Company Profile

Myers Industries, Inc. is an international manufacturer of polymer products for industrial, agricultural, automotive, commercial, and consumer markets. We are an international leader in reusable plastic containers and North America's leading manufacturer of plastic horticultural pots, trays, and flower planters. Other principal product lines include plastic storage and organization containers, plastic storage tanks, molded rubber OEM parts, rubber tire repair products, and custom rubber and plastic products.

The Company is also the largest wholesale distributor of tools, equipment, and supplies for the tire, wheel, and undervehicle service industry in the United States. Our distribution products range from tire balancers and alignment systems to valve caps and other consumable service supplies.

Headquartered in Akron, Ohio, Myers encompasses: 30 manufacturing facilities in North America, South America, and Europe; 37 domestic and four international distribution branches; more than 20,000 products; and nearly 5,300 employees. Myers Industries' stock is traded on the New York Stock Exchange under the symbol MYE.

Actions to Strengthen Our Performance Are Producing Solid Results...

Dear Fellow Shareholders,

It is with great pleasure that I present my first message to you as Myers Industries' president and chief executive officer. In succeeding Stephen Myers, who retired from management last year after a most distinguished career, I am honored to serve at the helm of the corporation that he left with such a solid foundation. As we move forward, I would like to use this letter to address the critical issues of how and where we will grow and discuss the benefits of our competitive strategy.

I am pleased to report that 2005 was a successful year for Myers Industries. We achieved record net sales of \$903.7 million. Of the \$101 million gain in sales versus 2004, approximately \$39.0 million was incremental revenue from acquisitions, \$2.5 million from favorable exchange rates, and the remainder in price/volume improvements. Our top line performance was strong all year except in Europe, where a lackluster economy restrained growth.

Solid top line growth, while critically important, is not the whole story. To create the value our customers and shareholders expect, we must make continuous improvements in our operations that put us on track for sustainable, profitable growth. Last year, we pledged that we would improve performance through better selling prices to offset higher raw material costs; maintain strict cost controls, preserving cost reductions already made and target new areas of opportunity; and embark on other strategic initiatives, both large and small— all to shift our drive for improved profitability into high gear. We took decisive actions on these fronts in 2005, and we finished the year with a record third quarter, our highest fourth quarter earnings in six years, and net income of \$26.6 million for the full year, up three percent compared to 2004. Earnings per share in 2005 was \$0.76, the same as in 2004, as additional shares issued in conjunction with our 2004 acquisition of Pro Cal®, approximately 1.1 million shares, resulted in an approximate increase of three percent in average shares outstanding.

Our stronger performance in 2005 was just the start of what we believe is good momentum for growth. Myers Industries is evolving and becoming more disciplined through five key operating principles

that are central to defining the priorities behind our “Strategic Business Evolution” process:

- 1) Business Growth,
 - 2) Customer Satisfaction,
 - 3) Cost Control,
 - 4) Organizational Development, and
 - 5) Positioning the Business for the Future.
- These are the cornerstones of our business, and by pursuing them we enhance our brand leadership in the markets we serve and position ourselves to deliver greater value to our customers, shareholders, and employees.

Business Growth— The Components of Performance

The components of the Business Growth principle are the nuts and bolts of our operations, including: continuous new product innovation and “solutions” thinking that creates excitement in the marketplace; adding unique value to the products and services we provide— and implementing pricing to recover that value; utilizing the brand strength and cross-selling synergies within our segments to increase market penetration; and determining which strategic customers and markets to develop for the best growth opportunities. In 2005, each of these areas was put to the test and helped to produce the improved results.

- The Distribution Segment had an exceptional year in 2005, with record net sales of \$189.9 million, up 11 percent, and income before taxes a record \$20.6 million, up 19 percent. This performance is rooted in our market-leading product selection and sales coverage to meet the need for tire service equipment and supplies in retail tire dealer markets, as well as commercial, truck, off-road, and auto dealer markets. In addition to our North American operations, last year we established a new distribution facility in Brazil to develop emerging opportunities in its tire service markets. An industry-leading brand, strong customer relationships, and unrivaled capabilities provide an excellent foundation for this segment's continued growth.

