2006 ANNUAL REPORT

Signature Bank, member FDIC, is a full-service commercial bank with 18 private client offices located throughout the metropolitan-N.Y. area. The Bank serves the needs of privately owned businesses, their owners and senior managers. Signature Bank offers a wide variety of business and personal banking products and services, as well as investment, brokerage, asset management and insurance products and services through its subsidiary, Signature Securities Group Corporation, a licensed broker-dealer, investment adviser and member NASD/SIPC.

Financial Highlights

(dollars in thousands)	2001	2002	2003	2004	2005	2006
Total assets	500,884	1,088,812	1,935,984	3,356,548	4,384,938	5,399,425
Total loans	51,632	208,295	377,506	571,013	1,005,153	1,577,618
Total deposits	409,526	895,145	1,572,867	2,580,729	3,487,733	4,211,159
Shareholders' equity	82,221	95,973	153,773	338,919	350,982	392,598
Net interest income after provision for loan losses	3,877	19,247	35,351	63,635	95,832	117,903
Net gain on sales of securities and loans	200	1,976	2,871	11,291	2,373	1,765
Non-interest income	1,816	6,684	11,295	22,924	18,678	21,328
Non-interest income excluding net gains on sales of securities and loans	1,616	4,708	8,424	11,633	16,305	19,563
Non-interest expense	28,454	37,947	43,697	58,482	81,757[1]	81,242
Income (loss) before income taxes	(22,761)	(12,016)	2,949	28,077	32,753	57,989
Operating income (loss) before income taxes[2]	(22,961)	(13,992)	78	16,786	42,380	56,224
Net income (loss)	(22,821)	(12,117)	2,537	29,798	15,869	33,360

(1) Includes a special one-time bonus payment of cash and stock totaling $12.0 million directly contributed by Bank Hapoalim, the Bank's former parent company, which was included in salaries and benefits expense.
(2) Excludes net gains on sales of securities and loans for all years presented and expense of $12.0 million in special bonus paid by Bank Hapoalim in 2005.

To Our Shareholders

The results of 2006 reflect the many successes of the Bank's past as well as the strong potential of our future. Since our inception nearly six years ago, we have established Signature Bank as one of the premier relationship banks for privately owned businesses and their owners throughout the metropolitan-NY area.

From a financial perspective, Signature Bank posted record net income, while also increasing deposits and loans. Of equal importance, we continue to demonstrate our ability to attract, recruit and retain experienced banking professionals—the cornerstone of our growth—and they continue to dedicate their efforts to servicing our valued clients.

What makes Signature Bank's success both remarkable and possible is that we effectively compete with several of the nation's top banks that—on almost any scale such as asset size, deposits, branch network, or number of ATMs—are much larger than Signature Bank. While these mega-banks are formidable opponents with respect to product line and market clout, their continued consolidation, restructuring, big-bank approach and management style have created a significant void of service in the marketplace upon which we are able to capitalize.

Our target market clientele of privately owned businesses, their owners and senior managers are referred to Signature Bank based on the top-notch service provided by our private client teams. Satisfied clients talk about our single-point-of-contact approach. Potential clients frustrated with the retail service of big banks listen. These referrals increase exponentially as we add private client teams to the franchise.

During 2006, the Bank added nine private client banking teams to its network, a notable 25 percent expansion since year-end 2005. Teams join Signature Bank for the same reasons as our clients: **One Contact. One Bank.** Clients want comprehensive financial care and their bankers

> “We have become known as a premier relationship bank in a very competitive marketplace. This is a testament to our banking professionals and their abilities to focus on our business plan.”
>
> —Scott A. Shay,
> *Chairman of the Board*

strive to practice in an environment that enables them to fulfill that requirement.

Financial Review and Highlights

The continued execution of our business plan, which is built upon the successful recruitment of top financial professionals, led to another year of stellar financial performance. Earnings totaled $33.4 million or $1.12 diluted earnings per share for the year, a 110 percent increase over 2005. The growth in net income in 2006 is primarily attributable to a rise in both net interest income, which was fueled by an increase in average interest-earning assets and non-interest income.

Deposits for the year reached $4.21 billion at December 31, 2006, up 21 percent over last year. The overall deposit growth for 2006 represents an increase of $723.4 million when compared with deposits at December 31, 2005. Excluding short-term escrow deposits (which we continue to garner) of approximately $294 million at the end of 2005 and about $550 million at the end of 2006, deposits increased $466.7 million.

Core deposits of $3.9 billion accounted for more than 90 percent of total deposits.

Net interest income for 2006 was $122.0 million, up $22.9 million or 23 percent when compared with the same period last year. The net interest income growth was a result of increases in low-cost core deposits, inflows of short-term escrow deposits and a corresponding increase in interest-earning assets.

Net interest margin for 2006 was 2.80 percent. The expansion in net interest margin in future periods will remain dependent upon our ability to continue to grow core deposits as well as improve the Bank’s loan-to-asset mix.

Persistent efforts put forth by our private client groups and their dedicated senior lenders helped grow the loan portfolio a remarkable 57 percent or $573 million, from $1.01 billion in 2005 to a record $1.58 billion in 2006. Clearly, the initiatives we put in place during the past few years to expand the loan portfolio have benefited the Bank in terms of growth.

One of the largest non-financial highlights of 2006 was the successful completion of the Bank's transition of both non-IT as well as IT-related functions from our former parent company, Bank Hapoalim, to Signature Bank. These functions were moved either in-house or to leading third-party service providers. These conversions occurred without any interruption to our clients and now afford the Bank a more scalable platform, capable of supporting our anticipated growth. We also would like to note that at year-end 2006 Bank Hapoalim no longer owned any SBNY shares.

Expanding the Network

The Bank primarily measures its growth by the number of teams recruited each year. In 2006, we added nine private client banking teams which comprised nearly 40 banking professionals—double that of 2005 and more than any other year since our opening in 2001. The Bank ended the year with 47 teams in place, headed by 59 Group Directors.

We also finished the year with 18 offices, three of which were opened during 2006 in markets where we identified teams with a strong presence in their respective communities. These include 1020 Madison Avenue and 200 Park Avenue South in Manhattan (bringing our total in the borough to seven), and 78-27 37th Avenue in Jackson Heights, Queens. Each of the new offices is located in professional office spaces on higher floors rather than in ground-level retail spaces.

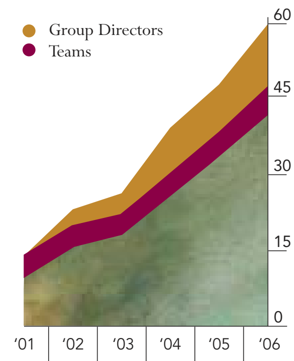
diversify

reaching out to new clients in new markets

In addition to entering new local markets in 2006, we diversified the institutions from which we recruited, adding several new ones to the mix. Each team was selected from leading financial institutions throughout the metro-NY marketplace. The advantage of this diversity is two-fold: first, the Bank is able to reach out to clients in new markets and second, it affords us strengthened reference points for potential new hires.

Our proven ability to recruit banking teams and the effectiveness of our business model have positioned Signature Bank to continue to capitalize on market opportunities. To this point, of the nine teams that joined from six different institutions in 2006, several hailed from organizations that were involved in recent acquisitions. The remainder joined from mega-banks that continue to focus on mass-market retail banking and serving Fortune 500 companies. Generally, these entities have overlooked the needs of privately owned businesses and their executives, the niche to which Signature Bank caters.

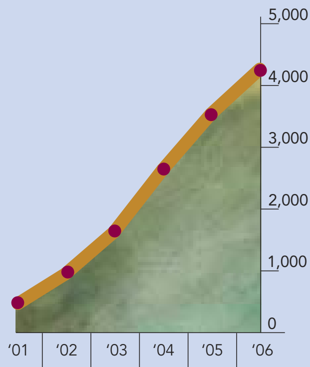
Total Teams and Group Directors



In 2006, Signature Bank successfully recruited more banking teams (9) than any previous year since its inception in 2001. The total number of private client banking teams was 47 headed by 59 Group Directors at December 31, 2006.

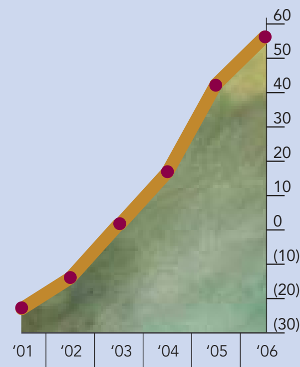
Deposits

(dollars in millions)



Operating Income

(dollars in millions)



Whatever the situation at their former institutions, these bankers believed they could better service their clients through Signature Bank.

To empower our bankers to provide the focus and financial products that our clients deserve—via a single point of contact—each team requires support. Behind the scenes, Signature Bank employs talented teams of support personnel to aid our ongoing growth. We expand the ranks of operational staff and product experts according to need.

An example of a well-executed ramp-up is the 2005 hiring of key lending officers as the demand for commercial loans among newer Signature Bank clients began to increase at a volume greater than previous years. The short-term payoff from this investment is evidenced by the record loan growth these officers and support personnel helped spur in 2006. These, and other newly hired professionals in areas such as commercial lending, trade finance, operations and cash management, will continue to lend support to our bankers.

What Makes Signature Bank Different?

At Signature Bank, our priority is a single-minded focus on the client, and we tackle it from every level, including senior management, support staff and the bankers. We do not segment client relationships across various departments and/or profit centers as do many other institutions. This, and several other structural differences, separate us from the large commercial banks with whom we directly compete. Ultimately our bankers are positioned as the ***One Contact*** and Signature Bank as the ***One Bank*** for meeting all our clients' financial needs.

Another advantage of Signature Bank's organizational structure is its focus. Management, the Board and our employees are dedicated solely to commercial banking and meeting the financial needs of our clients. Signature Bank's senior management team is not distracted by

consistency

recognizing the importance of both client retention and new business generation

"We have streamlined decision making and empowered our teams to succeed, ultimately to the benefit of our clients."

—Joseph J. DePaolo

President & Chief Executive Officer

activities unrelated to its core business. Rather, it is focused on servicing the financial needs of its target market niche—privately owned business, their owners and senior managers.

Signature Bank's compensation model further differentiates it in today's crowded financial services marketplace. At Signature Bank, teams are rewarded through a model that recognizes both client retention as well as the generation of new business. The Signature Bank compensation program is objective and consistent. In fact, it has been utilized by senior management since the Bank's inception. The program exemplifies the organization's values and removes bankers from situations where they may have been asked to attain goals determined by fluctuating mega-bank incentive models.

Our streamlined management structure, where Group Directors and teams report directly to the CEO rather than regional and/or banking sector managers as they would at other institutions, fosters opportunities for quick decision-making and faster processing of client financial requests. Being part of a flat organization also affords Group Directors more time to serve clients rather than reporting to middle managers or regional groups and attending mandatory meetings that distract from what is most important—servicing the client's needs.

The absence of middle management and support areas with short-sighted revenue goals fosters an intimate client relationship with the banker and team. The banker, as the one client contact, remains ultimately responsible for the client's entire experience at Signature Bank.

honoring client referrals with impeccable service

integrity

Robert A. Bloch
Group Director & Senior Vice President

Maria G. Hegi
Senior Lender & Senior Vice President

Our model is working. The best evidence of this claim is not simply our financial successes over the past five years, but also by the way in which our clients discover Signature Bank—by referral. Signature Bank Group Directors know their clients and our clients know their bankers. Consistent client care and resulting referrals eliminate the need for mass-media advertising and/or a network of extensive retail locations. The efficiency and impact of hiring talented bankers and enabling them to succeed is remarkable.

Opportunity

Our ability to continue growing at a rapid pace is primarily predicated upon our continued recruiting success. The market landscape indicates that opportunities for acquiring key bankers remain ripe. Recent consolidations and mergers among larger institutions continue to affect bankers and clients alike as the chaos heightens.

Signature Bank thrives on this market mayhem, which may persist for years after completion of acquisitions and mergers and through the restructuring period.

The impact of the changing marketplace can be even greater when institutions lacking the core competency of commercial banking purchase local and regional banks. Clients and their bankers inevitably experience a drop-off in service as staff is rotated, relationships are redirected to various business units, and the client contacts seem to dissolve into a network of unanswered voice mails. At a minimum, bankers report a loss of autonomy over their client relationships.

Signature Bank offers what the other banks can no longer provide: fast, responsive, dedicated service and a focused and supportive philosophy centered around our bankers' needs, allowing them to do what they do best—deliver unrivaled, personalized service to our clients.

Peter A. Marra
Group Director & Senior Vice President

John D. Gonzalez
Group Director & Senior Vice President

Theresa Mazzella
Cash Management Sales Associate

It is clear that we need to remain consistent in both form and culture, while also continuing to change and evolve with market conditions. We constantly assess the addition of new products, services and reporting tools. For example, in 2006 the Bank took advantage of changes in Check 21 regulations and the subsequent introduction of new technologies. We began offering a novel product entitled Remote Deposit Capture. This is an advancement in check imaging systems whereby clients can scan checks at a desktop reader and transmit them via a secure file to the Bank. While other banks have also begun to offer this technology, the potential for Signature Bank to capitalize on this pioneering tool is greater because it removes an obstacle that affects any bank with a smaller footprint—distance to nearest bank location.

