revenues consist of royalties paid to Coach under licensing arrangements with select partners for the sale of Coach branded watches, footwear, eyewear and office furniture. Net sales were $1,321.1 million, $953.2 million and $719.4 million, in fiscal 2004, 2003 and 2002, respectively, representing a 38.6% increase in fiscal 2004 as compared to fiscal 2003 and a 32.5% increase in fiscal 2003 as compared to fiscal 2002. These net sales increases were driven by growth across all distribution channels.

Coach's cost of sales consists of the costs associated with the sourcing of its products. Coach's gross profit is dependent upon a variety of factors, including changes in the relative sales mix among distribution channels, changes in the mix of products sold, and fluctuations in material costs. These factors, among others, may cause gross profit to fluctuate from quarter to quarter. Gross profit increased to $990.1 million in fiscal 2004, from $677.4 million in fiscal 2003 and $483.4 million in fiscal 2002. Gross margin increased to 74.9% in fiscal 2004, as compared to 71.1% in fiscal 2003 and 67.2% in fiscal 2002, representing an increase of 380 basis points in fiscal 2004 as compared to fiscal 2003 and 390 basis points in fiscal 2003 as compared to fiscal 2002. These increases were primarily driven by the factors discussed above.

Selling, general and administrative expenses comprise four categories: selling; advertising, marketing and design; distribution and customer service; and administration and information services. Selling expenses include store employee compensation, store occupancy costs, store supply costs, wholesale account administration compensation and all Coach Japan operating expenses. These expenses are affected by the number of Coach and Coach Japan operated stores open during any fiscal period and the related proportion of retail and wholesale sales. Advertising, marketing and design expenses include employee compensation, media space and production, advertising agency fees, new product design costs, public relations, market research expenses and mail order costs. Distribution and customer services expenses include warehousing, order fulfillment, shipping and handling, customer service and bag repair costs. Administration and information services expenses include compensation costs for the executive, finance, human resources, legal and information systems departments, as well as consulting and software expenses. Selling, general and administrative expenses increase as Coach and Coach Japan operate more stores, although an increase in the number of stores generally results in the fixed portion of selling, general and administrative expenses being spread over a larger sales base.

As part of Coach's transformation from a manufacturer to a marketer, in April 2002, Coach ceased production at its Lares, Puerto Rico, manufacturing facility. This reorganization, intended to reduce costs by transferring production to lower cost third-party manufacturers, involved the termination of 394 manufacturing, warehousing and management employees at the Lares facility.
Operating income was $444.5 million, $243.8 million and $133.6 million in fiscal 2004, 2003, and 2002, respectively. The 82.3% increase in fiscal 2004 from fiscal 2003 and 82.4% increase in fiscal 2003 from fiscal 2002 were both driven by the increases in net sales and gross profit discussed previously, partially offset by increases in selling, general and administrative expenses.

Net income was $261.7 million, $146.6 million and $85.8 million in fiscal 2004, 2003 and 2002, respectively. In all fiscal years, the increases in net income were primarily attributable to the increases in operating income, discussed above, partially offset by higher provisions for income taxes and higher minority interest charges.

Coach’s fiscal year ends on the Saturday closest to June 30. Fiscal 2004 was 53-weeks, whereas fiscal 2003 and 2002 were each 52-week periods. The 53rd week in fiscal 2004 contributed approximately $19.5 million of additional net sales.

The following is a discussion of the results of operations for fiscal 2004 compared to fiscal 2003 and fiscal 2002 as well as a discussion of the changes in financial condition during fiscal 2004.

(1) 53-week fiscal year

**FISCAL 2004 COMPARED TO FISCAL 2003**

**NET SALES**

Coach excludes new locations from the comparable store base for the first year of operation. Similarly, stores that are expanded by more than 15% are also excluded from the comparable store base until the first anniversary of their reopening. Stores that are closed for renovations are removed from the comparable store base. In fiscal 2004, 53 weeks of sales were reported and compared to the equivalent 53-week period.

**DIRECT** Net sales increased 29.8% to $726.5 million during fiscal 2004 from $559.5 million in fiscal 2003, driven by increased comparable store sales, new store sales and expanded store sales in our North American retail and factory stores divisions. This net sales increase was also driven by an additional week of sales, which represented approximately $11.6 million of the total. Sales growth in comparable stores was 21.9% for retail stores and 10.3% for factory stores. Comparable store sales growth for the entire North American store chain was 16.9%, which accounted for $95.7 million of the net sales increase. Since the end of fiscal 2003, Coach has opened 19 retail stores and two factory stores. Sales from these new stores, as well as the noncomparable portion of sales from stores opened during fiscal 2003, accounted for $53.0 million of the net sales increase. Since the end of fiscal 2003, Coach also expanded nine retail stores. Sales from these expanded stores, as well as the noncomparable portion of sales from stores expanded during fiscal 2003, accounted for $15.3 million of the net sales increase. Sales growth in the Internet business accounted for the remaining sales increase. These increases were slightly offset by a decline in the direct marketing channel and store closures. Since the end of fiscal 2003, Coach has closed one retail store and two factory stores.

**INDIRECT** Net sales increased 51.0% to $594.6 million in fiscal 2004 from $393.7 million during fiscal 2003. The increase was primarily driven by growth at our Japanese joint venture, Coach Japan, Inc. in which net sales increased $100.4 million over the comparable period of the prior year, including $4.1 million of sales during the additional week of the fiscal year. Since the end of fiscal 2003, we have opened eight locations in Japan. Sales from these new stores, as well as the noncomparable portion of sales from stores opened during fiscal 2003, accounted for $44.0 million of the net sales increase. Our Japan locations experienced double-digit comparable net sales gains from the prior year, which represented $33.3 million of the net sales increase. Since the end of fiscal 2003, we have also expanded 16 locations in Japan, which accounted for $7.3 million of the net sales increase. Finally, the impact of foreign currency exchange rates resulted in an increase in reported net sales of $21.7 million. These net sales increases were slightly offset by store closures. Since the end of fiscal 2003, Coach Japan has closed one location. The increase in indirect net sales was also driven by growth in the U.S. wholesale, international wholesale and business-to-business divisions, which contributed increased sales of $37.5 million, $33.5 million and $22.0 million, respectively, as compared to the same period in the prior year. The remaining net sales increase is attributable to increases in other indirect channels.
GROSS PROFIT
Gross profit increased 46.2% to $990.1 million in fiscal 2004 from $677.4 million in fiscal 2003. Gross margin increased 380 basis points to 74.9% in fiscal 2004 from 71.1% in fiscal 2003. This improvement was driven by: a shift in channel mix, as our higher gross margin channels grew faster than the business as a whole, which contributed approximately 140 additional basis points; a shift in product mix, reflecting increased penetration of higher margin mixed material product and accessories, which contributed approximately 120 additional basis points; and the continuing impact of sourcing cost initiatives, which contributed approximately 120 additional basis points.

The following chart illustrates the gross margin performance we have experienced over the last 12 quarters:

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES
Selling, general and administrative expenses increased 25.8% to $545.6 million in fiscal 2004 from $433.7 million in fiscal 2003. The dollar increase was caused primarily by increased variable expenses related to Coach Japan, increased variable expenses to support increased net sales, and increased store operating expenses attributable to new stores opened both domestically and in Japan, as compared to the prior year. As a percentage of net sales, selling, general and administrative expenses during fiscal 2004 were 41.3% compared to 45.5% during fiscal 2003. This improvement was due to leveraging our expense base on higher sales.

Selling expenses increased 31.0% to $386.2 million, or 29.2% of net sales, in fiscal 2004 from $294.9 million, or 30.9% of net sales, in fiscal 2003. The dollar increase in these expenses was primarily due to an increase in operating expenses associated with Coach Japan and operating expenses associated with North American stores that were opened during and after the end of fiscal 2003. The increase in Coach Japan expenses was $42.8 million, driven by new stores operating expenses, increased variable expenses related to higher sales, and the nonrecurrence of a $3.4 million favorable fair value adjustment for open foreign currency forward contracts. In addition, the impact of foreign currency exchange rates increased reported expenses by $10.0 million. Domestically, Coach has opened 19 new retail stores and two new factory stores since the end of fiscal 2003. Expenses from these new stores, as well as the noncomparable portion of expenses from stores opened in fiscal 2003, increased total expenses by $16.2 million. The remaining increase in selling expenses was due to increased variable expenses to support sales growth.