- The Material Handling— North America Segment produced net sales of \$209.5 million, up 11 percent, due in large part to our focus on new bulk container systems, expansion into new markets, and

increased conversions to reusable packaging from cardboard. Income before taxes was down 17 percent at \$16.3 million, as our efforts in higher selling prices and operating expense controls were outpaced by higher raw material costs. Among the many successes last year, our Citadel® bulk shipping container made inroads with new liquid transport markets, and our SeedBox™ container continued to deliver new opportunities in the agriculture market. In addition to our Distribution Segment's operations in Brazil, we installed a structural-foam molding line in the same facility to produce select material handling products that are in strong demand for that region. In 2006, we will strengthen initiatives in North American Material Handling to better manage the relationship of raw material costs and product pricing— and we will raise the performance bar in the market to further justify our pricing by delivering to customers the best value in product selection, quality, service, and innovation.

- Economic weakness plagued the markets of our Material Handling— Europe Segment last year, and net sales finished slightly down at \$166.8 million compared to \$167.2 million in 2004. Income before taxes was \$8.3 million, an increase of 40 percent. Our new management team in Europe did an outstanding job of achieving better profitability on a near constant level of sales by strict implementation of price increases to offset raw material costs, significantly lowering operating expenses, and focusing efforts on strategic customers and markets. In 2006, our priorities for Europe are to continue progress in those

Our Buckhorn® SeedBox™ was created for a leading producer of corn and soybean seed to deliver product more efficiently. These containers are in use throughout North America and are providing the "seeds" for expansion in other agricultural markets.

areas, determine where to put our resources, and act on what is most advantageous for our overall growth.

- The Automotive and Custom Segment delivered another year of double-digit sales growth, with net sales up 14 percent at \$195.1 million due to strong demand for our engineered plastic and rubber components in OEM automotive, recreational vehicle, and heavy truck markets. Income before taxes was \$10.0 million, down 24 percent, as our efforts for higher pricing to offset material costs lagged during the first part of the year, which hurt the full year performance. However, income before taxes increased 38 percent during the fourth quarter, as higher pricing took effect along with improved sales volumes and cost controls. For 2006 we will continue to place more emphasis on less volatile markets with the most potential to deliver consistent, profitable growth.

- The Lawn and Garden Segment turned in strong performance in 2005 with net sales rising 44 percent to a record \$170.4 million, which includes \$28.9 million in incremental revenue from acquisitions. Income before taxes in the segment increased 37 percent to a record \$16.4 million. Throughout the grower and retail markets, customer response to our industry-exclusive picturePot®, a printed plant container, put these colorful products in store displays nationwide with a leading home improvement chain— an endeavor for which we see expansion this year. In our decorative resin planters niche, new designs with unique finishes grew business with retailers across North America and positioned us for continued success there in 2006. As the horticultural market remained a strong component of the U.S. economy last year, our unmatched selection of hanging baskets and other plant packaging products met the high demand from North America's professional plant growers and their suppliers. In 2006, we will continue to build on the innovation, customer partnerships, and product pricing management that characterized this segment last year, all of which will enhance the value we bring to customers through the leading brands in our industry.

Customer Satisfaction— Adding True Value

Through the individual efforts of our strong brands, we add value by closely listening to customers and delivering complete solutions when and where they need them. In 2005, that value was found in many areas: investing in a new manufacturing venture

in Brazil to help support a key customer's expansion with a reusable container program; custom-designing plant packaging to help growers launch new and differentiated lines of flowers; bringing material handling solutions to the customers' front doors across North America with a "Roadshow Truck"—a traveling trade show that enables our people to demonstrate our product portfolio in dynamic interaction with customers and offer ideas to make their operations more productive; as well as responding quickly as the single source for supplies and equipment that retail tire dealers needed to expand their businesses and improve their performance. As a result of efforts like these, customers view Myers Industries' brands as sources of reliable, innovative solutions—and as contributors to their success.