In 2007, we will continue to enhance our clients' banking experiences by capitalizing upon our information technology conversion with the rollout of an updated Internet-based banking platform for both personal and business client use. Additionally, we will be releasing a new edition of our Monogram Business Online utility, which is used by business clients for day-to-day cash management.

Signature Bank added three offices in 2006 to support its growing number of private client banking teams and their clientele. The latest additions to the New York metropolitan-area franchise were in Jackson Heights, Queens and 1020 Madison Avenue and 200 Park Avenue South in Manhattan.

support

channeling all efforts toward client satisfaction

A business and/or personal client at Signature Bank (depicted at right above) receives attention and focus from a single point of contact—the private client group director and his or her team—for all their banking needs.

This graphic compares Signature Bank's single-point-of-contact relationship to that of clients at mega-banks (depicted at left). At mega-banks the continuity of services is hindered by retail structures that force "customers" to deal with separate contacts or business areas for each financial need.

As we reflect on the accomplishments of 2006 and look ahead to 2007, we thank all those who have contributed to the Bank's success. First and foremost, we thank our clients for their business, referrals and trust in our Group Directors. We acknowledge the efforts of all our private client teams and the departments that support them—particularly our information technology division, which led our 2006 conversion. Together, these unrelenting efforts have helped the Bank achieve remarkable growth since its inception in 2001.

We also appreciate the support of our Board of Directors and investors, whose unwavering commitment to the Bank and its growing leadership position in the market, has allowed us to remain focused on enhancing shareholder value and meeting our goals and objectives.

We end the year as one of the top 100 publicly traded banks in the country based on deposits *(SNL Financial)*; one of the most consistent asset gainers by percentage change in the New York market in each of the past four years *(Crain's New York Business)*; and most importantly, the one financial institution that offers clients exactly what they need: ***One Contact. One Bank.***

PRIVATE SECURITIES LITIGATION REFORM ACT SAFE HARBOR STATEMENT

This document and oral statements made from time-to-time by our representatives contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 that are subject to risks and uncertainties. You should not place undue reliance on those statements because they are subject to numerous uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Forward-looking statements include information concerning our possible or assumed future results of operations, including descriptions of our business strategy. These statements often include words such as "may," "believe," "expect," "anticipate," "intend," "plan," "estimate" or similar expressions. These statements are based on assumptions that we have made in light of our experience in the industry as well as our perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances including those related to:

- earnings growth;
- revenue growth;
- deposit growth;
- short-term escrow deposit growth;
- future acquisitions;
- investment performance of investments made by us;
- loan origination volume;
- non-interest income levels, including fees from product sales;
- credit performance on loans made by us;
- tangible capital generation;
- margins on sales or securitizations of loans;
- market share;
- expense levels;
- results from new business initiatives; and,
- other business operations and strategies.

As you read and consider forward-looking statements, you should understand that these statements are not guarantees of performance or results. They involve risks, uncertainties and assumptions. Although we believe that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect our actual financial results or results of operations and could cause actual results to differ materially from those in the forward-looking statements. These factors include but are not limited to:

- prevailing economic conditions;
- changes in interest rates, loan demand, real estate values, and competition, which can materially affect origination levels and gain on sale results in our mortgage business, as well as other aspects of our financial performance;
- the level of defaults, losses and prepayments on loans made by us, whether held in portfolio, sold in the whole loan secondary markets or securitized, which can materially affect charge-off

levels, required credit loss reserve levels and our periodic valuation of our retained interests from securitizations we may engage in;

- changes in accounting principles, policies, and guidelines;
- adverse changes or conditions in capital or financial markets, which can adversely affect our ability to sell or securitize loan originations on a timely basis or at prices which are acceptable to us, as well as other aspects of our financial performance;
- actions by rating agencies and the effects of these actions on our businesses, operations and funding requirements;
- risks and uncertainties related to acquisitions, including related integration and restructuring activities, and changes in our mix of product offerings;
- changes in any applicable law, rule, regulation or practice with respect to tax or legal issues, whether of general applicability or specific to our subsidiaries and us; and
- other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services.

You should keep in mind that any forward-looking statement made by us speaks only as of the date on which we make it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no duty to, and do not intend to, update or revise the forward-looking statements after the date on which they are made. In light of these risks and uncertainties, you should keep in mind that any forward-looking statement made in this document or elsewhere might not reflect actual results.

PART I

ITEM 1. BUSINESS

In this annual report filed on Form 10-K, except where the context otherwise requires, the "Bank," the "Company," "Signature," "we," "us," and "our" refer to Signature Bank and its subsidiaries, including Signature Securities Group Corporation ("Signature Securities").

Introduction

We are a New York-based full-service commercial bank with 18 private client offices located in the New York metropolitan area serving the needs of privately owned business clients and their owners and senior managers. We offer a wide variety of business and personal banking products and services through the bank as well as investment, brokerage, asset management and insurance products and services through our wholly-owned subsidiary, Signature Securities, a licensed broker-dealer and investment adviser. Through Signature Securities, we also purchase, securitize and sell the guaranteed portions of U.S. Small Business Administration (SBA) loans. For financial information by segment see Note 20 of the "Notes to Consolidated Financial Statements," which are contained herein. Signature Bank's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports, Proxy Statement for its Annual Meeting of Stockholders and Annual Report to Stockholders are made available, free of charge, on our website at *www.signatureny.com* as soon as reasonably practicable after such reports have been filed with or furnished to the Federal Deposit Insurance Corporation. You may also obtain any materials that we file with the FDIC at the Federal Deposit Insurance Corporation's offices located at 550 17th Street N.W., Washington, DC 20429.

Since commencing operations in May 2001, we have grown to $5.40 billion in assets, $4.21 billion in deposits, $392.6 million in equity capital and $3.63 billion in other assets under management as of December 31, 2006.

We intend to continue our growth and become a premier relationship-based financial services organization in the New York metropolitan area. This growth will be guided by our Chairman and senior management team who have extensive experience developing, managing and growing financial service organizations. Our Chairman, Scott Shay, has been a Managing Director of Ranieri & Co. Inc. since its formation in 1988. Most of our senior management, including our President and Chief Executive Officer, Joseph DePaolo, and our Vice-Chairman, John Tamberlane, were formerly senior officers of Republic National Bank of New York (Republic National Bank), an institution that successfully employed a deposit gathering strategy and private client focus similar to ours.

Recent Highlights

Transition of Non-Information and Information Technology Services from Bank Hapoalim and Master Services Agreement with Fidelity

Bank Hapoalim B.M. ("Bank Hapoalim"), our former parent company, previously provided us with certain services under an outsourcing agreement between Bank Hapoalim and us. The agreement required us to transition all non-information technology services and all information technology services from Bank Hapoalim to other third parties or internalize them by March 31, 2006 and September 30, 2006, respectively. During the first quarter of 2006, we completed the transition of all non-information technology services from Bank Hapoalim to us or other third-party service providers. These services include legal, accounts payable, internal audit, risk management, human resources and letter of credit processing.

During the third quarter of 2006, we completed our transition of information technology services, including our core banking information technology services, from Bank Hapoalim to Fidelity Information Services, Inc. (“FIS” or “Fidelity”). We believe the migration of these services was seemless to our clients and we believe the FIS platform is more scalable and capable of supporting our anticipated growth.

On September 9, 2005, we entered into a Master Agreement for the Provision of Hardware, Software and/or Services (the “Agreement”) with Fidelity. Under the terms of the agreement, Fidelity provides us with hardware, software and account processing services related to our core banking applications. More particularly, Fidelity provides us with enterprise banking services, core data processing services and managed operations services. Additionally, Fidelity provides us with implementation and training services for the software and hardware provided under the Agreement. The agreement allows us to continue to use our existing core banking applications, which were previously supported by Bank Hapoalim, and are now supported directly by Fidelity.

Core Deposit Growth

From December 31, 2005 through December 31, 2006, our deposits grew $723.4 million, or 20.7%, to $4.21 billion. This amount includes approximately $550.3 million of short-term escrow deposits, which due to their nature and as expected, have been or will be released during the first quarter of 2007. At year end 2005, deposits included $293.6 million of short-term escrow deposits. Excluding these short-term escrows, deposits increased $466.7 million, or 14.6%, for the year. This growth in our core deposits, which is at a cost of funds below industry averages, can be attributed to the addition of new private client groups and additional deposits by our current clients. We primarily focus our deposit gathering efforts in the greater New York metropolitan area market with money center banks, regional banks and community banks as our primary competitors. We distinguish ourselves from competitors by focusing only on our target market. This niche approach, coupled with our relationship-banking model, provides our clients with a personalized service, which we believe gives us a competitive advantage. Our deposit mix has remained favorable, with non-interest-bearing and NOW deposits accounting for 43.9% of our total deposits and time deposits accounting for only 8.5% of our total deposits. Our average cost for total deposits was 2.36% for the year ended December 31, 2006 and 2.59% for the three months ended December 31, 2006.

Escrow Deposit Growth

At December 31, 2006 and 2005, we had approximately $550.3 and $293.6 million, respectively, of short-term escrow deposits. We have developed a core competency in catering to the needs of law firms, accounting firms, and title companies, which allows us to obtain from our clients both on-balance sheet and off-balance sheet short-term escrow deposits that banks of our size typically do not attract.

Strategic Hires

During 2006, we increased our network of seasoned banking professionals with the addition of nine new private client groups and 12 new Group Directors. Our full-time equivalent number of employees grew from 347 to 416 during 2006. This growth is predominantly made up of an increase in private client group personnel, as well as an increase in several strategic personnel and support staff to transition services from Bank Hapoalim to us. In 2006, we completed the transition of several support services, including internal audit and loan processing.

Private Client Groups and Offices

We currently have 47 private banking client groups and 59 Banking Group Directors throughout the New York metropolitan area. With the on-going consolidation of financial institutions in our marketplace and market segmentation by our competitors, we continue to actively recruit experienced private client groups with established client relationships that fit our niche market of privately owned businesses, their owners and their senior managers. Our typical Group Director joins us with 20 years of experience in financial services, a seasoned book of business and an established team of two to four additional professionals to assist with business development and client services. Each additional private client group brings client relationships that allow us to grow our core deposits as well as expand our lending opportunities. We are actively recruiting several additional private client groups that we believe will fit our strategy and enhance our franchise.

To facilitate our growth, we opened three additional private client offices during 2006. These offices are located in Union Square, Manhattan; Upper East Side, Manhattan; and Jackson Heights, Queens. We currently operate 18 private client offices located in the New York metropolitan area. While our strategy does not call for us to have an expansive office presence, we will continue to add offices to meet the needs of the private client groups that we recruit.

Our Business Strategy

We intend to expand our presence as a premier relationship-based financial services organization serving the needs of privately owned business clients, their owners and senior managers in the New York metropolitan area by continuing to:

Focus on our niche market of privately owned businesses, their owners and their senior managers

We focus on our niche market of privately owned businesses, their owners and their senior managers. We generally target closely held commercial clients with revenues of less than $50 million and fewer than 1,000 employees. Our business clients are representative of the New York metropolitan area economy and include real estate owners/operators, real estate management companies, law firms, accounting firms, entertainment business managers, medical professionals, retail establishments, money management firms and not-for-profit philanthropic organizations. We also target the owners and senior management of these businesses who typically have a net worth of between $500,000 and $20 million.

Provide our clients a wide array of high quality banking, brokerage and insurance products and services through our private client group structure and a seamless financial services solution

We offer a broad array of financial products and services with a seamless financial services solution through our private client group structure.

Most of our competitors that sell banking products as well as investment and insurance products do so based on a “silo” approach. In this approach, different sales people from different profit centers within the bank, brokerage firm or insurance company separately offer their particular products to the client. This approach creates client confusion as to who is servicing the relationship. Because no single relationship manager considers all of the needs of a client in the “silo” approach, some products and services may not be presented at all to the client. We market our banking, investment and insurance services seamlessly, thus avoiding the “silo” based approach of many of our competitors in the New York metropolitan area. Our cash management, investment and insurance products and

services are presented to clients by the private client group professional but provided or underwritten by others.

Our business is built around banking and investment private client groups. We believe that our ability to hire and retain top-performing relationship Group Directors is our major competitive advantage. Our Group Directors have the primary responsibility for attracting client relationships and, on an on-going basis, through them and their groups, servicing those relationships. Our Group Directors are experienced financial service professionals who come from the following disciplines: private banking, middle market banking, high-end retail banking, investment and insurance and institutional brokerage. Our Group Directors each have their own private client team (typically two to four professionals) who assists the Group Director in business development and client service.

Recruit experienced, talented and motivated private client Group Directors who are top producers and who believe in our banking model

A key to our success in developing a relationship-based bank is our ability to recruit and retain experienced and motivated financial services professionals. We recruit Group Directors and private client groups who are top performers. While recruitment channels differ and our recruitment efforts are largely opportunistic in nature, the continuing merger and acquisition activity in the New York financial services marketplace provides an opportunity to selectively target and recruit qualified groups. We believe the current market to be a favorable environment for locating and recruiting qualified private client groups. Our experience has been that such displacement and change leads select private client groups to smaller, less bureaucratic organizations.

Offer progressive incentive-based compensation that rewards private client groups for developing their business and retaining their clients

Our private client group variable compensation model adds to the foundation for our relationship based banking discipline. A key part of our strategy for growing our business is the progressive incentive-based compensation that we employ to help us retain our Group Directors while ensuring that they continue to develop their business and retain their clients. Under our private client group variable compensation model, annual bonuses are paid to members of the client relationship team based upon the profit generated from their business.