Advertising, marketing, and design costs increased by 10.8% to $63.5 million, or 4.8% of net sales, in fiscal 2004, from $57.3 million, or 6.0% of net sales, in fiscal 2003. This dollar increase was primarily due to increased staffing costs and increased design expenditures.

Distribution and customer service expenses increased to $32.4 million in fiscal 2004 from $29.7 million in fiscal 2003. The dollar increase in these expenses was primarily due to higher sales volumes. However, efficiency gains at the distribution and customer service facility resulted in an improvement in the ratio of these expenses to net sales from 3.1% in fiscal 2003 to 2.5% in fiscal 2004.

Administrative expenses increased 22.6% to $63.5 million, or 4.8% of net sales, in fiscal 2004 from $51.8 million, or 5.5% of net sales, in fiscal 2003. The dollar increase in these expenses was primarily due to increased compensation costs as well as increased professional and consulting fees. These increases were offset by an increase in business interruption proceeds of $1.2 million, related to our World Trade Center location.
INTEREST INCOME, NET

Net interest income was $3.2 million in fiscal 2004, as compared to $1.1 million in fiscal 2003. This dollar change was due to increased positive cash balances during fiscal 2004 as well as higher returns on investments. During fiscal 2004, Coach began investing in marketable securities with maturities greater than 90 days, which yielded greater rates of return.

PROVISION FOR INCOME TAXES

The effective tax rate increased to 37.5% in fiscal 2004 compared with the 37.0% recorded in fiscal 2003.

MINORITY INTEREST

Minority interest expense, net of tax, increased to $18.0 million, or 1.4% of net sales, in fiscal 2004 from $7.6 million, or 0.8% of net sales, in fiscal 2003. This increase was due to increased profits from the operations of Coach Japan and the impact of a stronger yen.

FISCAL 2003 COMPARED TO FISCAL 2002

NET SALES

DIRECT Net sales increased 25.1% to $559.5 million during fiscal 2003, from $447.1 million in fiscal 2002. Comparable store sales growth for retail stores and factory stores open for one full year was 24.6% and 5.0%, respectively. Comparable store growth for the entire domestic store chain was 15.2%, which represented approximately $62 million of the net sales increase. Since the end of fiscal 2002, Coach opened 20 retail stores and three factory stores, expanded four retail and five factory stores and had wrap from fiscal 2002 openings, which accounted for approximately $45 million of the increase in net sales. The Internet and direct marketing businesses accounted for the remaining sales increase. The increase in net sales was partially offset by the two retail stores and one factory store that were closed since the end of fiscal 2002.

INDIRECT Net sales increased 44.6% to $393.7 million in fiscal 2003 from $272.3 million during fiscal 2002. The increase was primarily driven by Coach Japan, in which net sales increased $89.4 million over the prior year. We opened 14 locations in Japan since the end of fiscal 2002, which represented approximately $42 million of the increase. Our Japan locations experienced double-digit net sales gains in comparable locations over the prior year, which represented approximately $30 million of the increase. In addition, fiscal 2002 only included 11 months of Coach Japan operations, while fiscal 2003 included a full year. In the third quarter of fiscal 2002, Coach Japan acquired the distribution rights and assets of J. Osawa. The effect of the incremental month of operations and acquisition of J. Osawa locations represented approximately $19 million of the increase in net sales. These increases were partially offset by the closure of four locations since the end of fiscal 2002. This decrease was approximately $2 million. The U.S. wholesale and business-to-business divisions contributed increased sales of $21.3 million and $8.3 million, respectively. The increase in net sales was partially offset by decreased net sales in the international wholesale division of $1.3 million. The remaining change in net sales was due to increases in other indirect channels.

GROSS PROFIT

Gross profit increased 40.1% to $677.4 million in fiscal 2003 from $483.4 million in fiscal 2002. Gross margin increased 390 basis points to 71.1% in fiscal 2003 from 67.2% in fiscal 2002. This improvement was primarily driven by a shift in product mix reflecting the continued diversification into new and successful fabric and leather collections, which contributed approximately 140 basis points. There were sourcing cost initiatives, which contributed approximately 120 basis points. In addition, there was a shift in channel mix, which contributed approximately 100 basis points. The remaining improvement was driven primarily by the consolidation of Coach Japan.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

Selling, general and administrative expenses increased 25.2% to $433.7 million in fiscal 2003 from $346.4 million in fiscal 2002. The dollar increase was caused primarily by increased operating expenses in Coach Japan and the U.S. stores. These increased expenses were due to new stores and variable expenses to support increased net sales. Fiscal 2002 selling, general and administrative expenses included 11 months of Coach Japan, while fiscal 2003 included a full year. As a percentage of net sales, selling, general and administrative expenses during fiscal 2003 were 45.5% compared to 48.1% during fiscal 2002. This improvement was due to leveraging our expense base on higher sales.
Selling expenses increased by 28.6% to $294.9 million in fiscal 2003 from $229.3 million in fiscal 2002. The dollar increase in these expenses was primarily due to the operating costs associated with Coach Japan and operating costs associated with new retail and factory stores. Fiscal 2002 expenses included 11 months of Coach Japan, while fiscal 2003 included a full year. The increase in Coach Japan expenses was $34.6 million. Included in the current year costs was a $3.4 million favorable fair value adjustment for foreign currency forward contracts, compared to a $3.3 million unfavorable fair value adjustment in fiscal 2002. Domestically, Coach opened 20 new retail stores and three new factory stores since the end of fiscal 2002. The increase in the U.S. stores expense was $28.1 million. The remaining increase to selling expenses was due to increased variable expenses to support comparable store growth. As a percentage of net sales, selling expenses improved from 31.9% in fiscal 2002 to 30.9% in fiscal 2003. The decline was due to leveraging higher sales in the domestic stores division.

Advertising, marketing, and design costs increased by 10.8% to $57.3 million, or 6.0% of net sales, in fiscal 2003, from $51.7 million, or 7.2% of net sales, in fiscal 2002. The dollar increase was primarily due to increased staffing costs and increased design expenditures.

Distribution and customer service expenses increased to $29.7 million in fiscal 2003 from $26.9 million in fiscal 2002. The dollar increase in these expenses was primarily due to higher sales volumes. However, efficiency gains at the distribution and customer service facility resulted in a decline in the ratio to net sales from 3.7% in fiscal 2002 to 3.1% in fiscal 2003.

Administrative expenses increased by 34.5% to $51.8 million, or 5.5% of net sales, in fiscal 2003 from $38.5 million, or 5.4% of net sales, in fiscal 2002. The absolute dollar increase in these expenses was due in part to increased total compensation cost of approximately $8 million. The increase was due primarily to increased base salary and employment agreements with certain executives, which accounted for $9 million of the increase. The increase was partially offset by decreased temporary employee costs. There were higher occupancy costs of approximately $2 million associated with the full year impact of acquiring additional space in our New York City headquarters. Insurance settlement proceeds decreased approximately $2 million due to the nonrecurrence of store inventory and fixed asset recoveries relating to our World Trade Center location.

**REORGANIZATION COSTS**

In March 2002, Coach ceased production at its Lares, Puerto Rico, manufacturing facility. This reorganization involved the termination of 394 manufacturing, warehousing and management employees and the disposition of the fixed assets at the Lares facility. These actions were intended to reduce costs by the resulting transfer of production to lower cost third-party manufacturers. Coach recorded a reorganization cost of $3.4 million. The reorganization cost included $2.2 million for worker separation costs, $0.7 million for lease termination costs and $0.5 million for the write-down of long-lived assets to net realizable value.

**INTEREST INCOME, NET**

Net interest income was $1.1 million in fiscal 2003, as compared to an expense of $0.3 million in fiscal 2002. The dollar change was due to reduced borrowings and positive cash balances during fiscal 2003.

**PROVISION FOR INCOME TAXES**

The effective tax rate increased to 37.0% in fiscal 2003 compared with the 35.5% recorded in fiscal 2002. This increase was due in part to the closure of our facility in Lares, Puerto Rico and the elimination of related tax benefits.