We are also strengthening customer relationships by making it easier for customers to do business with us. For example, investments made in new technology and processes allow many of our customers to get product information, place orders, check shipping status of their orders, and review their account information online, anytime. We are also making investments for better internal tracking of products and orders, which will reduce costly errors.

And quality remains a key to value, too. Myers Industries' brands are well known for their hallmark high quality standards that ensure products perform consistently time after time. Without a commitment to quality at all levels of our organization, whether in products or services, neither operational excellence nor sustainable growth would be possible.

In short, satisfied customers are loyal customers, which brings mutually beneficial value and builds a strong foundation for growth.

Cost Control — Managing for Financial Success

Our strict attention to Cost Control produced positive effects throughout 2005, as selling and administrative expenses decreased to 21.2 percent of net sales compared to 23.4 percent of net sales in 2004. Myers Industries' focus in the Cost Control arena is simple: minimize expenses, maximize cash flow—essentially, spend the Company's money as cautiously as we spend our own.

The number one priority is structuring selling prices to match the value that we put into products and services and to recover the raw material input costs. Our primary raw material is plastic resin, mainly

Our exclusive Pro Cal® picturePot® process allows for custom printing and forming of flowerpots with vivid images and information that creates colorful plant packaging for retail displays—and helps consumers plan and plant the perfect garden.

high-density polyethylene (HDPE) and polypropylene, of which we purchase approximately 400 million pounds per year. Last year, resin prices on average were 30 percent higher than in 2004, and we reached historically high prices with increase announcements that were coming out every 15 days through the fall months.

Our customers for the most part understand that we must recover these costs, and in combination with internal productivity and operating expense efforts, we steadily implemented price increases in our business segments last year. We were able to completely offset higher raw material costs in the third quarter and mostly in the fourth quarter. For the full year, we estimate that we recovered approximately 75 percent of the \$48 million increase in raw material costs.

Cost Control also means preserving reductions already made, seeking out new areas to drive down operating costs, and improving efficiency and equipment utilization throughout our businesses. For example, in our Distribution Segment last year we took the opportunity to consolidate two distribution branches into larger, more efficient facilities. We also closed one sales office in Central America and merged its activities into our domestic sales function. These efforts will help with permanent cost reductions as well as more coordinated sales efforts in our Distribution markets outside the U.S. In addition, we closed two manufacturing facilities and transferred their operations to newer, more productive facilities.

Justifying expenditures plays a huge role in Cost Control. We constantly ask ourselves, "What's the return on investment?" before committing funds to any project. In 2005, our capital expenditures were \$26.9 million, allocated to new, high-value products; new manufacturing equipment and facility expansions to improve efficiency; as well as to help fund expansion into what we believe to be high-growth markets.

Another priority is to improve our utilization of working capital. By focusing strict attention to inventory, accounts receivable and payables, and other critical areas, we expect to continue to improve our cash flow in order to reduce debt and invest in our core businesses.

Organizational Development — Quality People

For Organizational Development, we mean having the right people in the right positions, implementing succession planning at all levels, maintaining ongoing professional development, reinforcing employee accountability, and rewarding performance. Our business grows in part because we emphasize each of these areas across our segments.

Last year, one of the biggest changes in our Company was the re-organization of our businesses into the four manufacturing segments and the Distribution Segment. Our businesses continue to operate with the entrepreneurial spirit in which they are all rooted, but one of our primary objectives is to achieve the benefits of synergies presented between our brands to maximize our growth potential. To help accomplish this task, we named managing directors for each segment. These are seasoned managers from within our organization, and they are charged with devising an operating strategy for the respective businesses in their segments. Working with the general managers and their management teams at each business, they are focused on developing new products, maximizing cost controls, determining which customers and markets to emphasize or not emphasize, building greater leadership brands in our markets, plus many of the other day-to-day operational responsibilities. This allows me to work closely with each managing director to create and implement the longer-term strategic direction for our Company.