Maintain a flat organization structure that allows our clients and Group Directors to interface with, and our Group Directors to report directly to, senior management

Another key element of our strategy is our organizational structure. We operate with little middle management and thereby have a flat organizational and reporting structure. This structure allows our Group Directors to interface with, and report directly to, senior management. More importantly, it gives our clients direct access to senior management.

Develop and maintain operations support that is client-centric and service oriented

We have made a significant investment in our infrastructure, including our support staff. We have centralized many of our critical operations, such as finance, information technology, client services, cash management services, loan administration and human resources. Although we have centralized many of our operations, we have located some functions within the private client offices so they are closer to the Group Directors and our clients. For example, most of our private client offices have a senior lender, who is part of our credit group, on location to assist the private client groups with the lending process. In addition, most of our private client offices have an investment Group Director or group that provides brokerage and/or insurance services as necessary. We believe that our existing infrastructure (physical and systems infrastructure, as well as people) can accommodate additional

growth without substantial additional support area personnel or significant spending on technology and operations in the medium term.

Be committed to a sound risk management process while focusing on profitability

Risk management is an important element of our business. We evaluate the inherent risks that affect our business, including interest rate risk, credit risk, operational risk, regulatory risk, and reputation risk. Members of our senior management group have significant experience in risk management. In addition, they have extensive backgrounds in credit, operations, finance and auditing. We have put internal controls in place that help to mitigate the risks that affect our business. In addition, we have policies and procedures that further help mitigate risk and regulatory requirements that mandate that we evaluate, test and opine on the effectiveness of internal controls. No system of internal control or policies and procedures will ever totally eliminate risk. However, we believe that our risk management processes will help keep our risks to a manageable level.

Maintain an appropriate balance between cost control, incentive compensation and business expansion initiatives

We have established an internal approval process for capital and operating expenses. We maintain cost control practices and policies to increase efficiency of operations. A key expense for financial service companies is compensation. Controlling this expense is an important element in keeping overall expenses down. A member of senior management and our President and Chief Executive Officer must approve all new hires. Our Group Directors and their groups receive base salaries and benefits; however, a significant portion of their compensation is variable and based upon the profit generated from the business they create. This structure also helps us control expenses because employees do not receive variable compensation unless revenue is generated. Virtually all expenditures (both current and capital) in excess of certain thresholds must be approved by a member of senior management, and are reviewed and approved by our Purchasing and Capital Expenditures Committee, which includes our Chief Operating Officer and our Chief Financial Officer.

We make extensive use of outsourcing to provide cost-effective operational support with service levels consistent with large-bank operations. We focus on our financial services business and have outsourced many of our key banking and brokerage systems to high quality third-party providers. This has several advantages for an institution like ours, including the ability to cost-effectively utilize the latest technology to better serve, and stay focused on, the needs of our clients. Some of our key outsourcing partners include Fidelity Information Services (the banking systems provider formerly called Alltel Bank Systems Group) and National Financial Services (the brokerage and investments systems division of Fidelity Investments). We maintain management oversight of these providers. Each of these providers was the subject of a due diligence process prior to their selection and continues to be reviewed on an on-going basis.

Historical Development

We were incorporated as a New York State-chartered bank in September 2000, received approval to commence operations from the New York State Banking Department on April 5, 2001, our date of inception, and commenced operations on May 1, 2001. We completed our IPO in March 2004 and a follow-on offering in September 2004. In March 2005, Bank Hapoalim sold its controlling stake in us in a secondary offering. After the offering, Bank Hapoalim beneficially owned 5.7% of our common stock on a fully diluted basis and as of December 31, 2006 Bank Hapoalim no longer owns any shares of our stock. Our common stock has been traded on the Nasdaq National Market under the symbol “SBNY” since our IPO.

Signature Securities is a registered broker-dealer in securities under the Securities Exchange Act of 1934 (the “Exchange Act”) and a member of the National Association of Securities Dealers, Inc. (“NASD”). It formally opened for full business operations on May 1, 2001.

Signature Securities

Signature Securities provides our clients with comprehensive investment, brokerage, wealth management and other non-banking financial products and services. Signature Securities delivers these products and services to its clients through experienced investment Group Directors, located in our private client offices, who work directly with our banking Group Directors to bring these services to clients.

Products and Services

We offer a wide variety of deposit, escrow deposits, credit, cash management, investment and insurance products and services to our clients. At December 31, 2006, we maintained approximately 39,500 deposit accounts, 6,800 investment accounts, 5,300 loan accounts and 8,800 client relationships.

Business Clients

We offer a full range of products and services oriented to the needs of our business clients, including:

- Deposit products such as non-interest-bearing checking accounts, money market accounts and time deposits;
- Escrow deposit services;
- Cash management services;
- Commercial loans and lines of credit for working capital and to finance internal growth, acquisitions and leveraged buyouts;
- Permanent real estate loans;
- Letters of credit;
- Investment products to help better manage idle cash balances, including money market mutual funds and short-term money market instruments;
- Business retirement accounts such as 401(k) plans; and
- Business insurance products, including group health and group life products.

Personal Clients

We offer a full range of products and services oriented to the needs of our high net worth personal clients, including:

- Interest-bearing and non-interest-bearing checking accounts, with optional features such as debit/ATM cards and overdraft protection and, for our top clients, rebates of certain charges, including ATM fees;
- Money market accounts and money market mutual funds;
- Time deposits;
- Personal loans, both secured and unsecured;
- Mortgages, home equity loans and credit card accounts;
- Investment and asset management services; and
- Personal insurance products, including health, life and disability.

Deposit Products

We offer a variety of deposit products to our clients at interest rates that are competitive with other banks. Our business deposit products include commercial checking accounts, escrow deposit accounts, lockbox accounts, cash concentration accounts and other cash management products. Our personal deposit products include checking accounts, money market accounts and time deposits. We also allow our personal and business deposit clients to access their accounts, transfer funds, pay bills and perform other account functions over the Internet and through ATM machines. At December 31, 2006, we maintained approximately 39,500 deposit accounts representing $4.21 billion in total deposits.

The following table sets forth information regarding the mix of our deposits and deposit products as of December 31, 2006 and 2005.

	December 31,			
	2006		*2005*

Lending Activities

Our traditional commercial and industrial lending is generally limited to existing clients with whom we have deposit and/or brokerage relationships in order to assist in monitoring and controlling credit risk. We target our lending to privately owned businesses, their owners and senior managers, generally high net worth individuals who meet our credit standards. The credit standards are set by our Board Credit Committee with the assistance of our Chief Credit Officer, who is charged with ensuring that credit standards are met by loans in our portfolio. In addition, we have implemented a credit authorization policy under which no single individual is authorized to approve a loan regardless of dollar amount. Smaller loans may be approved by concurring authorized officers. Larger loans require the approval of the Board Credit Committee. Our largest loan category requires the approval of

our Board of Directors. Our credit standards for commercial borrowers reference numerous criteria with respect to the borrower, including historical and projected financial information, the strength of management, acceptable collateral and associated advance rates, and market conditions and trends in the borrower's industry. In addition, prospective loans are also analyzed based on current industry concentrations in our loan portfolio to prevent an unacceptable concentration of loans in any particular industry. We believe our credit standards are similar to the standards generally employed by large nationwide banks in the markets we serve. We seek to differentiate ourselves from our competitors by focusing on and aggressively marketing to our core clients and accommodating, to the extent permitted by our credit standards, their individual needs. We generally limit unsecured lending for consumer loans to private banking clients who we believe demonstrate ample net worth, liquidity and repayment capacity.

We generally extend variable rate loans in which the interest rate fluctuates with a predetermined indicator such as the U.S. prime rate or LIBOR. Our use of variable rate loans is designed to reduce our exposure to risks associated with interest rate fluctuations, as the rates of interest earned will generally fluctuate with the rate we pay on our sources of funding. As of December 31, 2006, approximately 68% of our outstanding commercial and commercial real estate loans were variable rate loans.

Commercial Loans

Our commercial loan portfolio, including commercial real estate loans and commercial and industrial loans, is comprised of lines of credit for working capital and term loans to finance equipment, company owned real estate and other business assets. Our lines of credit for working capital generally are renewed on an annual basis and our term loans generally have terms of two to five years. Our lines of credit and term loans typically have floating interest rates. Commercial loans can be subject to risk factors unique to the business of each client. In order to mitigate these risks and better serve our clients, we seek to gain an understanding of the business of each client and the reliability of their cash flow, so that we can place appropriate value on collateral taken and structure the loan to maintain collateral values at appropriate levels. In analyzing credit risk, we generally focus on the business experience of our borrowers' management. We prefer to lend to borrowers with an established track record of loan repayment and predictable growth and cash flow. We also rely on the experience of our bankers and their relationships with our clients to aid our understanding of the client and its business. Our lines of credit typically are limited to a percentage of the value of the assets securing the line. Lines of credit are generally reviewed annually and are typically supported by accounts receivable, inventory and equipment. Depending on the risk profile of the borrower, we may require periodic aging of receivables, as well as borrowing base certificates representing current levels of inventory, equipment, and accounts receivable. Our term loans are typically also secured by the assets of our clients' businesses. Commercial borrowers are required to provide updated personal and corporate financial statements at least annually. At December 31, 2006, funded commercial loans totaled approximately 76% of our total funded loans. Loans extended to borrowers within the services industries include loans to finance working capital and equipment, as well as loans to finance investment and owner-occupied real estate.

The following table sets forth information regarding the distribution of our commercial and commercial real estate loans among select industries in which we had the largest concentration of loans outstanding at December 31, 2006. “Other Industries” include a diverse range of SIC Code industries, many of which are service oriented firms that provide introductions to new client relationships.

Industry by SIC Code Designation

	December 31, 2006	
(dollars in thousands)	**Loan Amount**	**Percentage**
Real Estate & Real Estate Management	$ 242,142	18.89%

Retail	11,902	0.93%
Other Industries	471,600	36.78%
Total	$ 1,281,857	100.00%

Real Estate Loans

Our real estate loan portfolio consists of commercial real estate loans, residential real estate loans and home-equity lines of credit. We also provide temporary financing for commercial and residential property. Our permanent real estate loans generally have fixed terms of five to seven years. We generally avoid longer term loans for commercial real estate held for investment. Our permanent real estate loans have both floating and fixed rates. Depending on the financial situation of the borrower, we may require periodic appraisals of the property to verify the ongoing adequacy of the collateral. At December 31, 2006, funded real estate loans totaled approximately $559.0 million, representing approximately 32.9% of our total funded loans.

Letters of Credit

We issue standby or performance letters of credit, and can service the international needs of our clients through correspondent banks. At December 31, 2006, our commitments under letters of credit totaled approximately $153.2 million.

Personal Loans

Our personal loan portfolio consists of personal lines of credit and loans to acquire personal assets. Our personal lines of credit generally have terms of one year and our term loans generally

have terms of three to five years. Our lines of credit typically have floating interest rates. We generally require assets as collateral for personal loans. However, if the financial situation of the client is sufficient, we will grant unsecured lines of credit. We also examine the personal liquidity of our individual borrowers, in some cases requiring agreements to maintain a minimum level of liquidity, to insure that the borrower has sufficient liquidity to repay the loan. Due to low levels of profitability, interest rate risks and collateral risks, we do not consider secured personal loans, such as automobile loans, a core part of our business.

We occasionally make personal residential real estate loans. Those loans consist primarily of first and second mortgage loans for residential properties. These loans are typically made to high net worth individuals as part of our private client services. We generally do not retain long-term, fixed rate residential real estate loans in our portfolio due to interest rate and collateral risks and low levels of profitability. We do not consider personal residential real estate loans a core part of our business. Our rates are generally higher than the rates offered by other providers of these loans.

We maintain a diversified loan portfolio and do not focus on any particular industry or group of related industries. Credit policies and underwriting guidelines are tailored to address the unique risks associated with each industry represented in the portfolio.

We make loans that are appropriately collateralized under our credit standards. Approximately 84% of our funded loans are secured by collateral. Unsecured loans are typically made to individuals with substantial net worth.

Investment and Asset Management Products and Services

Investment and asset management products and services are provided through our subsidiary, Signature Securities. Signature Securities is a licensed broker-dealer and is a member of the NASD and the SIPC. Signature Securities is an introducing firm and, as such, clears its trades through National Financial Services, Inc., a wholly-owned subsidiary of Fidelity Investments. Signature Securities is also registered as an investment adviser in New York, New Jersey, Pennsylvania and Florida. Our investment Group Directors work with our clients to define objectives, goals and strategies for their investment portfolios, whether our clients are looking for a relationship based provider or are looking for assistance with a particular transaction.

We offer a wide array of asset management and investment products, including the ability to purchase and sell all types of individual securities such as equities, options, fixed income securities, mutual funds and annuities. We offer transactional, "cash management" type brokerage accounts with check writing and daily sweep capabilities. We offer our clients an asset management program whereby we work with our clients to tailor their asset allocation according to their risk profile and then invest the client's assets either directly with a select group of high quality money managers, no load mutual funds or a combination of both. We contract with a third party to perform investment manager due diligence for us on these money managers and mutual funds. We have entered into an agreement and strategic alliance with American Stock Transfer & Trust Company and utilize this firm to provide our corporate and personal clients with trust, custody and estate planning products and services. We offer no proprietary products or services. We do not perform and we do not provide our clients with our own branded investment research. Instead, we have contracted with a number of third-party research providers and are able to provide our clients with traditional Wall Street research from a number of sources.