**MINORITY INTEREST**

Minority interest, net of tax, increased to $7.6 million, or 0.8% of net sales, in fiscal 2003 from $0.2 million in fiscal 2002. The dollar change was due to increased profitability in Coach Japan coupled with a stronger yen.
FINANCIAL CONDITION

LIQUIDITY AND CAPITAL RESOURCES

Net cash provided from operating activities was $448.6 million in fiscal 2004 compared to $221.6 million in fiscal 2003. This $227.0 million increase was primarily the result of increased earnings of $115.1 million and increased tax benefit from the exercise of stock options of $65.0 million.

Net cash used in investment activities was $369.4 million in fiscal 2004 compared to $57.1 million in fiscal 2003. The increase in net cash used in investment activities is primarily attributable to the $301.7 million purchase of investments. During fiscal 2004, Coach began investing in marketable securities with maturities greater than 90 days in order to maximize the rate of return on our investments. In addition, capital expenditures also increased by $10.6 million, which related primarily to new and renovated retail stores in the United States and Japan as well as technology enhancements. Coach’s future capital expenditures will depend on the timing and rate of expansion of our businesses, new store openings, store renovations and international expansion opportunities.

Net cash used in financing activities was $45.7 million in fiscal 2004 compared to $29.3 million in fiscal 2003. The $16.4 million increase in cash used resulted from an additional $17.1 million of repayments related to Coach Japan’s credit facilities and an additional $5.0 million of funds expended to repurchase common stock, offset by an additional $5.7 million of proceeds received from the exercise of stock options.

On October 16, 2003, Coach, certain lenders and Fleet National Bank (“Fleet”), as primary lender and administrative agent, renewed the $100 million senior unsecured revolving credit facility (the “Fleet facility”), extending the facility expiration to October 16, 2006. At Coach’s request, the Fleet facility can be expanded to $125 million, and during the first two years of its term, the expiration can be extended for one additional year, to October 16, 2007. Indebtedness under this revolving credit facility bears interest calculated, at Coach’s option, at either a rate of LIBOR plus a margin or the prime rate announced by Fleet. This facility is available for seasonal working capital requirements or general corporate purposes. The facility may be prepaid without penalty or premium.

During fiscal 2004 and fiscal 2003 there were no borrowings under the Fleet facility. As of July 3, 2004, there were no outstanding borrowings under the Fleet facility.

Under this revolving credit facility, Coach pays a commitment fee of 12.5 to 30 basis points, based on the Company’s fixed charge coverage ratio, on any unused amounts of the revolving credit facility. The initial commitment fee was 30 basis points. At July 3, 2004, the commitment fee was 15 basis points. The initial LIBOR margin under the facility was 125 basis points. At July 3, 2004, the LIBOR margin was 62.5 basis points, reflecting an improvement in our fixed-charge coverage ratio.

The Fleet facility contains various covenants and customary events of default. Coach has been in compliance with all covenants since its inception.

To provide funding for working capital and general corporate purposes, Coach Japan entered into credit facilities with several Japanese financial institutions. These facilities allow a maximum borrowing of 8.6 billion yen or approximately $79 million at July 3, 2004. Interest is based on the Tokyo Interbank rate plus a margin of up to 50 basis points.

During fiscal 2004 and fiscal 2003, the peak borrowings under the Japanese credit facilities were $36.1 million and $43.4 million, respectively. At July 3, 2004 and June 28, 2003, outstanding borrowings under the Japanese facilities were $1.7 million and $26.5 million, respectively.

These Japanese facilities contain various covenants and customary events of default. Coach Japan has been in compliance with all covenants since their inception. These facilities include automatic renewals based on compliance with the covenants. Coach, Inc. is not a guarantor on these facilities.
The Coach Board of Directors has authorized the establishment of a common stock repurchase program. Under this program, up to $180 million may be utilized to repurchase Coach's outstanding common stock. Purchases of Coach stock may be made from time to time, subject to market conditions and at prevailing market prices, through open market purchases. Repurchased shares will be retired and may be reissued in the future for general corporate or other uses. This stock repurchase program expires in January 2006. The Company may terminate or limit the stock repurchase program at any time.

During fiscal 2004 and fiscal 2003, Coach repurchased 1.5 million and 3.9 million shares, respectively, of common stock, at an average cost of $36.36 and $12.95 per share, respectively. As of July 3, 2004, Coach had approximately $65 million remaining in the stock repurchase program.

On August 12, 2004, the Coach Board of Directors approved a $200 million increase to the Company's existing common stock repurchase program and extended the duration of this program through August 2006.

During August 2004, the Company repurchased 2.4 million shares of common stock at an average cost of $39.06 per share. These stock repurchases of approximately $95 million were financed from cash on hand. As of September 4, 2004, Coach had expended approximately $210 million of the $380 million authorized to date under the stock repurchase program.

In fiscal 2004, total capital expenditures were $67.7 million. Coach opened 19 new retail and two new factory stores in North America, which represented $19.5 million of capital expenditures, as well as expanded nine stores, which represented $11.8 million of capital expenditures. Spending on department store renovations and distributor locations was $3.9 million. In addition, $16.5 million was used for information systems and corporate facilities. These investments were financed from internally generated cash flows and operating cash flow. In Japan, we invested $16.0 million, primarily for the opening of eight new locations, store expansions and information systems. These investments were financed by using funds from our Japanese revolving credit facilities and operating cash flow.

Coach experiences significant seasonal variations in its working capital requirements. During the first fiscal quarter Coach builds inventory for the holiday selling season, opens new retail stores and generates higher levels of trade receivables. In the second fiscal quarter its working capital requirements are reduced substantially as Coach generates consumer sales and collects wholesale accounts receivable. In fiscal 2004, Coach purchased approximately $349 million of inventory, which was funded by on hand cash, operating cash flow and by borrowings under the Japanese revolving credit facilities.

Management believes that cash flow from operations and on hand cash will provide adequate funds for the foreseeable working capital needs, planned capital expenditures and the common stock repurchase program. Any future acquisitions, joint ventures or other similar transactions may require additional capital. There can be no assurance that any such capital will be available to Coach on acceptable terms or at all. Coach's ability to fund its working capital needs, planned capital expenditures and scheduled debt payments, as well as to comply with all of the financial covenants under its debt agreements, depends on its future operating performance and cash flow, which in turn are subject to prevailing economic conditions and to financial, business and other factors, some of which are beyond Coach's control.

Currently, Sara Lee is a guarantor or a party to many of Coach's leases. Coach has agreed to make efforts to remove Sara Lee from all of its existing leases, and Sara Lee is not a guarantor or a party to any new or renewed leases. Coach has obtained a letter of credit for the benefit of Sara Lee in an amount approximately equal to the annual minimum rental payments under leases transferred to Coach by Sara Lee, but for which Sara Lee retains contingent liability. Coach is required to maintain this letter of credit until the annual minimum rental payments under the relevant leases are less than $2.0 million. The initial letter of credit had a face amount of $20.6 million, and we expect this amount to decrease annually as Coach's guaranteed obligations are reduced. As of July 3, 2004, the letter of credit was $16.8 million. We expect that we will be required to maintain the letter of credit for at least 10 years.
As of July 3, 2004, the scheduled maturities of Coach’s long-term contractual obligations are as follows:

<table>

Coach does not have any off-balance-sheet financing or unconsolidated special purpose entities. Coach’s risk management policies prohibit the use of derivatives for trading purposes. The valuation of financial instruments that are marked-to-market are based upon independent third-party sources.

**LONG-TERM DEBT**

Coach is party to an Industrial Revenue Bond related to its Jacksonville, Florida, facility. This loan has a remaining balance of $3.5 million and bears interest at 8.77%. Principal and interest payments are made semiannually, with the final payment due in 2014.

**SEASONALITY**

Because its products are frequently given as gifts, Coach has historically realized, and expects to continue to realize, higher sales and operating income in the second quarter of its fiscal year, which includes the holiday months of November and December. In addition, fluctuations in sales and operating income in any fiscal quarter are affected by the timing of seasonal wholesale shipments and other events affecting retail sales. However, over the past several years, we have achieved higher levels of growth in the nonholiday quarters, which has reduced these seasonal fluctuations. We expect that these trends will continue and we will further balance our year round business.

**CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. Predicting future events is inherently an imprecise activity and, as such, requires the use of judgment. Actual results may vary from estimates in amounts that may be material to the financial statements. The accounting policies discussed below are considered critical because changes to certain judgments and assumptions inherent in these policies could affect the financial statements.