Myers Industries offers an environment in which employees are empowered to do what they believe is best for the business to reach its goals, and what is right for the customer. Our Strategic Business Evolution process provides a framework for employees to take action and produce improvements. It also provides a framework for a more performance-based organization. Our people at every level are being given information and the tools to better understand their impact on financial performance and how they can collaborate more effectively within their respective businesses and roles to contribute to our success.

Positioning the Business for the Future

And finally, Positioning the Business for the Future encompasses each of the principles set forth in this letter— and more. Combined with the initiatives already in action, to position our business for future growth we will emphasize:

- Continued investments in new technologies and processes to reinforce market strength and capabilities in key business groups;
- Continued investments in emerging growth markets;
- Being the leading innovator of niche, high-margin products;
- Being the low-cost producer of certain commodity products where our brands excel;
- Potential divestiture of businesses with non-strategic products or markets, aligning our resources with the best avenues for long-term, profitable growth potential;
- Selective acquisitions as opportunities arise to enhance our leadership in key markets; and,
- Consolidation and rationalization initiatives to further reduce costs and improve productivity within the Company's manufacturing and distribution footprint.

Our segments and brands are under continuous review for strategic fit and growth potential. This rigorous review process is guided by the five operating principles and is central to our Strategic Business Evolution, which will strengthen our innovation, enhance leadership in the markets we serve, build strong customer relationships, and position us to grow on a sustainable basis.

Taking Stock in the Share Price

Myers Industries' stock opened 2005 at \$12.89 and closed at \$14.58. We believe the price improvement clearly reflects the financial results in 2005 and our execution on initiatives during the year to strengthen our performance.

Our stock's appreciation, an increase of 13.1 percent before dividends last year, compared favorably with the general stock market. This stock improvement outperformed that of the Dow Jones Industrial Average, which declined 0.6 percent; the Nasdaq Composite, which gained 1.4 percent; the Standard & Poor's 500, which increased 3.0 percent;

To help grow their businesses, tire dealers and other vehicle service customers rely on the full-line product selection and nationwide coverage from our Myers Tire Supply® brand—the one-stop-shop for the tire and undervehicle service products.

the Standard & Poor's Small Cap 600, which increased 6.7 percent; and the Russell 2000, which increased 3.3 percent. We are optimistic that the longer-term strategic steps that we are exploring and enacting will strengthen both the Company and the share price to improve returns for our shareholders.

A Word About Financial Stewardship & Compliance

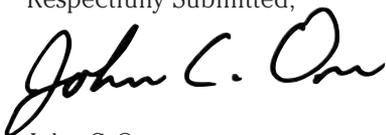

I want to state clearly that Myers Industries takes financial reporting very seriously. From strengthening our internal auditing function to compliance management, we regard financial stewardship as one of our highest priorities. We will remain steadfast in providing the highest level of integrity in our communications with shareholders and the financial markets.

In Closing. . .

Finally, I want to recognize Greg Stodnick, who will retire as CFO this April after 26 years of service to Myers Industries. Greg has been an immeasurable help and support to me during my tenure as COO and now CEO, and I offer him my heartfelt thanks for that and best wishes for his retirement. Transitioning to the CFO position will be Don Merrill, who joined the Company in January. I welcome Don and look forward to his contributions on our management team.

Myers Industries has a clear strategy for growth. Our business fundamentals are very solid and, in fact, have strengthened from early last year through implementation of our strategic programs. There is more work to be done, but I have every reason to believe that our long-term outlook is bright. We thank our nearly 5,300 employees worldwide for their efforts in 2005, and we appreciate the continued confidence of our customers and shareholders.

Respectfully Submitted,

John C. Orr
President and Chief Executive Officer
March 3, 2006

A Tribute to Stephen E. Myers

May 1, 2005 marked the official retirement of a very special employee. For over 37 years of service to our company, Myers Industries is grateful to President, Chief Executive Officer, and Chairman Stephen E. Myers. His guidance, and vision led the Company through a sustained period of success, growth and profitability.