We also offer retirement products such as individual retirement accounts and administrative services for retirement vehicles such as pension and profit sharing plans to our clients. These products are not proprietary products.

Signature Securities offers wealth management services to our high net worth personal clients. Together with our client and their other professional advisors, including attorneys and certified public accountants, we develop a sophisticated financial plan that can include estate planning, business succession planning, asset protection, investment management, family office advisory services, bill payment, art and collectible advisory services and concentrated stock services.

SBA Loans and Pools

We are an active participant in the SBA loan and SBA pool secondary market by purchasing, securitizing, and selling the guaranteed portions of SBA Section 7(a) loans. Most SBA Section 7(a) loans have adjustable rates and float at a spread to the prime rate and reset monthly or quarterly. SBA loans consist of a guaranteed portion of the loan and an un-guaranteed balance, which typically represents 10% of the original balance that is retained by the originating lender. The guaranteed portions of SBA loans are backed by the full faith and credit of the U.S. government and, therefore, have no credit risk and carry a 0% risk weight for capital purposes. At December 31, 2006, we had $125.0 million in SBA loans held for sale compared to $138.3 million at December 31, 2005.

Signature Securities acts as an agent and as a consultant to us on the purchase, sale and assembly of SBA loans and pools. Signature Securities is one of the largest SBA pool assemblers in the United States. The primary business of the group is to be an active market maker in the SBA loan and pool secondary market by purchasing, securitizing and selling the government guaranteed portions of the SBA loans. Signature Bank is approved by the SBA as a pool assembler and is approved by the FDIC to engage in government securities dealer activities.

We purchase the guaranteed portion of SBA loans from various SBA lender clients. Once purchased, we typically warehouse the guaranteed loan for approximately 30 to 180 days. From this warehouse, we aggregate like SBA loans by similar characteristics into pools for securitization to the secondary market. In order to meet the SBA's rate requirement, we may strip excess servicing from loans with different coupons to create a pool at a common rate. This has resulted in the creation of two assets: a par pool and excess servicing strips. Excess servicing represents the portion of the coupon stripped from a loan.

Colson Services Corp. is the government appointed fiscal and transfer agent for the SBA's Secondary Market Program. As the designated servicer, it provides transaction processing, record keeping and loan servicing functions, including document review and custody, payment collection and disbursement, and data collection and exchange for us.

Insurance Services

We offer our business and private clients a wide array of individual and group insurance products, including health, life, disability and long-term care insurance products through our subsidiary, Signature Securities. We do not underwrite insurance policies. We only act as agent in offering insurance products and services underwritten by insurers that we believe are the best for our clients in each category.

Competition

Competition among financial institutions in the New York metropolitan area is intense and growing. We compete with bank holding companies, national and state-chartered banks, savings and loan associations, consumer finance companies, credit unions, securities brokerage firms, insurance companies, mortgage banking companies, money market mutual funds, asset-based non-bank lenders and other financial institutions. Many of these competitors have substantially greater financial resources, lending limits and larger office networks than we do and are able to offer a broader range of

products and services than we can. Failure to compete effectively for deposit, loan and other banking clients in our markets could cause us to lose market share, slow our growth rate and may have an adverse effect on our financial condition and results of operations.

The New York Market

Substantially all of our business is located in the New York metropolitan area. We believe the New York metropolitan area economy presents an attractive opportunity to build an independent financial services company oriented to the needs of the New York metropolitan area economic marketplace. The New York Metropolitan Statistical Area (or MSA) is, by far, the largest market in the United States for bank deposits. The MSA of New York, Long Island and Northern New Jersey is—with approximately $861 billion in total deposits, as of June 30, 2006—almost three times larger than the second largest MSA in the U.S. (Los Angeles, Long Beach and Santa Ana, California). The New York MSA is also home to the largest number of businesses with fewer than 500 employees in the nation, while the Nassau/Suffolk Counties market ranks ninth according to 2001 census bureau statistics. The economy of the New York metropolitan area has diversified substantially over the past several decades and includes a greater variety of industries such as services, technology and real estate. The New York metropolitan area financial services marketplace is served by many large, diverse financial services companies, including large, multi-national financial services companies, regional banks and brokerage firms, mid-size commercial banks and brokerage firms and mutual and stock savings banks.

As of December 31, 2006, we operated 18 private client offices located mostly in the New York metropolitan area. Those 18 locations housed a total of 47 private client groups. As part of the continuing development of our business strategy, we expect to open additional offices in 2007. We believe these private client offices will allow us to expand our current operations in the New York metropolitan area.

Information Technology and System Security

We rely on industry leading technology companies to deliver software, support and disaster recovery services. Our core banking application software (DDA, Savings, Compliance, GL, Teller Internet Banking) is provided by Fidelity Information Services (formerly Alltel, Inc.). All brokerage systems are provided by and run at our clearing firm, National Financial Services, a subsidiary of Fidelity Financial Services Corp. Our personnel connect to the system via both dedicated and Internet based connections to Fidelity Financial Services in Boston, Massachusetts.

In 2006, we migrated our information technology environment from New York to Fidelity Information Services' technology center in Little Rock, Arkansas. This technology center includes dedicated "lights out" computer raised-floor space, as well as designated office space for information technology support personnel. A combination of backup power generation, uninterruptible power systems and 24 hour a day monitoring of the facility perimeters, hardware, operating system software, network connectivity, and building environmental systems minimizes the risk of any serious outage or security breach.

Employees

As of December 31, 2006, we had 416 full-time employee equivalents, 269 of whom are officers. None of our employees is represented by a collective bargaining agreement, and we consider our relations with our employees to be good.

Regulation and Supervision

As a state-chartered bank, the deposits of which are insured by the FDIC, we and our subsidiaries are subject to a comprehensive system of bank supervision administered by federal and state banking agencies. Because we are chartered under the laws of the State of New York, the New York State Banking Department is our primary regulator. The FDIC is our primary federal banking regulator because we are not a member of the Federal Reserve System. These regulators oversee our compliance with applicable federal and New York laws and regulations governing our activities, operations, and business.

The primary purpose of the U.S. system of bank supervision is to ensure the safety and soundness of banks in order to protect depositors, the FDIC insurance fund, and the financial system generally. It is not primarily intended to protect the interest of shareholders. Thus, if we were to violate banking law and regulations, including engaging in unsafe or unsound practices, we could be subject to enforcement actions and other sanctions that could be detrimental to shareholders.

Safety and Soundness Regulation

New York law governs our authority to engage in deposit-taking, lending, investing, and other activities. New York law also imposes restrictions intended to ensure our safety and soundness, including limitations on the amount of money we can lend to a single borrower (generally, 15% of capital; 25% if the loan is secured by certain types of collateral), prohibitions on engaging in activities such as investing in equity securities or non-financial commodities, and prohibitions on making loans secured by our own capital stock.

Our ability to engage in transactions with our affiliates is limited by sections 23A and 23B of the Federal Reserve Act, as implemented by the Federal Reserve's Regulation W. These provisions do not apply to our transactions with our subsidiary, Signature Securities, because Signature Securities is not an "affiliate" as that term is defined by Regulation W. Regulation W requires that transactions between us and our affiliates be on terms and under circumstances that are at least as favorable to us as those prevailing at the time for comparable transactions between non-affiliates. Regulation W also imposes quantitative and qualitative limits and collateral requirements on certain transactions between us and our affiliates.

We are also subject to comprehensive capital adequacy requirements intended to protect against losses that we may incur. FDIC regulations require that we maintain a minimum ratio of qualifying total capital to total risk-weighted assets (including off-balance sheet items) of 8.0%, at least one-half of which must be in the form of Tier 1 capital, and a ratio of Tier 1 capital to total risk-weighted assets of 4.0%. Tier 1 capital is generally defined as the sum of core capital elements less goodwill and certain other deductions. Core capital includes common shareholders' equity, non-cumulative perpetual preferred stock, and minority interests in equity accounts of consolidated subsidiaries. Supplementary capital, which qualifies as Tier 2 capital and counts towards total capital subject to certain limits, includes allowances for loan losses, perpetual preferred stock, subordinated debt, and certain hybrid instruments. At December 31, 2006, our total risk-based capital ratio was 16.73%, and our Tier 1 risk-based capital ratio was 16.18%.

We are also required to maintain a minimum leverage capital ratio—the ratio of Tier 1 capital (net of intangibles) to adjusted total assets. Banks that have received the highest rating of five categories used by regulators to rate banks and are not anticipating or experiencing any significant growth must maintain a leverage capital ratio of at least 3.0%. All other institutions must maintain a leverage capital ratio of 4.0%. In addition to these minimum leverage capital ratio guidelines, as a condition of granting deposit insurance, the FDIC required us to maintain, and we maintained, a leverage capital ratio of at

least 8.0% for the first three years of our operation (i.e., until April 30, 2004). At December 31, 2006, our leverage capital ratio was 8.41%.

In addition, payments of dividends may be subject to the prior approval by the New York State Banking Department and the FDIC. Under New York law, we are prohibited from declaring a dividend so long as there is any impairment of our capital stock. In addition, we would be required to obtain the approval of the New York State Banking Department if the total of all our dividends declared in any calendar year would exceed the total of our net profits for that year combined with retained net profits of the preceding two years, less any required transfer to surplus or a fund for the retirement of any preferred stock. We would also be required to obtain the approval of the FDIC prior to declaring a dividend if after paying the dividend we would be undercapitalized, significantly undercapitalized, or critically undercapitalized.

The federal banking regulators are currently working on significant revisions to the capital adequacy regulations to implement the new capital accord being drafted by the Basel Committee on Bank Supervision. We cannot at this time predict whether the new requirements will apply to us or the effect that they may have on our business. However, if the new capital adequacy regulations were to lower the capital requirements for large money center banks but not for smaller banks like Signature Bank, we could be put at a competitive disadvantage.

The federal banking agencies have also adopted guidelines establishing safety and soundness standards for all insured depository institutions. The safety and soundness guidelines relate to our internal controls, information systems, internal audit systems, loan underwriting and documentation, compensation, and interest rate exposure. The standards assist the federal banking agencies with early identification and resolution of problems at insured depository institutions. If we were to fail to meet these standards, the FDIC could require us to submit a compliance plan and take enforcement action if an acceptable compliance plan were not submitted.

Prompt Corrective Action and Enforcement Powers

We are also subject to FDIC regulations which apply to every FDIC-insured commercial bank and thrift institution a system of mandatory and discretionary supervisory actions, and which generally become more severe as the capital levels of an individual institution decline. The regulations establish five capital categories for purposes of determining our treatment under these prompt corrective action provisions.

We would be categorized as “well capitalized” under the regulations if (i) we have a total risk-based capital ratio of at least 10.0%; (ii) we have a Tier 1 risk-based capital ratio of at least 6.0%; (iii) we have a leverage capital ratio of at least 5.0%; and (iv) we are not subject to any written agreement, order, capital directive, or prompt corrective action directive issued by the FDIC to meet and maintain a specific capital level.

We would be categorized as “adequately capitalized” if (i) we have a total risk-based capital ratio of at least 8.0%; (ii) we have a Tier 1 risk-based capital ratio of at least 4.0%; and (iii) we have a leverage capital ratio of at least 4.0% (3.0% if we are rated in the highest supervisory category).

We would be categorized as “undercapitalized” if (i) we have a total risk-based capital ratio that is less than 8.0%; (ii) we have a Tier 1 risk-based capital ratio that is less than 4.0%; and (iii) we have a leverage capital ratio that is less than 4.0% (3.0% if we are rated in the highest supervisory category).

We would be categorized as “significantly undercapitalized” if (i) we have a total risk-based capital ratio that is less than 6.0%; (ii) we have a Tier 1 risk-based capital ratio that is less than 3.0%; and (iii) we have a leverage capital ratio that is less than 3.0%.

We would be categorized as “critically undercapitalized” and subject to provisions mandating appointment of a conservator or receiver if we have a ratio of “tangible equity” to total assets that is 2.0% or less. “Tangible equity” generally includes core capital plus cumulative perpetual preferred stock.

At December 31, 2006, our total risk-based capital ratio was 16.73%; our Tier 1 risk-based capital ratio was 16.18%; and our leverage capital ratio was 8.41%. Each of these ratios exceeds the minimum ratio established for a “well capitalized” institution.

In addition to measures taken under the prompt corrective action provisions, insured banks may be subject to potential actions by the federal regulators for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation or any condition imposed in writing by the agency or any written agreement with the agency. Enforcement actions may include the issuance of cease and desist orders, the imposition of civil money penalties, the issuance of directives to increase capital, formal and informal agreements, or removal and prohibition orders against “institution-affiliated” parties, and termination of insurance of deposits. The New York State Banking Department also has broad powers to enforce compliance with New York laws and regulations. The New York State Banking Department and/or the FDIC examine us periodically for safety and soundness and for compliance with applicable laws.