In certain instances, accounting principles generally accepted in the United States of America allow for the selection of alternative accounting methods. The Company’s significant policies that involve the selection of alternative methods are accounting for stock options and inventories.

**STOCK-BASED COMPENSATION**

Two alternative methods for accounting for stock options are available: the intrinsic value method and the fair value method. The Company uses the intrinsic value method of accounting for stock options and, accordingly, no compensation expense has been recognized. Under either method, the determination of the pro forma amounts involves several assumptions including option life and future volatility. See Note 1 of the Consolidated Financial Statements for expanded disclosures.
INVENTORIES
U.S. inventories are valued at the lower of cost (determined by the first-in, first-out method) or market. Inventories in Japan are valued at the lower of cost (determined by the last-in, first-out method) or market. Inventory costs include material, conversion costs, freight and duties. Reserves for slow moving and aged merchandise are provided based on historical experience and current product demand. We evaluate the adequacy of reserves quarterly. A decrease in product demand due to changing customer tastes, buying patterns or increased competition could impact Coach’s evaluation of its slow moving and aged merchandise.

For more information on Coach’s accounting policies please refer to the Notes to Consolidated Financial Statements. Other critical accounting policies are as follows:

VALUATION OF LONG-LIVED ASSETS
In accordance with Statement of Financial Accounting Standards (“SFAS”) No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets,” which the Company adopted effective with the beginning of fiscal 2002, the Company assesses the carrying value of its long-lived assets for possible impairment based on a review of forecasted operating cash flows and the profitability of the related business. The Company did not record any impairment losses in fiscal 2004 or fiscal 2003. See Note 18 of the Consolidated Financial Statements for long-lived asset write-downs recorded in connection with the Company’s fiscal 2002 reorganization plan.

REVENUE RECOGNITION
Sales are recognized at the point of sale, which occurs when merchandise is sold in an over-the-counter consumer transaction or, for the wholesale channels, upon shipment of merchandise, when title passes to the customer. Allowances for estimated uncollectible accounts, discounts, returns and allowances are provided when sales are recorded based upon historical experience and current trends. Royalty revenues are earned through license agreements with manufacturers of other consumer products that incorporate the Coach brand. Revenue earned under these contracts is recognized based upon reported net sales from the licensee.

NEW ACCOUNTING STANDARDS
During fiscal 2004, the Company adopted SFAS No. 148, “Accounting for Stock-Based Compensation – Transition and Disclosure,” which amends SFAS No. 123, “Accounting for Stock-Based Compensation.” SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. As the Company does not expense stock options, the adoption of this statement did not have an impact on Coach’s consolidated financial position or results of operations. SFAS No. 148 also amends the disclosure requirements of SFAS No. 123 to require more prominent and more frequent disclosures in financial statements of the effects of stock-based compensation. See Note 1 to the Consolidated Financial Statements for these expanded disclosures.

In April 2003, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 149, “Amendment of Statement 133 on Derivative Instruments and Hedging Activities,” to amend and clarify financial accounting and reporting for derivative instruments embedded in other contracts and for hedging activities under SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities.” SFAS No. 149 requires that contracts with comparable characteristics be accounted for similarly and clarifies under what circumstances a contract with an initial net investment meets the characteristics of a derivative as discussed in SFAS No. 133. In addition, it clarifies when a derivative contains a financing component that warrants special reporting in the statement of cash flows. SFAS No. 149 is effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The adoption of SFAS No. 149 did not have an impact on Coach’s financial position or results of operations.

In May 2003, the FASB issued SFAS No. 150, “Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity,” SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). The provisions of SFAS No. 150 are effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS No. 150 did not have an impact on Coach’s financial position or results of operations.
In December 2003, the FASB issued SFAS No. 132 (revised 2003), “Employers’ Disclosures about Pensions and Other Postretirement Benefits.” This statement revises employers’ disclosures about pension plans and other postretirement benefits. However, it does not change the measurement or recognition of those plans, as previously required by SFAS No. 87, “Employers’ Accounting for Pensions,” No. 88, “Employers’ Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits,” and No. 106, “Employers’ Accounting for Postretirement Benefits Other Than Pensions.” In addition to the disclosure requirements contained in SFAS No. 132, the revised statement requires additional disclosures about the assets, obligations, cash flows, and net periodic benefit cost of defined benefit pension plans and other defined postretirement plans. See Note 9, “Retirement Plans,” for these additional disclosures.

In March 2004, the Emerging Issues Task Force (“EITF”) reached consensus on EITF 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments.” EITF 03-1 provides guidance on the new requirements for other-than-temporary impairment and its application to debt and marketable equity investments that are accounted for under SFAS No. 115. The new requirements on disclosures are effective for fiscal years ending after December 15, 2003. The implementation of EITF 03-1 did not have an impact on Coach’s financial position or results of operations.
Independent Registered Public Accounting Firm Report

To the Board of Directors and Shareholders of Coach, Inc.:

We have audited the accompanying consolidated balance sheets of Coach, Inc. and subsidiaries (the “Company”) as of July 3, 2004 and June 28, 2003 and the related consolidated statements of income, stockholders’ equity, and cash flows for each of the three years in the period ended July 3, 2004. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of July 3, 2004 and June 28, 2003, and the results of its operations and its cash flows for each of the three years in the period ended July 3, 2004, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

(1) 53-week fiscal year

See accompanying Notes to Consolidated Financial Statements
1. **Nature of Operations and Significant Accounting Policies**

**Nature of Operations**
Coach, Inc. (the “Company”) designs, produces and markets high-quality, modern American classic accessories. The Company's primary product offerings, manufactured by third-party suppliers, include handbags, women's and men's accessories, business cases, weekend and travel accessories, outerwear and related accessories. Coach's products are sold through direct-to-consumer channels, including Company-operated retail and factory stores, an on-line store and Coach catalogs, as well as through indirect channels, including department store locations in the United States, international department, retail and duty-free shop locations as well as department store shop-in-shops, and retail and factory store locations operated by Coach Japan, Inc.

**Significant Accounting Policies**

**Fiscal Year** The Company’s fiscal year ends on the Saturday closest to June 30. Unless otherwise stated, references to years in the financial statements relate to fiscal years. The fiscal year ended July 3, 2004 (“fiscal 2004”) was a 53-week period, whereas the fiscal years ended June 28, 2003 (“fiscal 2003”) and June 29, 2002 (“fiscal 2002”) were each 52-week periods.

**Use of Estimates** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. The level of uncertainty in estimates and assumptions increases with the length of time until the underlying transactions are completed. Actual results could differ from estimates in amounts that may be material to the financial statements.

**Principles of Consolidation** The consolidated financial statements include the accounts of the Company, all 100% owned subsidiaries and Coach Japan. All significant intercompany transactions and balances are eliminated in consolidation.

**Cash and Cash Equivalents** Cash and cash equivalents consist of cash balances and highly liquid investments with a maturity of less than 90 days.

**Investments** Investments consist of U.S. government and agency debt securities as well as municipal government and corporate debt securities. These securities are classified as held to maturity, as the Company has both the ability and the intent to hold these securities until maturity. Investments are recorded at amortized cost. Premiums are amortized and discounts are accreted over the lives of the related securities as adjustments to interest income, using the effective interest method. Dividend and interest income are recognized when earned.

**Concentration of Credit Risk** Financial instruments that potentially expose Coach to concentration of credit risk consist primarily of cash investments and accounts receivable. The Company places its cash investments with high-credit quality financial institutions and currently invests primarily in U.S. government and agency debt securities, municipal government and corporate debt securities, and bank money market funds placed with major banks and financial institutions. Accounts receivable is generally diversified due to the number of entities comprising Coach's customer base and their dispersion across many geographical regions. The Company’s allowance for bad debts, returns and allowances was $5,456 at July 3, 2004 and $6,095 at June 28, 2003. The Company believes no significant concentration of credit risk exists with respect to these cash investments and accounts receivable.
INVENTORIES Inventories consist primarily of finished goods. U.S. inventories are valued at the lower of cost (determined by the first-in, first-out method (“FIFO”)) or market. Inventories in Japan are valued at the lower of cost (determined by the last-in, first-out method (“LIFO”)) or market. At the end of fiscal 2004 and fiscal 2003, inventories recorded at LIFO were $2,409 and $650 higher, respectively, than if they were valued at FIFO. Inventories valued under LIFO amounted to $34,508 and $23,484 in fiscal 2004 and 2003, respectively. Inventory costs include material, conversion costs, freight and duties.