Steve officially began his career with Myers Industries in 1967. Unofficially, since the age of eight, he regularly spent Saturday mornings in the office with his father, Louis Myers, performing tasks centered on the family business.

In 1971 he became president of Akro-Mils and later that year was elected to the Board of Directors of Myers Industries. He was an active member of the management group that orchestrated Myers Industries' successful Initial Public Stock Offering that same year.

The next 25 years generated unprecedented growth for the Company and in Steve's responsibilities. In 1973 he was appointed corporate vice-president and in 1980 president and chief operating officer. In 1984 Steve succeeded his father as chief executive officer. In 2003 Steve was appointed Chairman of the Board of Myers Industries, and in 2005 was appointed Chairman of the Board of Directors, a role that he continues to fill following his retirement from active management.

Stephen Myers' legacy to the company he helped mold is one of growth and profitability. From 1984 through 2004 Myers Industries' net sales grew from \$86.0 to \$803.1 million and net income grew from \$3.8 to \$25.7 million. We grew organically through new product development, increased manufacturing productivity, and expanded distribution. Steve's focus on people, products, and processes led to strategic acquisitions in the United States and Europe that transformed Myers Industries into a global force in plastic reusable material handling products, a leader in plastic horticultural containers, and the largest U.S. distributor of tire service tools, equipment, and supplies. *The employees of Myers Industries offer Steve a hearty well done, and all of our best wishes in his future endeavors.*

Thank You for 25 Years of Growth!

2005 Segment Highlights

Here's a look at how Myers Industries' operations performed in 2005 to fulfill the Company's objective of delivering sustainable, profitable growth. With an extensive range of products and capabilities, Myers Industries' brands enjoy strong positions in many niche markets that afford us

multiple growth platforms. Whether custom designing reusable container and pallet systems or outfitting tire service centers, the people of Myers Industries are focused on delivering exceptional performance that improves value for customers, employees and shareholders.

Material Handling – North America

Myers Industries is North America's leader in reusable plastic packaging and material handling products that replace disposable cardboard boxes and wooden pallets to help companies improve material handling performance and reduce costs.

Brands— Buckhorn® and Akro-Mils™

Key Products— Collapsible Bulk Boxes; Distribution Totes and Pallets; Bakery Trays; Food Processing and Distribution Totes; Custom Container and Pallet Systems; Storage/Organization Bins; Plastic/Metal Transport & Waste Carts.

Markets Overview— Agriculture, Appliance, Automotive, Chemical, Electronics, Food Processing and Distribution, General Industrial, Manufacturing, Retail Distribution.

2005 Highlights—

- Net sales up 11 percent to \$209.5 million; income before taxes down 17 percent at \$16.3 million.
- Record plastic resin costs were partially offset by higher selling prices, improved unit volumes, expense controls, and productivity gains.
- Growth in markets such as agriculture, food, niches of manufacturing, and with industrial catalogers was fueled by new products, line extensions, and customer expansion with reusable material handling systems.
- One manufacturing facility in this segment was closed and its operations moved to a larger, more efficient facility to better serve customers and reduce costs.

Material Handling – Europe

Similar to its North American operations, in Europe Myers Industries boasts the leading brands for selection, service, and quality in reusable packaging and material handling products.

Brands— Allibert-Buckhorn™ and raaco®

Key Products— Bulk Shipping Containers; Distribution Totes and Pallets; Specialty Food Processing and Distribution Totes; Organization Bins; Bulk Storage Tanks.

Markets Overview— Agriculture, Appliance, Automotive, Chemical, Electronics, Fishing, Food Processing Industrial, Manufacturing, Retail Distribution.