Other Regulatory Requirements

We are subject to certain requirements and reporting obligations under the Community Reinvestment Act (CRA). The CRA generally requires federal banking agencies to evaluate the record of a financial institution in meeting the credit needs of its local communities, including low- and moderate-income neighborhoods. The CRA further requires the agencies to take into account our record of meeting community credit needs when evaluating applications for, among other things, new branches or mergers. The performance standards and examination frequency of CRA evaluations differ depending on whether a bank falls into the small or large bank categories. During 2006, we were evaluated under the large bank standards for the first time. In measuring our compliance with these CRA obligations, the regulators rely on a performance-based evaluation system that bases our CRA rating on our actual lending service and investment performance. In connection with its assessment of CRA performance, the FDIC assigns a rating of “outstanding,” “satisfactory,” “needs to improve,” or “substantial noncompliance.” We were last examined for CRA compliance by the FDIC as of April 17, 2006 and by the New York State Banking Department as of December 31, 2005. We received a “satisfactory” CRA Assessment Rating from both agencies.

Federal and state banking laws also require us to take steps to protect consumers. The bank regulatory agencies are increasingly focusing attention on compliance with consumer protection laws and regulations. These laws include disclosures regarding truth in lending, truth in savings, funds availability, privacy protection under the Gramm-Leach-Bliley Act of 1999, and prohibitions on discrimination in the provision of banking services. We have incurred and may in the future incur additional costs in complying with these requirements.

We must also comply with the anti-money laundering provisions of the Bank Secrecy Act, as amended by the USA PATRIOT Act, and implementing regulations issued by the FDIC and the U.S. Department of the Treasury. As a result, we must obtain and maintain certain records when opening accounts, monitor account activity for suspicious transactions, impose a heightened level of review on private banking accounts opened by non-U.S. persons and, when necessary, make certain reports to law enforcement or regulatory officials that are designed to assist in the detection and prevention of money laundering and terrorist financing activities. To this end, we are also required to implement an anti-money laundering compliance program that includes policies, procedures, and internal controls;

the appointment of an anti-money laundering compliance officer; an internal training program; and internal audits.

Under FDIC regulations, we are required to pay premiums to the Bank Insurance Fund for insurance of our deposit accounts. The FDIC utilizes a risk-based premium system in which an institution pays premiums for deposit insurance on its Bank Insurance Fund-insured deposits based on supervisory evaluations and on the institution's capital category under the FDIC's prompt corrective action regulations.

We must maintain reserves on transaction accounts. The maintenance of reserves increases our cost of funds because reserves must generally be maintained in cash or non-interest-bearing balances maintained directly or indirectly with a Federal Reserve Bank.

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 regulates interstate banking activities by establishing a framework for nationwide interstate banking and branching. This interstate banking and branching authority generally permits a bank in one state to merge with a bank in another unless the state prohibits all out-of-state banks from doing so and permits a bank in one state to establish *de novo* branches in another state in which it does not maintain a branch, if that state expressly permits all out-of-state banks to establish branches.

The Gramm-Leach-Bliley Act of 1999 eliminated most of the barriers to affiliations among banks, securities firms, insurance companies, and other financial companies previously imposed under federal banking laws if certain criteria are satisfied. Certain subsidiaries of well-capitalized and well-managed banks may be treated as "financial subsidiaries," which are generally permitted to engage in activities that are financial in nature, including securities underwriting, dealing, and market making; sponsoring mutual funds and investment companies; and activities that the Federal Reserve has determined to be closely related to banking.

Signature Securities is registered as a broker-dealer with and subject to supervision by the SEC. The SEC is the federal agency primarily responsible for the regulation of broker-dealers. Signature Securities is also subject to regulation by one of the brokerage industry's self-regulatory organizations, the NASD. As a registered broker-dealer, Signature Securities is subject to the SEC's uniform net capital rule. The purpose of the net capital rule is to require broker-dealers to have at all times enough liquid assets to satisfy promptly the claims of clients if the broker-dealer goes out of business. If Signature Securities fails to maintain the required net capital, the SEC and NASD may impose regulatory sanctions including suspension or revocation of its broker-dealer license. A change in the net capital rules, the imposition of new rules, or any unusually large charge against Signature Securities' net capital could limit its operations. As a subsidiary of Signature Bank, Signature Securities is also subject to regulation and supervision by the New York State Banking Department. Signature Securities currently is permitted to act as a broker and as a dealer in certain bank eligible securities.

Signature Securities is also subject to state insurance regulation. In July 2004, Signature Securities received approval from the New York State Banking Department and the New York State Department of Insurance to act as an agent in the sale of insurance products. Signature Securities' insurance activities are subject to extensive regulation under the laws of the various states where its clients are located. The applicable laws and regulations vary from state to state, and, in every state of the United States, an insurance broker or agent is required to have a license from that state. These licenses may be denied or revoked by the appropriate governmental agency for various reasons, including the violation of state regulations and conviction for crimes.

Change in Control

The approval of the New York State Banking Board is required before any person may acquire "control" of a banking institution, which includes Signature Bank and any company controlling Signature Bank. "Control" is defined to mean the possession, directly or indirectly, of the power to direct or cause the direction of management and policies of a banking institution through ownership of stock or otherwise and is presumed to exist if, among other things, any company owns, controls, or holds the power to vote 10% or more of the voting stock of a banking institution. As a result, any person or company that seeks to acquire 10% or more of our outstanding common stock must obtain prior regulatory approval.

In addition to the New York requirements, the Bank Holding Company Act prohibits a company from, directly or indirectly, acquiring 25% or more (5% if the acquirer is a bank holding company) of any class of our voting stock or obtaining the ability to control in any manner the election of a majority of our directors or otherwise directing the management or policies of our company without prior application to and the approval of the Federal Reserve. Moreover, under the Change in Bank Control Act, any individual who intends to acquire 10% or more of any class of our voting stock or otherwise obtain control over us could be required to provide prior notice to and obtain the non-objection of the FDIC.

ITEM 1A. RISK FACTORS

If any of the following risks actually occur, our business, financial condition or operating results could be materially adversely affected. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. As a result, we cannot predict every risk factor, nor can we assess the impact of all of the risk factors on our businesses or to the extent to which any factor, or combination of factors, may impact our financial condition and results of operation. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations.

Risks Relating to Our Business

We may be unable to successfully implement our business strategy.

We intend to continue to aggressively pursue our strategy for growth. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in significant growth stages of development. In order to execute our business strategy successfully, we must, among other things:

- identify and expand into suitable markets;
- build our client base;
- maintain credit quality;
- attract and retain qualified bank management in each of our targeted markets;
- properly manage risks of all kinds, including operational risks, credit risks and interest rate risks;
- attract sufficient core deposits to fund our anticipated loan growth;
- identify and pursue suitable opportunities for opening new banking locations; and
- maintain sufficient capital to satisfy regulatory requirements.

Failure to manage our growth effectively could have a material adverse effect on our business, future prospects, financial condition or results of operations and could adversely affect our ability to successfully implement our business strategy.

Provisions in our charter documents may delay or prevent our acquisition by a third party.

Our restated Certificate of Organization and By-laws contain provisions that may make it more difficult for a third party to acquire control of us without the approval of our Board of Directors. For example, our Organization Certificate authorizes our Board of Directors to determine the rights, preferences, privileges and restrictions of unissued series of common stock and preferred stock, without any vote or action by our stockholders. As a result, our Board of Directors can authorize and issue shares of preferred stock with voting or conversion rights that could adversely affect the voting or other rights of holders of our common stock. Additionally, our By-laws contain provisions that separate our Board of Directors into three separate classes with staggered terms of office and provisions that restrict the ability of shareholders to take action without a meeting. These provisions could delay, prevent or deter a merger, acquisition, tender offer, proxy contest or other transaction that might otherwise result in our stockholders receiving a premium over the market price for their common stock.

There are substantial regulatory limitations on changes of control.

Federal law prohibits a company or a group of persons deemed to be "acting in concert" from, directly or indirectly, acquiring 25% or more (5% if the acquirer is a bank holding company) of any class of our voting stock or obtaining the ability to control in any manner the election of a majority of our directors or otherwise to direct the management or policies of our company without prior application to and the approval of the Federal Reserve. Moreover, any individual who acquires 10% or more of our voting stock or otherwise obtains control over Signature Bank would be required to notify, and could be required to obtain the non-objection of, the FDIC. Finally, any person acquiring 10% or more of our voting stock would be required to obtain approval of the New York State Banking Department. Accordingly, prospective investors need to be aware of and comply with these requirements, if applicable, in connection with any purchase of shares of our common stock. This may effectively reduce the number of investors who might be interested in investing in our stock.

We may not be able to raise the additional funding needed for our operations.

If we are unable to generate profits on a consistent basis, we may need to arrange for additional financing to support our business. We cannot assure you that we would be able to obtain such additional financing on commercially reasonable terms or at all. Prior to our IPO in March 2004, Bank Hapoalim provided us with all of the capital necessary to fund our operations and satisfy our regulatory requirements. Our failure to obtain sufficient financing could have a material adverse effect on our growth, our ability to compete effectively and on our financial condition and results of operations.

We rely extensively on outsourcing to provide cost-effective operational support.

We make extensive use of outsourcing to provide cost-effective operational support with service levels consistent with large bank operations, including key banking, brokerage and insurance systems. For example, under the clearing agreement Signature Securities has entered into with National Financial Services (a Fidelity Investments company), National Financial Services processes all securities transactions for the account of Signature Securities and the accounts of its clients. Services of the clearing firm include billing and credit extension and control, receipt, custody and delivery of securities. Signature Securities is dependent on the ability of its clearing firm to process securities transactions in an orderly fashion. In addition, Fidelity Information Services (formerly Alltel, Inc.) provides us with all our core banking applications. Our outsourcing agreements can generally be terminated by either party upon notice. The termination of some of our outsourcing agreements, including the agreements with National Financial Services and Fidelity Information Services, could result in a disruption of service that could have a material adverse effect on our financial condition.

We have a limited operating history.

We did not commence significant operations until May 2001. Therefore, we have a limited historical basis for gauging our business performance under normalized operations. Our prospects are subject to the risks and uncertainties frequently encountered by financial services firms in their early stages of development, including the risk that we will not be able to implement our business plan or that our business plan will prove to be unprofitable. Accordingly, our financial performance to date may not be representative of our long-term future performance or indicative of whether our business strategy will be successful.

Our operations are significantly affected by interest rate levels and we are especially vulnerable to changes in interest rates.

We incur interest rate risk. Our income and cash flows and the value of our assets depend to a great extent on the difference between the interest rates we earn on interest-earning assets, such as loans and investment securities, and the interest rates we pay on interest-bearing liabilities such as deposits and borrowings. These rates are highly sensitive to many factors which are beyond our

control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System, which we refer to as the Federal Reserve. Changes in monetary policy, including changes in interest rates, will influence not only the interest we receive on our loans and investment securities and the amount of interest we pay on deposits, it will also affect our ability to originate loans and obtain deposits and our costs in doing so.

If the rate of interest we pay on our deposits and other borrowings increases more than the rate of interest we earn on our loans and other investments, our net interest income and, therefore, our earnings could be materially adversely affected. Our earnings could also be materially adversely affected if the rates on our loans and other investments fall more quickly than those on our deposits and other borrowings. Furthermore, an increase in interest rates may negatively affect the market value of our investment portfolio. Our fixed-rate securities, generally, are more negatively affected by these increases. A reduction in the market value of our portfolio will increase the unrealized loss position of our available-for-sale investments. Any of these events could materially adversely affect our results of operations or financial condition.

We primarily invest in mortgage-backed obligations, which may lead to volatility in cash flow and market risk.

Our investment portfolio largely consists of mortgage-backed securities primarily secured by pools of mortgages on single-family residences. When we acquire the mortgage-backed security, we anticipate that the underlying mortgages will prepay at a projected rate, thereby generating an expected yield. Prepayment rates generally increase as interest rates fall and decrease when rates rise, but changes in prepayment rates are difficult to predict. Many of our mortgage-backed securities have a higher interest rate than prevailing market rates, resulting in a premium purchase price. In accordance with accounting rules, we amortize the premium over the expected life of the mortgage-backed security. If the mortgage loans securing the mortgage-backed security prepay more rapidly than anticipated, we would have to amortize the premium on an accelerated basis, which would thereby adversely affect our profitability.

We are dependent upon key personnel.

Our success depends to a significant extent upon the performance of certain key executive officers and employees, the loss of whom could have a material adverse effect on our business. Our key executive officers and employees include our Chairman, Scott Shay, our President and Chief Executive Officer, Joseph DePaolo, and our Vice-Chairman, John Tamberlane. Although we have entered into agreements with Messrs. Shay and DePaolo, we generally do not have employment agreements with our key personnel. We adopted an equity incentive plan and a change of control plan for key personnel in connection with the consummation of our IPO. We cannot assure you that we will be successful in retaining any of our key executive officers and employees.

Our business is built around Group Directors, who are principally responsible for our client relationships. A principal component of our strategy is to increase market penetration by recruiting and retaining experienced Group Directors, their groups, loan officers and other management professionals.

Competition for experienced personnel within the commercial banking, brokerage and insurance industries is strong and we may not be successful in attracting and retaining the personnel we require. We cannot assure you that our recruiting efforts will be successful or that they will enhance our business, results of operations or financial condition.

Our Group Directors may leave us at any time for any reason. They are not under contractual restrictions to remain with us and would not be bound by non-competition agreements or non-solicitation agreements if they were to leave us. If even a small number of our key Group Directors

were to leave, our business could be materially adversely affected. We cannot assure you that such losses of Group Directors or other professionals will not occur.