PROPERTY AND EQUIPMENT Property and equipment are stated at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets. Machinery and equipment are depreciated over lives of five to seven years and furniture and fixtures are depreciated over lives of three to five years. Leasehold improvements are amortized over the shorter of their estimated useful lives or the related lease terms. Maintenance and repair costs are charged to earnings as incurred while expenditures for major renewals and improvements are capitalized. Upon the disposition of property and equipment, the cost and related accumulated depreciation are removed from the accounts.

GOODWILL AND OTHER INTANGIBLE ASSETS The Company adopted Statement of Financial Accounting Standards (“SFAS”) No. 142, “Goodwill and Other Intangible Assets,” effective with the beginning of fiscal 2002. In accordance with SFAS No. 142, the Company’s goodwill account is no longer amortized but rather is evaluated for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired. Based on this annual evaluation, the Company has concluded that there is no impairment of its goodwill or indefinite life intangible assets.

VALUATION OF LONG-LIVED ASSETS In accordance with SFAS No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets,” which the Company adopted effective with the beginning of fiscal 2002, the Company assesses the carrying value of its long-lived assets for possible impairment based on a review of forecasted operating cash flows and the profitability of the related business. The Company did not record any impairment losses in fiscal 2004 or fiscal 2003. See Note 18 to the Consolidated Financial Statements for long-lived asset write-downs recorded in connection with the Company’s fiscal 2002 reorganization plan.

MINORITY INTEREST IN SUBSIDIARY Minority interest in the statements of income represents Sumitomo Corporation’s share of the equity in Coach Japan. The minority interest in the consolidated balance sheets reflects the original investment by Sumitomo in that consolidated subsidiary, along with their proportional share of the cumulative income, net of tax.

REVENUE RECOGNITION Sales are recognized at the point of sale, which occurs when merchandise is sold in an over-the-counter consumer transaction or, for the wholesale channels, upon shipment of merchandise, when title passes to the customer. Allowances for estimated uncollectible accounts, discounts, returns and allowances are provided when sales are recorded. Royalty revenues are earned through license agreements with manufacturers of other consumer products that incorporate the Coach brand. Revenue earned under these contracts is recognized based upon reported sales from the licensee.

ADVERTISING Advertising costs, which include media and production, totaled $21,574, $19,885 and $17,279 in fiscal years 2004, 2003 and 2002, respectively, and are included in selling, general and administrative expenses. Advertising costs are expensed when the advertising first appears.

SHIPPING AND HANDLING Shipping and handling costs incurred were $13,080, $11,290, and $10,694 in fiscal years 2004, 2003 and 2002, respectively and are included in selling, general and administrative expenses.

INCOME TAXES The Company accounts for income taxes in accordance with SFAS No. 109, “Accounting for Income Taxes.” Under SFAS No. 109, a deferred tax liability or asset is recognized for the estimated future tax consequences of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases.
STOCK-BASED COMPENSATION The Company’s stock-based compensation plans and the employee stock purchase plan, as more fully described in Note 8, “Stock-Based Compensation,” are accounted for in accordance with Accounting Principles Board Opinion 25, “Accounting for Stock Issued to Employees,” and related Interpretations. Accordingly, no compensation cost is recognized for stock options and replacement stock options issued under stock-based compensation plans or for shares purchased under the employee stock purchase plan. The compensation cost that has been charged against income, reflecting amortization of restricted stock units, was $4,410, $1,568 and $766 in fiscal 2004, 2003 and 2002, respectively. The following illustrates the effect on net income and earnings per share as if the fair value based method of accounting, defined in SFAS No. 123, “Accounting for Stock-Based Compensation,” had been applied:

</table>

FAIR VALUE OF FINANCIAL INSTRUMENTS The fair value of the revolving credit facility at July 3, 2004 and June 28, 2003 approximated its carrying value due to its floating interest rates. The Company has evaluated its Industrial Revenue Bond and believes, based on the interest rate, related term and maturity, that the fair value of such instrument approximates its carrying amount. As of July 3, 2004 and June 28, 2003, the carrying values of cash and cash equivalents, investments, trade accounts receivable, accounts payable, and accrued liabilities approximated their values due to the short-term maturities of these accounts. See Note 7, “Investments,” for the fair values of the Company’s investments as of July 3, 2004.

Coach, through Coach Japan, enters into foreign currency forward contracts that hedge certain U.S. dollar denominated inventory risk, that have been designated for hedge accounting. The fair value of these contracts is recognized in other comprehensive income. The fair value of the foreign currency derivative is based on its market value as determined by an independent party. However, considerable judgment is required in developing estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that Coach could settle in a current market exchange. The use of different market assumptions or methodologies could affect the estimated fair value.

FOREIGN CURRENCY The functional currency of the Company’s foreign operations is the applicable local currency. Assets and liabilities are translated into U.S. dollars using the current exchange rates in effect at the balance sheet date, while revenues and expenses are translated at the weighted-average exchange rates for the period. The resulting translation adjustments are recorded as a component of accumulated other comprehensive income (loss) within stockholders’ equity. Translation adjustment gains in fiscal 2004 were $2,892 compared to translation adjustment losses in fiscal 2003 of $348. Translation adjustment gains in fiscal 2002 were $396.

NET INCOME PER SHARE Basic net income per share was calculated by dividing net income by the weighted-average number of shares outstanding during the period. Diluted net income per share was calculated similarly but includes potential dilution from the exercise of stock options and stock awards.
In May 2002, Coach’s Board of Directors authorized a two-for-one split of the Company’s common stock, to be effected in the form of a special dividend of one share of the Company’s common stock for each share outstanding. The additional shares issued as a result of the stock split were distributed on July 3, 2002 to stockholders of record on June 19, 2002.

In August 2003, Coach’s Board of Directors authorized a two-for-one split of the Company’s common stock, to be effected in the form of a special dividend of one share of the Company’s common stock for each share outstanding. The additional shares issued as a result of the stock split were distributed on October 1, 2003 to stockholders of record on September 17, 2003.

The effect of these stock splits on the number of shares and earnings per share was retroactively applied to all periods presented.

RECENT ACCOUNTING PRONOUNCEMENTS During fiscal 2004, the Company adopted SFAS No. 148, “Accounting for Stock-Based Compensation – Transition and Disclosure,” which amends SFAS No. 123, “Accounting for Stock-Based Compensation.” SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. As the Company does not expense stock options, the adoption of this statement did not have an impact on Coach’s consolidated financial position or results of operations. SFAS No. 148 also amends the disclosure requirements of SFAS No. 123 to require more prominent and more frequent disclosures in financial statements of the effects of stock-based compensation. See above, “Stock-Based Compensation,” for these expanded disclosures.

In April 2003, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 149, “Amendment of Statement 133 on Derivative Instruments and Hedging Activities,” to amend and clarify financial accounting and reporting for derivative instruments embedded in other contracts and for hedging activities under SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities.” SFAS No. 149 requires that contracts with comparable characteristics be accounted for similarly and clarifies under what circumstances a contract with an initial net investment meets the characteristics of a derivative as discussed in SFAS No. 133. In addition, it clarifies when a derivative contains a financing component that warrants special reporting in the statement of cash flows. SFAS No. 149 is effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The adoption of SFAS No. 149 did not have an impact on Coach’s financial position or results of operations.

In May 2003, the FASB issued SFAS No. 150, “Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity.” SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). The provisions of SFAS No. 150 are effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS No. 150 did not have an impact on Coach’s financial position or results of operations.

In December 2003, the FASB issued SFAS No. 132 (revised 2003), “Employers’ Disclosures about Pensions and Other Postretirement Benefits.” This statement revises employers’ disclosures about pension plans and other postretirement benefits. However, it does not change the measurement or recognition of those plans, as previously required by SFAS No. 87, “Employers’ Accounting for Pensions,” No. 88, “Employers’ Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits” and No. 106, “Employers’ Accounting for Postretirement Benefits Other Than Pensions.” In addition to the disclosure requirements contained in SFAS No. 132, the revised statement requires additional disclosures about the assets, obligations, cash flows and net periodic benefit cost of defined benefit pension plans and other defined postretirement plans. See Note 9, “Retirement Plans,” for these additional disclosures.