2005 Highlights—

- Net sales \$166.8 million, a slight decrease from \$167.2 million in '04; income before taxes up 40 percent at \$8.3 million.
- Higher raw material costs were offset by increased selling prices, strict expense reductions, facility consolidation, and gains in manufacturing efficiencies.
- Sales growth was constrained by a weak European economy, which slowed customers' spending. Expansion was in select niche markets through new products and "solutions" to help customers overcome material handling challenges and improve their productivity and profitability.

Lawn & Garden

Our Lawn and Garden brands present an unrivaled selection of plastic flowerpots, planters, and accessories for the North American horticultural market, from growers to retailers to consumers.

Brands— Dillen®, Listo™, and Pro Cal®

Key Products— Plastic Flowerpots; Nursery Containers, Flats, and Tray Systems; picturePot® Printed Containers; Hanging Baskets; Custom Printed and Labeled Pots for Retail Programs; Decorative Resin Planters.

Markets Overview— Professional Plant Growers, Nurseries, Retail and Wholesale Garden Centers, Lawn and Garden Retailers.

2005 Highlights—

- Record net sales of \$170.4 million, up 44 percent (\$28.9 million from acquisitions); record income before taxes of \$16.4 million, up 37 percent.
- Higher selling prices, unit volumes, and expense controls offset higher raw material costs.
- Sales of both existing and new products were strong in grower markets, where customers were helped to improve efficiency in their operations.
- Our proprietary, custom-printed picturePot® provided a nationwide home improvement center and growers with unique “packaging” for plants, featuring vivid, colorful images and planting instructions printed on the pots to help consumers create beautiful gardens.
- New pottery-like decorative resin planters with innovative designs helped to expand business with leading retailers across North America— while providing consumers with unique products for indoor and outdoor plantings.

Automotive & Custom

With our Automotive and Custom Segment brands, Myers Industries is a top manufacturer of engineered rubber and plastic products serving diverse niche markets and applications.

Brands— Ameri-Kart™, Buckhorn Rubber™, Michigan Rubber™, Patch Rubber™, WEK™

Key Products— Rubber and Plastic HVAC Components, Air Induction Hoses, and Tubing Assemblies; Vibration Isolators; Seals; Plastic Storage Tanks; Tire Repair and Retread Products; Reflective Highway Markings; Custom Rubber.

Markets Overview— OEM Auto, Heavy Truck, RV, Marine, Construction and Agricultural Equipment; Tire Repair; Industrial; Highway Construction.

2005 Highlights—

- Net sales of \$195.1 million, up 14 percent (\$10.1 million from acquisitions); income before taxes of \$10.0 million, down 24 percent.
- Profits for the year were impacted by higher costs for both plastic and rubber raw materials and the later-year timing in which higher prices could be passed to customers.
- Sales growth resulted from strong demand across all major product lines and markets. Manufacturing synergies helped to expand product offerings within the brands and improve penetration in select markets.
- One manufacturing facility in this segment was closed and its operations moved to a more efficient facility to reduce costs.

2005 Segment Highlights

Distribution

In the Distribution Segment, Myers Industries' delivers the value of one-stop-shopping for tire, wheel, and undervehicle service tools, equipment, and supplies— everything that professionals need to service passenger, truck, and off-road tires. With nationwide branches, an unrivaled selection of the highest-quality products, and industry-leading service, our Myers Tire Supply® brand dominates this business in North America.

Brand— Myers Tire Supply®

Key Products— Tire Valves & Accessories; Tire Changing & Balancing Equipment; Lifts & Alignment Equipment; Service Equipment & Tools; Tire Repair & Retread Supplies; Repair Tools & Accessories.

Markets Overview— Independent / Retail Tire Dealers, Commercial Auto and Truck Fleets, Auto Dealers, Truck Tire Dealers, Tire Retreaders, Government Agencies, General Repair Facilities.

2005 Highlights—

- Record net sales of \$189.9 million, up 11 percent; record income before taxes of \$20.6 million, up 19 percent.
- Strong demand for supplies and equipment boosted sales across nearly all major markets.
- Consolidated two distribution branches into larger, more efficient facilities to reduce costs and improve customer service.
- Established a new distribution facility in Brazil to meet the emerging growth opportunities in its tire service markets.