Our SBA division is also dependent upon relationships our SBA professionals have developed with clients from whom we purchase loans and upon relationships with investors in pooled securities. The loss of a key member of our SBA division team may lead to the loss of existing clients. We cannot assure you that we will be able to recruit qualified replacements with a comparable level of expertise and relationship base.

We may not be able to acquire suitable client relationship groups or manage our growth.

A principal component of our growth strategy is to increase market penetration and product diversification by recruiting Group Directors and their groups. However, we believe that there are a limited number of potential Group Directors and groups that will meet our development strategy and other recruiting criteria. As a result, we cannot assure you that we will identify potential Group Directors and groups that will contribute to our growth. Even if suitable candidates are identified, we cannot assure you that we will be successful in attracting them, as they may opt instead to join our competitors.

Even if we are successful in attracting these Group Directors and groups, we cannot assure you that they will be able to bring their entire book of business to us. Furthermore, the addition of new groups involves several risks including risks relating to the quality of the book of business that may be contributed, adverse personnel relations and loss of clients because of a change of institutional identity. In addition, the process of integrating new groups could divert management time and resources from attention to existing clients. We cannot assure you that we will be able to successfully integrate any new group that we may acquire or that any new group that we acquire will enhance our business, results of operations, cash flows or financial condition.

There are material risks involved in commercial lending that could adversely affect our business.

Commercial lending (excluding U.S. government guaranteed SBA balances held for sale) represented approximately 76% of our total lending activities as of December 31, 2006 and primarily consists of loans to our privately owned business clients, their owners and their senior managers, our key target market. Commercial loans generally involve a higher degree of credit risk than residential mortgage loans due, in part, to their larger average size and generally less readily-marketable collateral. In addition, unlike residential mortgage loans, commercial loans generally depend on the cash flow of the borrower's business to service the debt. Furthermore, a significant portion of our loans depend for repayment largely on the liquidation of assets securing the loan, such as inventory and accounts receivable. These loans carry incrementally higher risk, because their repayment is often dependent solely on the financial performance of the borrower's business. Adverse economic conditions or other factors adversely affecting our target market segment may have a greater adverse effect on us than on other financial institutions that have a more diversified client base. Our business plan calls for continued efforts to increase our assets invested in commercial loans. For all of these reasons, even a small increase in non-performing commercial loans could result in operating losses, impaired liquidity and the erosion of our capital, and could have a material adverse effect on our financial condition and results of operations.

Our business and a large portion of our real estate collateral is concentrated in the New York metropolitan area and a downturn in the economy of the New York metropolitan area may adversely affect our business.

Substantially all of our business is located in the New York metropolitan area. In addition, as of December 31, 2006, substantially all of the real estate collateral for the loans in our portfolio was located within the New York metropolitan area. As a result, our financial condition and results of

operations may be affected by changes in the economy and the real estate market of the New York metropolitan area. A prolonged period of economic recession or other adverse economic conditions in the New York metropolitan area may result in an increase in nonpayment of loans and a decrease in collateral value. We cannot assure that the real estate market in the New York metropolitan area will not deteriorate in the future. In addition, there are ongoing threats of future terrorist attacks. Our geographic concentration in the New York metropolitan area heightens our exposure to such future terrorist attacks, which may adversely affect our business and that of our clients and result in a material decrease in our revenues. Future terrorist attacks cannot be predicted, and their occurrence can be expected to further negatively affect the U.S. economy generally and specifically the regional market in which we operate.

If the value of real estate were to decline materially, a significant portion of our loan portfolio could become under-collateralized, which would have a material adverse effect on us.

As of December 31, 2006, approximately 33% of the collateral for the loans in our portfolio consisted of real estate. The market value of real estate, particularly real estate held for investment, can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. If the value of the real estate serving as collateral for our loan portfolio were to decline materially, a portion of our loan portfolio could become under-collateralized. If the loans that are collateralized by real estate become troubled during a time when market conditions are declining or have declined, we may not be able to realize the value of the collateral that we anticipated at the time of originating the loan, which could have a material adverse effect on our provision for loan losses and our financial condition and results of operations.

Our failure to effectively manage our credit risk could have a material adverse effect on our financial condition and results of operations.

There are risks inherent in making any loan, including repayment risks associated, among other things, with the period of time over which the loan may be repaid, changes in economic and industry conditions, dealings with individual borrowers and uncertainties as to the future value of collateral. Although we attempt to minimize our credit risk by monitoring the concentration of our loans within specific industries and through prudent loan application approval procedures, we cannot assure you that such monitoring and approval procedures will reduce these lending risks.

Lack of seasoning of our loan portfolio may increase the risk of credit defaults in the future.

All of the loans in our loan portfolio have been generated in the last 68 months. In general, loans do not begin to show signs of credit deterioration or default until they have been outstanding for some period of time, a process referred to as "seasoning." As a result, a portfolio of older loans will usually behave more predictably than a newer portfolio. Because our loan portfolio is relatively new, the current level of delinquencies and defaults may not be representative of the level that will prevail when the portfolio becomes more seasoned, which is likely to be somewhat higher than current levels.

Because most of the loans in our loan portfolio were originated recently, our loan portfolio does not provide an adequate history of loan losses for our management to rely upon in establishing our allowance for loan losses. We therefore rely to a significant extent upon other financial institutions' histories of loan losses and their allowance for loan losses, as well as our management's estimates based on their experience in the banking industry, when determining our allowance for loan losses. There is no assurance that the history of loan losses and the reserving policies of other financial institutions and our management's judgment will result in reserving policies that will be adequate for our business and operations or applicable to our loan portfolio.

Our allowance for loan losses may not be sufficient to absorb actual losses.

Experience in the banking industry indicates that a portion of our loans will become delinquent, and that some of these loans may be only partially repaid or may never be repaid at all. Despite our underwriting criteria, we experience losses for reasons beyond our control, including general economic conditions. Although we believe that our allowance for loan losses is maintained at a level adequate to absorb any inherent losses in our loan portfolio, these estimates of loan losses are inherently subjective and their accuracy depends on the outcome of future events, some of which are beyond our control. We may need to make significant and unanticipated increases in our loss allowances in the future, which would materially adversely affect our results of operations.

In addition, bank regulators, as an integral part of their supervisory functions, periodically review our allowance for loan losses. These regulatory agencies may require us to increase our provision for loan losses or to recognize further loan charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for loan losses required by these regulatory agencies could materially adversely affect our financial condition and results of operations.

We are vulnerable to downgrades in credit ratings for securities within our investment portfolio.

Although approximately 99% of our portfolio of investment securities is A credit rated or better, we remain exposed to potential investment rating downgrades by credit rating agencies of the issuers of the securities in our investment portfolio. A significant volume of downgrades would negatively impact the market value of our securities portfolio, resulting in a potential increase in the unrealized loss in our investment portfolio. Rating downgrades below investment grade may result in impairment, requiring recognition of such impairment as a charge to current earnings.

We rely on the Federal Home Loan Bank of New York for secondary and contingent liquidity sources.

We utilize the Federal Home Loan Bank (or FHLB) of New York for secondary and contingent sources of liquidity. Also, from time to time, we utilize this borrowing source to capitalize on market opportunities to fund investment and loan initiatives. Our FHLB borrowings were $260.0 million at December 31, 2006. If we were unable to borrow from the FHLB, we would need to find alternative sources of liquidity, which may be available only at a higher cost and on terms that do not match the structure of our liabilities as well as FHLB borrowings do.

As a member of the FHLB, we are required to purchase capital stock of the FHLB as partial collateral and to pledge marketable securities or loans for this borrowing.

We may be responsible for environmental claims.

There is a risk that hazardous or toxic waste could be found on the properties that secure our loans. In such event, we could be held responsible for the cost of cleaning up or removing such waste, and such cost could significantly exceed the value of the underlying properties and adversely affect our profitability. Although we have policies and procedures that require us to perform an environmental review before initiating any foreclosure action on real property, there can be no assurance that this will be sufficient to detect all potential environmental hazards.

Curtailment of government guaranteed loan programs could affect our SBA business.

Our SBA business relies on the purchasing, pooling and selling of government guaranteed loans, in particular those guaranteed by the SBA. From time to time, the government agencies that guarantee these loans reach their internal limits and cease to guarantee loans for a period of time. In addition, these agencies may change their rules for loans or Congress may adopt legislation that would have the effect of discontinuing or changing the programs. If changes occur, the volumes of loans that

qualify for government guarantees could decline. Lower volumes of origination of government guaranteed loans may reduce the profitability of our SBA business.

System failures or breaches of our network security could subject us to increased operating costs as well as litigation and other liabilities.

The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from fire, power loss, telecommunications failure or other similar catastrophic events. Any damage or failure that causes an interruption in our operations could have a material adverse effect on our financial condition and results of operations. In addition, our operations are dependent upon our ability to protect our computer systems and network infrastructure against damage from physical break-ins, security breaches and other disruptive problems. Such computer break-ins and other disruptions could jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure, which may result in significant liability to us and deter potential clients. Although we, with the help of third-party service providers, intend to continue to implement security technology and establish operational procedures to prevent such damage, there can be no assurance that these security measures will be successful. In addition, advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to protect client transaction data. A failure of such security measures could have a material adverse effect on our financial condition and results of operations.

We compete with many larger financial institutions which have substantially greater financial and other resources than we have.

Competition among commercial banking institutions in the New York metropolitan area is intense and growing. We compete with other bank holding companies, national and state-chartered commercial banks, savings and loan associations, consumer finance companies, credit unions, securities brokerage firms, insurance companies, mortgage banking companies, money market mutual funds, asset-based non-bank lenders and other financial institutions. Many of these competitors have substantially greater financial resources, lending limits and larger office networks than we do, and are able to offer a broader range of products and services than we can. Failure to compete effectively for deposit, loan and other clients in our markets could cause us to lose market share, slow our growth rate and have a material adverse effect on our financial condition and results of operations.

The market for banking and brokerage services is extremely competitive and allows consumers to access financial products and compare interest rates and services from numerous financial institutions located across the United States. As a result, clients of all financial institutions, including those within our target market, are sensitive to competitive interest rate levels and services. Our future success in attracting and retaining client deposits depends, in part, on our ability to offer competitive rates and services. Our clients are particularly attracted to the level of personalized service we can provide. Our business could be impaired if our clients believe other banks provide better service or if they come to believe that higher rates are more important to them than better service.

In addition, the financial services industry is undergoing rapid technological changes, with frequent introductions of new technology-driven products and services. In addition to improving the ability to serve clients, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend, in part, upon our ability to address the needs of our clients by using technology, including the use of the Internet, to provide products and services that will satisfy client demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements than we do.

Decreases in trading volumes or prices could harm the business and profitability of Signature Securities.

Declines in the volume of securities trading and in market liquidity generally result in lower revenues from our brokerage and related activities. The profitability of our Signature Securities business would be adversely affected by a decline in revenues because a significant portion of its costs are fixed. For these reasons, decreases in trading volume or securities prices could have a material adverse effect on our business, financial condition and results of operations.

We have not historically paid, and do not presently intend to pay, cash dividends. Furthermore, our ability to pay cash dividends is restricted.

We have not paid any cash dividends on our common stock to date and do not intend to pay cash dividends on our common stock in the foreseeable future. We intend to retain earnings to finance operations and the expansion of our business. Therefore, any gains from your investment in our common stock must come from an increase in its market price.

In addition, payments of dividends will be subject to the prior approval by the FDIC if, after having paid a dividend, we would be undercapitalized, significantly undercapitalized or critically undercapitalized, and by the New York State Banking Department under certain conditions. Our ability to pay dividends will also depend upon the amount of cash available to us from our subsidiaries. Restrictions on our subsidiaries' ability to make dividends or advances to us will tend to limit our ability to pay dividends to our shareholders.

Risks Related to Our Industry

We are subject to regulatory capital requirements.

As a state-chartered bank, we are subject to various regulatory capital requirements administered by state and federal regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory—and possible additional discretionary—actions by regulators that, if undertaken, could have a direct material adverse effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. We are required by FDIC regulations to maintain a minimum ratio of qualifying total capital to total risk-weighted assets (including off-balance sheet items) of 8.0%, at least one-half of which must be in the form of Tier 1 capital, and a ratio of Tier 1 capital to total risk-weighted assets of 4.0%. We are also required to maintain a minimum leverage capital ratio—the ratio of Tier 1 capital (net of intangibles) to adjusted total assets. Banks that have received the highest rating of five categories used by regulators to rate banks and are not anticipating or experiencing any significant growth must maintain a leverage capital ratio of at least 3.0%. All other institutions must maintain a minimum leverage capital ratio of 4.0%.

In addition, we are subject to the provisions of the Federal Deposit Insurance Corporation Improvement Act of 1991, which imposes a number of mandatory supervisory measures. Among other matters, this Act established five capital categories ranging from "well capitalized" to "critically under capitalized." Such classifications are used by regulatory agencies to determine a bank's deposit insurance premium and the approval of applications authorizing institutions to increase their asset size or otherwise expand their business activities or acquire other institutions.

To be categorized as "well capitalized" under the Act and, thus, subject to the fewest restrictions, a bank must have a leverage capital ratio of at least 5.0%, a Tier 1 risk-based capital ratio of at least 6.0% and a total risk-based capital ratio of at least 10.0%, and must not be subject to any written agreement, order, capital directive or prompt corrective action directive issued by the FDIC to meet and

maintain a specific capital level. These capital requirements may limit asset growth opportunities and restrict our ability to increase earnings.