In March 2004, the Emerging Issues Task Force (“EITF”) reached consensus on EITF 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments.” EITF 03-1 provides guidance on the new requirements for other-than-temporary impairment and its application to debt and marketable equity investments that are accounted for under SFAS No. 115. The new requirements on disclosures are effective for fiscal years ending after December 15, 2003. The implementation of EITF 03-1 did not have an impact on Coach’s financial position or results of operations.

RECLASSIFICATIONS Certain prior year amounts have been reclassified to conform with current year presentation.

<td>$54,812</td>
<td>$42,378</td>
</tr>
</tbody>
</table>

At July 3, 2004, state gross tax loss carryforwards totaled approximately $24,945. These loss carryforwards will begin to expire in fiscal year 2008.

The Company has received tax benefit from the exercise of stock options. This benefit is reflected as a credit to stockholders’ equity and not reflected in the provision for income taxes. The amount of this benefit was $106,458, $41,503 and $13,793 in fiscal 2004, 2003 and 2002, respectively.
4. DEBT

REVOLVING CREDIT FACILITIES On February 27, 2001, Coach, certain lenders and Fleet National Bank ("Fleet"), as primary lender and administrative agent, entered into a $100,000 senior unsecured three-year revolving credit facility (the “Fleet facility”). On October 16, 2003, this facility was renewed, extending the facility expiration to October 16, 2006. At Coach’s request, the Fleet facility can be expanded to $125,000 and, during the first two years of its term, the expiration date can be extended for one additional year, to October 16, 2007. This facility is available for seasonal working capital requirements or general corporate purposes and may be prepaid without penalty or premium.

During fiscal 2004 and 2003, there were no borrowings under the Fleet facility. As of July 3, 2004, there were no outstanding borrowings under the Fleet facility.

Coach pays a commitment fee of 12.5 to 30 basis points based on any unused amounts of the Fleet facility. The initial commitment fee was 30 basis points. At July 3, 2004, the commitment fee was 15 basis points. The initial LIBOR margin under the Fleet facility was 125 basis points. At July 3, 2004, the LIBOR margin was 62.5 basis points, reflecting an improvement in our fixed-charge coverage ratio.

The Fleet facility prohibits Coach from paying dividends while the credit facility is in place, with certain exceptions. Any future determination to pay cash dividends will be at the discretion of Coach’s Board of Directors and will be dependent upon Coach’s financial condition, operating results, capital requirements and such other factors as the Board of Directors deems relevant.

The Fleet facility contains various covenants and customary events of default. The Company has been in compliance with all covenants since its inception.

To provide funding for working capital and general corporate purposes, Coach Japan entered into credit facilities with several Japanese financial institutions. These facilities allow a maximum borrowing of 8.6 billion yen or approximately $79,000 at July 3, 2004. Interest is based on the Tokyo Interbank rate plus a margin of up to 50 basis points.

These facilities contain various covenants and customary events of default. Coach Japan has been in compliance with all covenants since their inception. These facilities include automatic renewals based on compliance with the covenants. Coach, Inc. is not a guarantor on any of these facilities.

During fiscal 2004 and 2003, the peak borrowings under the Japanese credit facilities were $36,084 and $43,443. As of July 3, 2004 and June 28, 2003, outstanding borrowings under the Japanese credit facilities were $1,699 and $26,471, respectively.

LONG-TERM DEBT Coach is party to an Industrial Revenue Bond related to its Jacksonville, Florida, facility. This loan has a remaining balance of $3,535 and bears interest at 8.77%. Principal and interest payments are made semiannually, with the final payment due in 2014. Future principal payments under the Industrial Revenue Bond are as follows:

<table>
<thead>
<tr>
<th>FISCAL YEAR</th>
<th>AMOUNT</th>
</tr>
</thead>
<tbody>
<tr>
<td>2005</td>
<td>$115</td>
</tr>
<tr>
<td>2006</td>

</tr>
<tr>
<td>Subsequent to 2009</td>
<td>2,580</td>
</tr>
<tr>
<td>Total</td>
<td>$3,535</td>
</tr>
</tbody>
</table>
5. LEASES

Coach leases certain office, distribution and retail facilities. The lease agreements, which expire at various dates through 2016, are subject, in some cases, to renewal options and provide for the payment of taxes, insurance and maintenance. Certain leases contain escalation clauses resulting from the pass-through of increases in operating costs, property taxes and the effect on costs from changes in consumer price indices. Certain rentals are also contingent upon factors such as sales. Rent-free periods and scheduled rent increases are recorded as components of rent expense on a straight-line basis over the related terms of such leases. Contingent rentals are recognized when the achievement of the target (i.e. sales levels), which triggers the related payment, is considered probable. Rent expense for the Company’s operating leases consisted of the following:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum rentals</td>
<td>$ 55,352</td>
<td>$ 47,098</td>
<td>$ 36,965</td>
</tr>
<tr>
<td>Contingent rentals</td>
<td>7,555</td>
<td>4,885</td>
<td>3,292</td>
</tr>
<tr>
<td>Total rent expense</td>
<td>$ 62,907</td>
<td>$ 51,983</td>
<td>$ 40,257</td>
</tr>
</tbody>
</table>

Future minimum rental payments under noncancelable operating leases are as follows:

<table>
<thead>
<tr>
<th>Fiscal Year</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>2005</td>
<td>$ 56,635</td>
</tr>
<tr>
<td>2006</td>
<td>57,234</td>
</tr>
<tr>
<td>2007</td>
<td>52,188</td>
</tr>
<tr>
<td>2008</td>
<td>51,304</td>
</tr>
<tr>
<td>2009</td>
<td>47,449</td>
</tr>
<tr>
<td>Subsequent to 2009</td>
<td>184,914</td>
</tr>
<tr>
<td>Total minimum future rental payments</td>
<td>$ 449,724</td>
</tr>
</tbody>
</table>

Certain operating leases provide for renewal for periods of three to five years at their fair rental value at the time of renewal. In the normal course of business, operating leases are generally renewed or replaced by new leases.

6. COMMITMENTS AND CONTINGENCIES

At July 3, 2004 and June 28, 2003, the Company had letters of credit outstanding totaling $50,473 and $48,336, respectively. Of these amounts, $16,764 and $19,820, respectively, related to the letter of credit obtained in connection with leases transferred to the Company by the Sara Lee Corporation, for which Sara Lee retains contingent liability. Coach expects that it will be required to maintain the letter of credit for at least 10 years. The remaining letters of credit, which expire at various dates through 2007, primarily collateralize the Company’s obligation to third parties for the purchase of inventory and lease guarantees.

Coach is a party to employment agreements with certain executives, which provide for compensation and other benefits. The agreements also provide for severance payments under certain circumstances.
Coach is a party to several pending legal proceedings and claims. Although the outcome of such items cannot be determined with certainty, Coach’s general counsel and management are of the opinion that the final outcome will not have a material effect on Coach’s cash flow, results of operations or financial position.

7. INVESTMENTS

At June 28, 2003, the Company had no investments. During fiscal 2004, the Company began investing in marketable securities with maturities greater than 90 days, in order to maximize the rate of return on investments. The Company’s investments consist of U.S. government and agency debt securities as well as municipal government and corporate debt securities. As the Company has both the ability and the intent to hold these securities until maturity, all investments are classified as held to maturity and stated at amortized cost. The Company’s investment securities are as follows:

<table>
<thead>
<tr>
<th>FISCAL YEAR ENDED</th>
<th>JULY 3, 2004</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>AMORTIZED</td>
</tr>
<tr>
<td></td>
<td>COST</td>
</tr>
<tr>
<td>Short-term investments:</td>
<td></td>
</tr>
<tr>
<td>U.S. government and agency securities</td>
<td>$ 50,000</td>
</tr>
<tr>
<td>Commercial paper</td>
<td>74,260</td>
</tr>
<tr>
<td>Corporate debt securities</td>
<td>22,500</td>
</tr>
<tr>
<td>Certificates of deposit</td>
<td>24,963</td>
</tr>
<tr>
<td><strong>Short-term investments</strong></td>
<td><strong>$ 171,723</strong></td>
</tr>
<tr>
<td>Long-term investments:</td>
<td></td>
</tr>
<tr>
<td>U.S. government and agency securities</td>
<td>$ 130,000</td>
</tr>
<tr>
<td><strong>Long-term investments</strong></td>
<td><strong>$ 130,000</strong></td>
</tr>
</tbody>
</table>

Securities with maturity dates within one year are classified as short-term investments. Securities with maturity dates greater than one year are classified as long-term investments. At July 3, 2004, the maturity dates of long-term investments, based on contractual maturities, extend to December 2005. Actual maturities could differ from contractual maturities as some borrowers have the right to call certain obligations.