Capabilities & Facilities Overview

Manufacturing Segments

We design, manufacture, and market more than 12,000 polymer products. No other manufacturer in our class can match our combined design, engineering, and production capabilities, which delivers unmatched value for our customers.

Segments:

- Material Handling— North America
- Material Handling— Europe
- Lawn & Garden
- Automotive & Custom

Manufacturing Processes:

- Plastic & Rubber Injection Molding
- Rotational Molding
- Vacuum Forming
- Winding Extrusion
- Co-Extrusion Blow Molding
- Compression Molding
- Rubber Compounding, Calendering & Extrusion
- Rubber-to-Metal Bonding
- Metal Forming
- Metal Powder Coating

Manufacturing Locations:

- North America: 23
- Europe: 6
- South America: 1

Distribution Segment

We buy and sell nearly 10,000 products used by service professionals in tire, wheel, and undervehicle service, providing customers the products they need, when they need them.

Capabilities:

- Unrivaled Product Selection
- Broad Sales Coverage
- Local Sales & Inventory
- International Distribution
- Direct Sales Force— More than 170
- National Accounts Coverage
- Customer Product Training
- New Products "Speed to Market"

Distribution Locations:

- United States: 37 Myers Tire Supply® Branches Nationwide
- Brazil: 1 Regional Branch
- Other International: 4 Affiliates

NYSE Disclosures

In 2005, the Company submitted to the New York Stock Exchange an unqualified Section 12(a) certification by its chief executive officer indicating that he was not aware of any violation by the Company of the NYSE corporate governance listing standards.

In addition, the Form 10-K for the period ended December 31, 2005 filed with the Securities and Exchange Commission contained the Section 302 and 906 certification by the Company's chief executive officer and chief financial officer.

Forward-Looking Statements:

Statements in this report may include "forward-looking" statements, which are indicated by words such as "will," "believe," "anticipate," "expect," "estimate," "intend," "plan," or any variations of these words or similar expressions. Any statement that is not of historical fact may be deemed "forward-looking." These statements involve a number of risks and uncertainties, many outside of the Company's control, that could cause actual results to materially differ from those expressed or implied. Factors include, but are not limited to: changes in the markets for the Company's business segments, unanticipated downturn in business with customers, competitive pressures on sales and pricing, increases in raw material costs, regulatory issues, and deterioration of economic and financial conditions in the United States and around the world. Additional details are provided in the Company's Form 10-K filed with the Securities and Exchange Commission. Myers Industries undertakes no obligation to update or publicly revise any forward-looking statements contained herein.

A Focused, Strategic Business Evolution for Long-Term Sustainable Growth, Emphasizing. . .

- Being the leading innovator of niche, high-margin products;
- Achieving leadership in key product areas through breadth of offering, consistent quality, and superior customer service;
- Concentrating our efforts on niche markets where our capabilities create profit opportunities for our customers and ourselves;
- Leveraging brand equity and capabilities to grow business with existing customers and cultivate new ones;
- Investing in new technologies and processes to reinforce market strength in key business groups;
- Succession plans through our management teams at all levels of the Company, ensuring the right people are in the right positions to grow;
- Selective acquisitions as opportunities arise to enhance our leadership in key markets;
- Potential divestiture of businesses with non-strategic products or markets, aligning our resources for the best long-term, profitable growth potential; and
- Consolidation and rationalization initiatives to reduce costs and improve productivity.

. . .Supported by Strong Fundamentals to Increase Benefits for Our Customers and Our Shareholders:

- Long-Term Approach to Business
- Consistent Quality
- Multiple Growth Platforms
- Diverse Product Offering
- Complementary Acquisitions
- International Reach
- Brand Strength & Market Leadership
- Broad Manufacturing & Distribution Capabilities
- Superior Customer Service
- Product Innovation