Our failure to comply with our minimum capital requirements would have a material adverse effect on our financial condition and results of operations.

We are subject to significant government regulation.

We operate in a highly regulated environment and are subject to supervision and regulation by a number of governmental regulatory agencies, including, among others, the FDIC, the New York State Banking Department, the Board of Governors of the Federal Reserve System (or Federal Reserve), the SEC, the New York State Insurance Department and the NASD. Regulations adopted by these agencies, which are generally intended to provide protection for depositors and clients rather than shareholders, govern a comprehensive range of matters relating to ownership and control of our shares, our acquisition of other companies and businesses, the activities in which we are permitted to engage, maintenance of adequate capital levels and other aspects of our operations. These regulatory agencies possess broad authority to prevent or remedy unsafe or unsound practices or violations of law. Recently enacted legislation and regulations have had and are expected to continue to have a significant impact on the financial services industry. Some of the recent legislative and regulatory changes, including the Sarbanes-Oxley Act of 2002 and the USA PATRIOT Act of 2001, have increased and may in the future further increase our costs of doing business, particularly personnel and technology expenses necessary to maintain compliance with the expanded regulatory requirements. In addition, future legislation and government policy could adversely affect the banking industry as a whole, including our results of operations. For example, new legislation or regulation may limit the manner in which we may conduct our business, including our ability to offer new products, obtain financing, attract deposits, make loans and achieve satisfactory interest spreads.

The securities markets and the brokerage industry in which Signature Securities operates are highly regulated. Signature Securities is subject to regulation as a securities broker and investment adviser, and many of the regulations applicable to Signature Securities may have the effect of limiting its activities, including activities that might be profitable. Signature Securities is registered with and subject to supervision by the SEC and the NASD and is also subject to state insurance regulation. As a subsidiary of Signature Bank, Signature Securities is also subject to regulation and supervision by the New York State Banking Department. The securities industry has been subject to several fundamental regulatory changes, including changes in the rules of self-regulatory organizations such as the NYSE and the NASD. In the future, the industry may become subject to new regulations or changes in the interpretation or enforcement of existing regulations. We cannot predict the extent to which any future regulatory changes may adversely affect our business. In addition, we are subject to periodic examination by the FDIC, the New York State Banking Department, the SEC, self-regulatory organizations and various state authorities. Our banking operations, sales practice operations, trading operations, record-keeping, supervisory procedures and financial position may be reviewed during such examinations to determine if they comply with the rules and regulations designed to protect clients and protect the solvency of banks and broker-dealers. Examinations may result in the issuance of a letter to us noting perceived deficiencies and requesting us to take corrective action. Deficiencies could lead to further investigation and the possible institution of administrative proceedings, which may result in the issuance of an order imposing sanctions upon us and/or our personnel, including our investment professionals. Sanctions against us may include a censure, cease and desist order, monetary penalties or an order suspending us for a period of time from conducting certain or all of our operations. Sanctions against individuals may include a censure, cease and desist order, monetary penalties or an order restricting the individual’s activities or suspending the individual from association with us. In egregious cases, either we or our personnel or both could be expelled from a self-regulatory organization or barred from the banking industry or the securities industry.

Regulatory net capital requirements significantly affect and often constrain our brokerage business.

The SEC, the NASD and various other regulatory bodies in the United States have rules with respect to net capital requirements for broker-dealers that affect Signature Securities. These rules require that at least a substantial portion of a broker-dealer's assets be kept in cash or highly liquid investments. Signature Securities must comply with these net capital requirements, which limit operations that require intensive use of capital, such as trading activities. These rules could also restrict our ability to withdraw capital from our broker-dealer subsidiary, even in circumstances where this subsidiary has more than the minimum amount of required capital. This, in turn, could limit our ability to pay dividends, implement our business strategies and pay interest on and repay the principal of our debt. A change in these rules, or the imposition of new rules, affecting the scope, coverage, calculation or amount of net capital requirements could have material adverse effects. Significant operating losses or any unusually large charge against net capital could also have a material negative impact on our business.

The misconduct of employees or their failure to abide by regulatory requirements are difficult to detect and deter.

Employee misconduct could subject us to financial losses or regulatory sanctions and seriously harm our reputation. It is not always possible to deter employee misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Misconduct by our employees could include hiding unauthorized activities from us, improper or unauthorized activities on behalf of clients or improper use of confidential information.

Employee errors in recording or executing transactions for clients could cause us to enter into transactions that clients may disavow and refuse to settle. These transactions expose us to risks of loss, which can be material, until we detect the errors in question and unwind or reverse the transactions. As with any unsettled transaction, adverse movements in the prices of the securities involved in these transactions before we unwind or reverse them can increase these risks.

All of our securities professionals are required by law to be licensed with our subsidiary, Signature Securities, a licensed securities broker-dealer. Under these requirements, these securities professionals are subject to our supervision in the area of compliance with federal and applicable state securities laws, rules and regulations, as well as the rules and regulations of self-regulatory organizations such as the NASD. The violation of any regulatory requirements by us or our securities professionals could jeopardize Signature Securities' broker-dealer license or other licenses and could subject us to liability to clients.

We are subject to losses resulting from fraudulent or negligent acts on the part of our clients or other third parties.

We rely heavily upon information supplied by our clients and by third parties, including the information included in loan applications, property appraisals, title information and employment and income documentation, in deciding which loans we will originate, as well as the terms of those loans. If any of the information upon which we rely is misrepresented, either fraudulently or inadvertently, and the misrepresentation is not detected prior to loan funding, the value of the loan may be significantly lower than we had expected, or we may fund a loan that we would not have funded or on terms that we would not have extended. Whether a misrepresentation is made by the loan applicant, a mortgage broker or another third party, we generally bear the risk of loss associated with the misrepresentation. A loan subject to a material misrepresentation is typically unable to be sold or subject to repurchase if sold prior to the detection of the misrepresentation. The sources of the misrepresentation are often difficult to locate and it is often difficult to recover any of the monetary losses we have suffered. Although we maintain a system of internal controls to mitigate against such occurrences and maintain

insurance coverage for such risks that are insurable, we cannot assure you that we have detected or will detect all misrepresented information in our loan originations operations.

The failure of our brokerage clients to meet their margin requirements may cause us to incur significant liabilities.

The brokerage business of Signature Securities, by its nature, is subject to risks related to potential defaults by our clients in paying for securities they have agreed to purchase and for securities they have agreed to sell and deliver. National Financial Services provides clearing services to our brokerage business, including the confirmation, receipt, execution, settlement and delivery functions involved in securities transactions, as well as the safekeeping of clients' securities and assets and certain client record keeping, data processing and reporting functions. National Financial Services makes margin loans to our clients to purchase securities with funds they borrow from National Financial Services. We must indemnify National Financial Services for, among other things, any loss or expense incurred due to defaults by our clients in failing to repay margin loans or to maintain adequate collateral for those loans. We are subject to risks inherent in extending margin credit, especially during periods of rapidly declining markets.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We conduct business in 18 full-service private client offices, one SBA location and three operations centers. All current locations are leased with term expirations ranging from 2007 to 2021. Lease terms and rates vary by property. Many of the lease contracts include modest annual escalation agreements.

Our locations and lease expiration dates are described below:

Location	Type	Expiration
565 Fifth Avenue New York, NY 10017	Executive Offices, Bank Administration Center and Private Client Office	2014
261 Madison Avenue New York, NY 10016	Private Client Office	2015
950 Third Avenue New York, NY 10022	Private Client Office	2007
300 Park Avenue New York, NY 10022	Private Client Office	2015
71 Broadway New York, NY 10006	Private Client Office	2010
26 Court Street Brooklyn, NY 11242	Private Client Office	2014
84 Broadway Brooklyn, NY 11211	Private Client Office	2011
1225 Franklin Avenue Garden City, NY 11530	Private Client Office	2017
3 Quaker Ridge Road New Rochelle, NY 10804	Private Client Office	2011
79 Sunrise Highway Rockville Centre, NY 11570	Private Client Office	2014
1177 Avenue of the Americas New York, NY 10019	Computer Data Center	2009
9 Greenway Plaza Houston, TX 77046	SBA & Institutional Trading Center (Signature Securities office)	2011
58 South Service Road Melville, NY 11747	Private Client Office	2014
923 Broadway Woodmere, NY 11598	Private Client Office	2014
360 Hamilton Plaza White Plains, NY 10601	Private Client Office	2015
36-36 33rd Street Long Island City, NY 11102	Private Client Office	2015

Location	Type	Expiration
29 West 38th Street New York, NY 10018	Bank and Brokerage Operations Center	2020
421 Hunts Point Avenue Bronx, NY 10474	Private Client Office	2021
200 Park Avenue South New York, NY 10003	Private Client Office	2015
1020 Madison Avenue New York, NY 10021	Private Client Office	2015
78-27 37th Avenue Jackson Heights, NY 11372	Private Client Office	2016

ITEM 3. LEGAL PROCEEDINGS

We are subject to various pending and threatened legal actions relating to the conduct of our normal business activities. In the opinion of management, the ultimate aggregate liability, if any, arising out of any such pending or threatened legal actions will not be material to our consolidated financial statements.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted to a vote of our security holders during the fourth quarter of 2006 through the solicitation of proxies or otherwise.

PART II

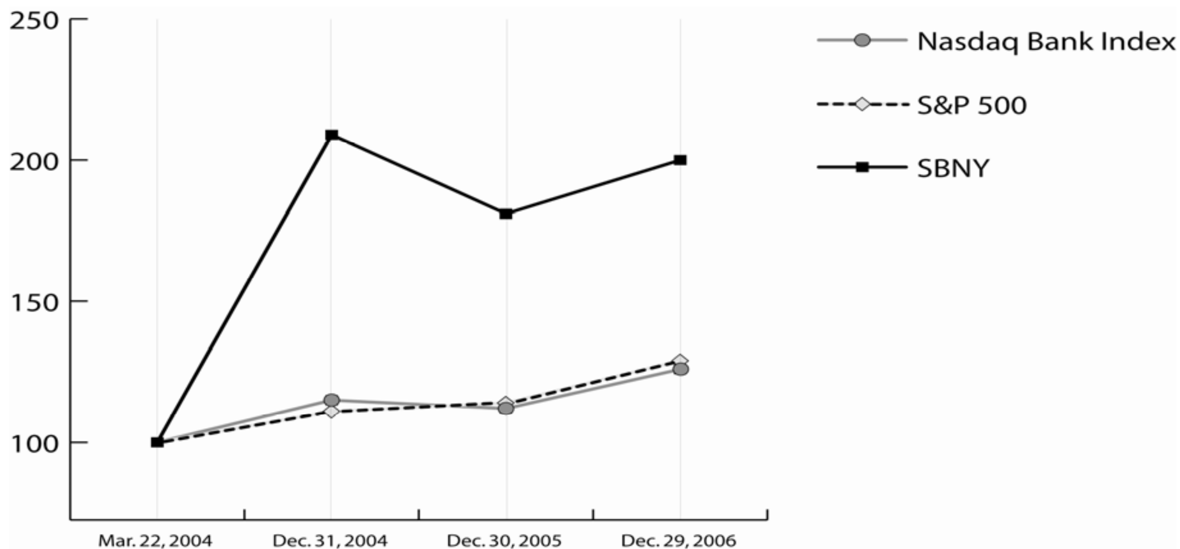
ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed on the Nasdaq National Market under the symbol "SBNY." As of December 31, 2006, 29,598,107 shares of our common stock were issued and outstanding. The following table lists, on a quarterly basis, the range of high and low intra-day sale prices per share of our common stock in U.S. dollars:

	Common Stock	
	High	Low
2006		
First quarter	$ 34.22	27.75
Second quarter	37.60	30.82
Third quarter	34.95	30.85
Fourth quarter	33.43	28.60
2005		
First quarter	$ 32.89	24.10
Second quarter	26.75	23.58
Third quarter	30.75	24.40
Fourth quarter	29.90	24.26

On December 31, 2006, the last reported sale price of our common stock was $30.98 and there were 19 holders of record of our common stock, including record holders on behalf of an indeterminate number of beneficial holders.

The following graph compares the performance of our common stock with the performance of the Standard & Poor's 500 Index and the Nasdaq Bank Stocks Index:



The performance period that is reflected below assumes that $100 was invested in our common stock and each of the indexes listed below on March 22, 2004, the date of our initial public offering. The performance of our common stock reflected below is not indicative of our future performance.

Company Name/Index	March 22, 2004	December 31, 2004	December 31, 2005	December 31, 2006
Signature Bank	$ 100	209	181	200
Standard & Poor's 500 Index	100	111	114	129
Nasdaq Bank Stocks Index	100	115	112	126

The Performance Graph does not constitute soliciting material and should not be deemed filed or incorporated by reference into any other Signature Bank filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent we specifically incorporate this item therein by reference.

DIVIDEND POLICY

We have never declared or paid any cash dividends on our common stock. For the foreseeable future, we intend to retain any earnings to finance our operations and the expansion of our business and we do not anticipate paying any cash dividends on our common stock. Any future determination to pay dividends will be at the discretion of our Board of Directors and will be dependent upon then existing conditions, including our financial condition and results of operations, capital requirements, contractual restrictions, business prospects and other factors that the Board of Directors considers relevant.