The difference between amortized cost and fair value is the result of unrecognized losses in fiscal 2004.

8. STOCK-BASED COMPENSATION

**COACH STOCK-BASED PLANS** Coach maintains the 2000 Stock Incentive Plan and the 2000 Non-Employee Director Stock Plan to award stock options and other forms of equity compensation to certain members of Coach management and the outside members of its Board of Directors. These plans were approved by Coach’s stockholders during fiscal 2002. The exercise price of each stock option equals 100% of the market price of Coach’s stock on the date of grant and generally has a maximum term of 10 years. Options generally vest ratably over three years.
For options granted under Coach’s stock option plans prior to July 1, 2003, an active employee can receive a replacement stock option equal to the number of shares surrendered upon a stock-for-stock exercise. The exercise price of the replacement option is 100% of the market value at the date of exercise of the original option and will remain exercisable for the remaining term of the original option. Replacement stock options generally vest six months from the grant date. Replacement stock options of 5,632, 3,680 and 2,168 were granted in fiscal 2004, 2003 and 2002, respectively.

A summary of options held by Coach employees under the Coach option plans is as follows:

<table>
<thead>
<tr>

<td>35.2%</td>
<td>48.3%</td>
</tr>
<tr>
<td>Dividend yield</td>
<td>~%</td>
<td>~%</td>
<td>~%</td>
</tr>
</tbody>
</table>
The weighted-average fair values of individual options granted during fiscal 2004, 2003, and 2002 were $4.90, $2.45 and $2.41, respectively.

**EMPLOYEE STOCK PURCHASE PLAN** During fiscal 2002, Coach established the employee stock purchase plan and received stockholder approval of this program. Under this plan, full-time Coach employees are permitted to purchase a limited number of Coach common shares at 85% of market value. Under this plan, Coach sold 100,134 and 52 shares to employees in fiscal 2004, 2003 and 2002, respectively. Pro forma compensation expense is calculated for the fair value of employees’ purchase rights using the Black-Scholes model and the following weighted-average assumptions:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>

<td>38.3%</td>
<td>35.6%</td>
</tr>
<tr>
<td>Dividend yield</td>
<td>–%</td>
<td>–%</td>
<td>–%</td>
</tr>
</tbody>
</table>

The weighted-average fair value of the purchase rights granted during fiscal 2004, 2003, and 2002 was $9.70, $5.19 and $2.94, respectively.

**STOCK UNIT AWARDS** Restricted stock unit awards of Coach common stock have been granted to employees as retention awards. The value of retention awards is determined based upon the fair value of Coach stock at the grant date. Stock awards are restricted and subject to forfeiture until the retention period is completed. The retention period is generally three years. As of July 3, 2004, retention awards of 796 shares were outstanding. This value is initially recorded as unearned compensation and is charged to earnings over the retention period. The amortization expense related to these awards was $4,410, $1,568 and $766 for fiscal 2004, 2003 and 2002, respectively.

**DEFERRED COMPENSATION** Under the Coach, Inc. Executive Deferred Compensation Plan, executive officers and certain employees at or above the senior director level may elect to defer all or a portion of their annual bonus or annual base salary into the plan. Under the Coach, Inc. Deferred Compensation Plan for Non-Employee Directors, Coach’s outside directors may similarly defer their director’s fees. Amounts deferred under these plans may, at the participants’ election, be either represented by deferred stock units, which represent the right to receive shares of Coach common stock on the distribution date elected by the participant, or placed in an interest-bearing account to be paid on such distribution date. The amounts accrued under these plans at July 3, 2004 and June 28, 2003 were $4,263 and $2,915, respectively, and are included in other noncurrent liabilities in the consolidated balance sheets.
9. RETIREMENT PLANS

Coach maintains the Coach, Inc. Savings and Profit Sharing Plan, which is a defined contribution plan. Employees who meet certain eligibility requirements and are not part of a collective bargaining agreement may participate in this program. The annual expense incurred by Coach for this defined contribution plan was $7,620, $5,308 and $3,926 in fiscal 2004, 2003, and 2002, respectively.

Coach also sponsors a noncontributory defined benefit plan, The Coach Leatherware Company, Inc. Supplemental Pension Plan, for individuals who are part of collective bargaining arrangements. The plan provides benefits based on years of service.

The Company uses a March 31 measurement date for its defined benefit retirement plan. Obligation and funded status information for the Company’s defined benefit retirement plan is as follows:

To develop the expected long-term rate of return on plan assets assumption, the Company considered the current level of expected returns on risk-free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the target asset allocation to develop the expected long-term rate of return on plan assets assumption for the portfolio. This resulted in the selection of the 7.50% assumption for fiscal 2004.

The goals of the investment program are to fully fund the obligation to pay retirement benefits in accordance with the Coach Leatherware Company, Inc. Supplemental Pension Plan and to provide returns that, along with appropriate funding from Coach, maintain an asset/liability ratio that is in compliance with all applicable laws and regulations and assures timely payment of retirement benefits. The target allocation range of percentages for each major category of plan assets, on a weighted-average basis, are as follows:

<table>
<thead>
<tr>
<th>ASSET CATEGORY</th>
<th>LOW</th>
<th>TARGET</th>
<th>HIGH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity securities</td>
<td>30%</td>

<td>40%</td>
<td>55%</td>
</tr>
<tr>
<td>Cash equivalents</td>
<td>5%</td>
<td>15%</td>
<td>25%</td>
</tr>
</tbody>
</table>

The equity securities category includes common stocks, preferred stocks, and commingled funds of approved securities. The target allocation of securities is a maximum of 5% of equity assets in any one individual common or preferred stock and a maximum of 15% in any one mutual fund.

The Company expects to contribute $769 to its defined benefit pension plan during the year ending July 2, 2005.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

### 10. Segment Information

The Company operates its business in two reportable segments: direct-to-consumer and indirect. The Company’s reportable segments represent channels of distribution that offer similar merchandise, service and marketing strategies. Sales of Coach products through Company-operated retail and factory stores, the Internet and the Coach catalog constitute the direct-to-consumer segment. Indirect refers to sales of Coach products to other retailers and includes sales through Coach Japan. In deciding how to allocate resources and assess performance, Coach’s executive officers regularly evaluate the sales and operating income of these segments. Operating income is the gross margin of the segment less direct expenses of the segment. Unallocated corporate expenses include production variances, general marketing, administration and information systems, as well as distribution and customer service expenses.

**Geographic Area Information** As of July 3, 2004, Coach operated 174 retail stores and 76 factory stores in North America and operated distribution, product development and quality control locations in the United States, Italy, Hong Kong, China and South Korea. Geographic revenue information is based on the location of our customer. Geographic long-lived asset information is based on the physical location of the assets at the end of each period. Indirectly, through Coach Japan, Coach operates 100 department store shop-in-shops, and retail and factory store locations in Japan.

(1) Other International sales reflect shipments to third-party distributors primarily in East Asia and, in fiscal 2002, sales from Coach-operated retail stores in the United Kingdom.

**Derivative Instruments and Hedging Activities**

Substantially all purchases and sales involving international parties are denominated in U.S. dollars, the majority of which are not hedged using any derivative instruments. However, the Company is exposed to market risk from foreign currency exchange rate fluctuations with respect to Coach Japan as a result of its U.S. dollar-denominated inventory purchases. Coach Japan enters into certain foreign currency derivative contracts, primarily foreign exchange forward contracts, to manage these risks. In addition, the Company is exposed to foreign currency exchange rate fluctuations related to the euro-denominated expenses of its Italian sourcing office. During the third quarter of fiscal 2003, the Company began a program to enter into certain foreign currency derivative contracts.
contracts, primarily foreign exchange forward contracts, in order to manage these fluctuations. However, during the second quarter of fiscal 2004, the Company reassessed this program and determined, based on current business conditions, that the Company would discontinue hedging against the euro.

The foreign currency contracts entered into by the Company have durations no greater than 12 months. The fair values of open foreign currency derivatives included in accrued liabilities at July 3, 2004 and June 28, 2003 were $486 and $0, respectively. The fair value of open foreign currency derivatives included in current assets at July 3, 2004 and June 28, 2003 was $0 and $405, respectively. As of July 3, 2004, open foreign currency forward contracts designated as hedges with a notional amount of $63,600 were fair valued, resulting in a reduction to equity as a charge to other comprehensive income of $460, net of taxes. As of June 28, 2003, open foreign currency forward contracts designated as hedges with a notional amount of $39,300 were fair valued, resulting in an increase to equity as a benefit to other comprehensive income of $168, net of taxes. Also, for fiscal 2003, open foreign currency forward contracts not designated as hedges with a notional amount of $33,150 were fair valued and resulted in a pretax noncash benefit to earnings of $3,357. The fair value adjustment is included as a component of selling, general and administrative expenses.

12. **GOODWILL**

Changes in the carrying amounts of net goodwill for the years ended July 3, 2004 and June 28, 2003 are as follows:

<table>

13. **BUSINESS INTERRUPTION INSURANCE**

As a result of the September 11, 2001 attack, the World Trade Center store was completely destroyed. Losses relating to the Company’s business interruption coverage were filed with the insurers. Coach has held discussions with its insurance carriers and expects to fully recover these losses.

During fiscal 2004, 2003 and 2002, Coach received payments of $2,657, $1,484 and $1,413, respectively, under its business interruption coverage. These amounts are included as a reduction to selling, general and administrative expenses.

15. STOCK REPURCHASE PROGRAM

On September 17, 2001, the Coach Board of Directors authorized the establishment of a common stock repurchase program. Under this program, up to $80,000 may be utilized to repurchase common stock through September 2004. On January 30, 2003, the Coach Board of Directors approved an additional common stock repurchase program to acquire up to $100,000 of Coach's outstanding common stock through January 2006 and extended the duration of Coach's existing repurchase program through January 2006. Purchases of Coach stock may be made from time to time, subject to market conditions and at prevailing market prices, through open market purchases. Repurchased shares will become authorized but unissued shares and may be issued in the future for general corporate and other uses. The Company may terminate or limit the stock repurchase program at any time.

During fiscal 2004, 2003 and 2002, the Company repurchased and retired 1,511, 3,858 and 1,720 shares of common stock at an average cost of $36.36, $12.95 and $5.73 per share, respectively. As of July 3, 2004, Coach had approximately $65,000 remaining in the stock repurchase program.

16. RELATED-PARTY TRANSACTION

On July 26, 2001, Coach made a loan to Reed Krakoff, its President, Executive Creative Director, in the principal amount of $2,000. The loan bore interest at a rate of 5.12% per annum, compounded annually. The loan amount and applicable accrued interest, less payments received, was recorded as a component of other noncurrent assets in the accompanying balance sheets. Included in the loan agreement was a repayment schedule requiring full repayment on or before July 26, 2006.

On November 7, 2002, Mr. Krakoff paid Coach the first principal payment of $400 under the loan agreement. On March 11, 2004, Mr. Krakoff made an accelerated payment to retire the full outstanding principal and interest under the loan agreement.
17. COACH JAPAN, INC. AND THE ACQUISITION OF DISTRIBUTORS

In order to expand its presence in the Japanese market and to exercise greater control over its brand in that country, Coach formed Coach Japan, Inc. and has completed a program to acquire the existing distributors. This entity, which manages the Coach business in Japan, is a joint venture with Sumitomo. Coach owns 50% of Coach Japan and is deemed to have control as Coach appoints a majority of the Board of Directors, and, as such, Coach Japan is accounted for as a consolidated subsidiary. Under the terms of the joint venture agreement, Coach supplies its merchandise to Coach Japan for distribution and sale in Japan. Additionally, the joint venture agreement contains provisions to enable Coach to purchase the remaining minority interest in Coach Japan after the beginning of the seventh year of the joint venture agreement. Alternatively, Sumitomo could require Coach to purchase its ownership interest in the joint venture after such time as established in the terms of the joint venture agreement.

On July 31, 2001, Coach Japan completed the purchase of 100% of the capital stock of P.D.C. Co. Ltd. (“PDC”) from the Mitsukoshi Department Store Group (“Mitsukoshi”) for a total purchase price of $9,018. Mitsukoshi established PDC in 1991 to expand Coach distribution to select department stores throughout Japan. At the time of acquisition PDC operated 63 retail and department store locations in Japan. The strength of the going concern and the established locations supported a premium above the fair value of the individual assets. The fair value of assets acquired was $22,351, and liabilities assumed were $20,732. Excess purchase price over fair market value is reported as goodwill. Results of the acquired business are included in the consolidated financial statements from August 1, 2001, onward. Unaudited pro forma information related to this acquisition is not included, as the impact of this transaction was not material to the consolidated results of the Company.

On January 1, 2002, Coach Japan completed the buyout of the distribution rights and assets, related to the Coach business, from J. Osawa and Company, Ltd. (“Osawa”) for $5,792 in cash. At the time of the acquisition, Osawa operated 13 retail and department store locations in Japan. The strength of the going concern and the established locations supported a premium above the fair value of the individual assets. The assets acquired of $5,371 were recorded at estimated fair values as determined by the Company’s management. Goodwill of $421 has been recognized for the excess of the purchase price over the estimate of fair market value of the net assets acquired. Results of the acquired business are included in the consolidated financial statements from January 1, 2002, onward. Unaudited pro forma information related to this acquisition is not included, as the impact of this transaction was not material to the consolidated results of the Company.

As of July 3, 2004, there were 102 Coach locations in Japan, including 77 department store shop-in-shops, three flagship locations, and 10 retail and 10 factory store locations, managed by Coach Japan, as well as two airport locations operated by a distributor.
18. REORGANIZATION COSTS

In March 2002, Coach ceased production at its Lares, Puerto Rico, manufacturing facility. This reorganization involved the termination of 394 manufacturing, warehousing and management employees and the disposition of the fixed assets at the Lares, Puerto Rico, facility. These actions reduced costs by the resulting transfer of production to lower cost third-party manufacturers. Coach recorded reorganization costs of $3,373 in fiscal 2002. The reorganization costs included $2,229 for worker separation costs, $659 for lease termination costs and $485 for the write-down of long-lived assets to net realizable value. The composition of the reorganization reserve, included in accrued liabilities, is set forth in the following table:

<table>
<thead>

<td>$3,373</td>
<td>$(2,689)</td>
<td>$199</td>
</tr>
</tbody>
</table>

19. SHAREHOLDER RIGHTS PLAN

On May 3, 2001, Coach declared a “poison pill” dividend distribution of rights to buy additional common stock, to the holder of each outstanding share of Coach’s common stock.

Subject to limited exceptions, these rights may be exercised if a person or group intentionally acquires 10% or more of the Company’s common stock or announces a tender offer for 10% or more of the common stock on terms not approved by the Coach Board of Directors. In this event, each right would entitle the holder of each share of Coach’s common stock to buy one additional common share of the Company at an exercise price far below the then-current market price. Subject to certain exceptions, Coach’s Board of Directors will be entitled to redeem the rights at $0.001 per right at any time before the close of business on the tenth day following either the public announcement that, or the date on which a majority of Coach’s Board of Directors becomes aware that, a person has acquired 10% or more of the outstanding common stock. As of the end of fiscal 2004, there were no shareholders whose common stock holdings exceeded the 10% threshold established by the rights plan.
20. **SUBSEQUENT EVENT**

On August 12, 2004, the Coach Board of Directors approved a $200,000 increase to the Company’s existing common stock repurchase program and extended the duration of this program through August 2006.

During August 2004, the Company repurchased 2,430 shares of common stock at an average cost of $39.06 per share. These stock repurchases of approximately $95,000 were financed from cash on hand. As of September 4, 2004, Coach had expended approximately $210,000 of the $380,000 authorized to date under the stock repurchase program.

Coach has never declared or paid any cash dividends on its
common stock. Coach currently intends to retain future earn-
ings, if any, for use in its business and is presently not planning
to pay regular cash dividends on its common stock. The Fleet
facility prohibits Coach from paying dividends while the credit
facility is in place, with certain exceptions. Any future determi-
nation to pay cash dividends will be at the discretion of Coach’s
Board of Directors and will be dependent upon Coach’s finan-
cial condition, operating results, capital requirements and such
other factors as the Board of Directors deems relevant.