In addition, payments of dividends may be subject to the prior approval of the New York State Banking Department and the FDIC. Under New York law, we are prohibited from declaring a dividend so long as there is any impairment of our capital stock. In addition, we would be required to obtain the approval of the New York State Banking Department if the total of all our dividends declared in any calendar year would exceed the total of our net profits for that year combined with retained net profits of the preceding two years, less any required transfer to surplus or a fund for the retirement of any preferred stock. We would also be required to obtain the approval of the FDIC prior to declaring a dividend if after paying the dividend we would be undercapitalized, significantly undercapitalized or critically undercapitalized. Our ability to pay dividends also depends upon the amount of cash available to us from our subsidiaries. Restrictions on our subsidiaries' ability to make dividends and advances to us will tend to limit our ability to pay dividends to our shareholders.

ITEM 6. SELECTED FINANCIAL DATA

The information set forth below should be read in conjunction with our consolidated financial statements and related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations, each of which is included elsewhere in this Annual Report or Form 10-K.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with "Selected Historical Consolidated Financial and Other Data" and our consolidated financial statements and related notes, each of which is included elsewhere in this Annual Report or Form 10-K. Some of the statements in the following discussion are forward-looking statements. See "Cautionary Note Regarding Forward-Looking Statements."

Overview

Since commencing operations on May 1, 2001, we have grown to $5.40 billion in assets, $4.21 billion in deposits, $392.6 million in equity capital and approximately $3.63 billion in other assets under management as of December 31, 2006.

The growth in our profitability is based on several key factors, including:

- the significant growth of our asset base each year;
- our ability to maintain and significantly grow core deposits, a funding source at a cost that has been consistently below industry average, which has resulted in increased net interest income from 2001 onward; and
- our ability to control non-interest expense, which has contributed to a substantial improvement of our efficiency ratio from a not meaningful number in 2001 to 56.7% for the year ended December 31, 2006.

An important aspect of our growth strategy is the ability to provide personalized, high quality service and effectively manage a large number of client relationships throughout the New York metropolitan area. Since the commencement of our operations, we have successfully recruited and retained more than 175 experienced private client group professionals. We believe that our existing operations infrastructure will allow us to grow our business over the next few years both geographically within the New York metropolitan area and with respect to the size and number of client relationships without substantial additional capital expenditures.

Critical Accounting Policies

We follow financial accounting and reporting policies that are in accordance with U.S. generally accepted accounting principles. Some of these significant accounting policies require management to make difficult, subjective or complex judgments. However, the policies noted below could be deemed to be our "critical accounting policies" under the definition given to this term by the Securities and Exchange Commission ("SEC")—those that are most important to the presentation of a company's financial condition and results of operations, and require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

We consider our policies related to the allowance for loan losses as critical to our financial statement presentation. The total allowance for loan losses includes activity related to allowances calculated in accordance with Statement of Financial Accounting Standards (SFAS) No. 114, *Accounting by Creditors for Impairment of a Loan,* and SFAS No. 5, *Accounting for Contingencies.* The allowance for loan losses is established through a provision for loan losses charged to current

earnings. The amount maintained in the allowance reflects management's continuing evaluation of the losses inherent in the loan portfolio. The allowance for loan losses is comprised of two components: specific reserves assigned to certain classified loans individually evaluated for impairment and reserves calculated based on formulas for pools of loans. Factors contributing to the determination of specific reserves include the creditworthiness of the borrower and, more specifically, changes in the expected future receipt of principal and interest payments and/or in the value of pledged collateral. A reserve is recorded when the carrying amount of the loan exceeds the discounted estimated cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. For purposes of determining formulas for pools of loans, the portfolio is segregated by product types in order to recognize differing risk profiles among categories, and then further segregated by credit grades. See "Credit Quality" for further discussion of the risk factors considered by management in establishing the allowance for loan losses.

We also consider our policies related to income taxes to be critical to our financial statement presentation. We utilize the asset and liability method in accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based upon the difference between the values of the assets and liabilities as reflected in the financial statements and their related tax basis using enacted tax rates in effect for the year in which the differences are expected to be recovered or settled. As changes in tax law or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. A valuation reserve is provided against deferred tax assets unless it is more likely than not that such deferred tax assets will be realized.

New Accounting Standards

In February 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 155, *"Accounting for Certain Hybrid Financial Instruments-an amendment of FASB Statements Nos. 133 and 140"* ("SFAS No. 155"). The Statement amends FASB Statements No. 133, "*Accounting for Derivative Instruments and Hedging Activities*" ("SFAS No. 133") and No. 140, *"Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities"* ("SFAS No. 140"). The Statement: permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; clarifies which interest-only and principal-only strips are subject to the requirements of SFAS No. 133; establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; and amends SFAS No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. The Statement is effective for all financial instruments acquired or issued after the beginning of the first fiscal year that begins after September 15, 2006. At this time, we do not anticipate the adoption of SFAS No. 155 to have any impact on our consolidated financial statements.

In March 2006, the FASB issued SFAS No. 156, *"Accounting for Servicing of Financial Assets-an amendment of FASB Statement No. 140"* ("SFAS No. 156"). The Statement amends FASB Statement No. 140 and is effective as of the beginning of the first fiscal year beginning after September 15, 2006. Under SFAS No. 156, an entity is: required to recognize a servicing asset or liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in specified situations; required to initially measure all separately recognized servicing assets and liabilities at fair value, if practicable; permitted to measure each class of servicing assets and liabilities using either the amortization method or the fair value measurement method; permitted to do a one-time reclassification of available-for-sale securities to trading securities, at initial adoption, provided that those securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or liabilities; and required to separately present servicing assets and liabilities measured at fair value in the statement of financial condition. At this time, we do

not anticipate the adoption of SFAS No. 156 to have any impact on our consolidated financial statements.

In June 2006, the FASB issued Interpretation No. 48, *"Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109"* ("FIN 48"). FIN 48 clarifies Statement 109 by establishing a criterion that an individual tax position would have to meet in order for some or all of the associated benefit to be recognized in an entity's financial statements. The Interpretation applies to all tax positions within the scope of Statement 109. In applying FIN 48, an entity is required to evaluate each individual tax position using a two step-process. First, the entity should determine whether the tax position is recognizable in its financial statements by assessing whether it is "more-likely-than-not" that the position would be sustained by the taxing authority on examination. The term "more-likely-than-not" means "a likelihood of more than 50 percent." Second, the entity should measure the amount of benefit to recognize in its financial statements by determining the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. Each tax position must be re-evaluated at the end of each reporting period to determine whether recognition/derecognition is warranted. The liability resulting from the difference between the tax return position and the amount recognized and measured under FIN 48 should be classified as current or noncurrent depending on the anticipated timing of settlement. An entity should also accrue interest and penalties on unrecognized tax benefits in a manner consistent with the tax law. FIN 48 requires significant new annual disclosures in the notes to the financial statements that include a tabular roll-forward of the beginning to ending balances of an entity's unrecognized tax benefits. The Interpretation is effective for fiscal years beginning after December 15, 2006 and the cumulative effect of applying FIN 48 should be reported as an adjustment to retained earnings at the beginning of the period in which it is adopted. We do not expect the adoption of FIN 48 to have a material impact on our consolidated financial statements.

In September 2006, the Emerging Issues Task Force ("EITF") of the FASB reached a Consensus on accounting for life insurance in Issues Nos. 06-4, *"Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements"* ("EITF Issue No. 06-4") and 06-5, *"Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance With FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance ("FTB 85-4")"* ("EITF Issue No. 06-5").

EITF Issue No. 06-4 concluded that an employer, entering into an endorsement split-dollar life insurance arrangement that provides an employee with a postretirement benefit, has not effectively settled the obligation by purchasing the life insurance. Therefore, a liability for the future benefits should be recognized in accordance with SFAS No. 106, *"Employers' Accounting for Postretirement Benefits Other Than Pensions"* or APB Opinion No. 12, *"Omnibus Opinion – 1967."* The Consensus is effective for fiscal years beginning after December 15, 2007 and would be recognized as a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. Retrospective application is also permitted. We do not expect the adoption of EITF Issue 06-4 to have a material impact on our consolidated financial statements.

EITF Issue No. 06-5 concluded that a policyholder should consider other amounts included in the contractual terms of an insurance policy, in addition to cash surrender value, when determining the amount (asset value) that could be realized under the terms of the insurance contract in accordance with FTB 85-4. These other amounts include: non-discretionary amounts (those items that are not contingent as of the balance sheet date) and time-based amounts (i.e., Deferred Acquisition Costs ("DAC") Tax) which would be accounted for on a present value basis. Items that are "probable" to be received and/or subject to the insurance company's intent to pay would not be included in asset value. In addition, the amount that could be realized should be determined on an individual policy or certificate level. Amounts that would be realized upon surrender of all policies or

certificates would not be included when measuring assets. The Consensus is effective for fiscal years beginning after December 15, 2006 and would be recognized through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption for all life insurance contracts currently held. Retrospective application is also permitted. We do not expect the adoption of EITF Issue 06-5 to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, *"Fair Value Measurements"* ("SFAS No. 157"). The Statement establishes a single definition of fair value, sets up a framework for measuring it, and requires additional disclosures about the use of fair value to measure assets and liabilities. SFAS No. 157 also emphasizes that fair value is a market-based measurement by establishing a three level "fair value hierarchy" that ranks the quality and reliability of inputs used in valuation models, i.e., the lower the level the more reliable the input. The hierarchy provides the basis for the Statement's new disclosure requirements which are dependent upon the frequency of an item's measurement (recurring versus nonrecurring). SFAS No. 157 is effective for fair-value measures already required or permitted by other standards for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Its provisions will generally be applied prospectively. The adoption of SFAS No. 157 is not expected to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, *"Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132(R)"* ("SFAS No. 158"). SFAS No. 158 requires a calendar year-end company with publicly traded equity securities that sponsors a postretirement benefit plan to fully recognize the overfunded or underfunded status of its benefit plan in its 2006 year-end balance sheet. For all other entities, this provision is effective for fiscal years ending after June 15, 2007. The Statement also requires a company to measure its plan assets and benefit obligations as of its year-end balance sheet date, eliminating the use of earlier measurement dates currently permissible. This provision is effective for fiscal years ending after December 15, 2008. At this time, we do not anticipate the adoption of SFAS No. 158 to have any impact on our consolidated financial statements.

In September 2006, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 108, codified as SAB Topic 1.N, *"Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements"* ("SAB 108"). SAB 108 states that registrants should use both a balance sheet and an income statement approach when quantifying and evaluating the materiality of a misstatement. It also contains guidance on correcting errors under this dual approach and provides transition guidance for correcting errors that existed in prior years. SAB 108 is effective for annual financial statements covering the first fiscal year ending after November 15, 2006. Earlier application is encouraged for any interim period of the first fiscal year ending after November 15, 2006 and filed after September 13, 2006. We do not anticipate the adoption of SAB 108 to have a material impact on our consolidated financial statements.

Lines of Business

We operate two principal lines of business - the banking line of business and the broker-dealer line of business.

Management's approach to evaluating the operating performance of each line of business considers that these business lines both serve our target market, and a key part of our business strategy is seamless integration of banking and brokerage services for the client. Certain synergies and operational overlap exist between the two lines, where feasible and as allowed within regulatory guidelines. The development of our business and the value of overall client relationships to us, as a whole, are also considered.

We measure and report results for both the banking and broker-dealer lines of business. The following tables present certain information regarding each of those lines of business.

	At or for the years ended December 31,		
(in thousands)	**2006**	**2005**	**2004**
The Bank			
Interest income	$ 239,494	157,450	87,167
Interest expense	117,554	58,358	20,180
Fee and other income	17,146	13,864	18,084
Non-interest expense (1)	80,679	79,775	56,476
Income tax expense (benefit)	24,605	16,881	(1,724)
Net income	$ 33,802	16,300	30,319
Total assets	$ 5,400,331	4,385,205	3,355,069
SSG			
Interest income	$ 163	86	39
Interest expense	55	36	36
Fee and other income (2)	4,182	4,814	4,840
Fee income from the Bank	2,689	3,138	4,436
Non-interest expense	7,397	8,430	9,797
Income tax expense	24	3	3
Net loss	$ (442)	(431)	(521)
Total assets	$ 2,766	2,493	4,069

(1) For purposes of this disclosure, non-interest expense includes the provision for loan losses.
(2) Represents fee and other income from external clients.

Signature Securities' assets predominantly consist of cash and short-term investments to support its operational needs. Signature Securities' assets under management of $1.22 billion, as of December 31, 2006, represent fixed income securities, equity securities, money market mutual funds, mutual funds and other assets of its clients. See Note 20 to our audited consolidated financial statements for further information regarding our lines of business.

Results of Operations

The following is a discussion and analysis of our results of operations for the years ended December 31, 2006 and 2005 and for the years ended December 31, 2005 and 2004.

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Net Income

Net income for the year ended December 31, 2006 was $33.4 million, or $1.12 diluted earnings per share, compared to $15.9 million, or $0.53 diluted earnings per share, for the year ended December 31, 2005. Returns on average equity and average assets for the year ended December 31, 2006 were 9.25% and 0.72%, respectively, compared to 4.63% and 0.42%, respectively, for the year ended December 31, 2005.

	Years Ended December 31,	
(in thousands)	**2006**	**2005**
Interest income	$ 239,657	157,536
Interest expense	117,609	58,394
Net interest income	122,048	99,142
Provision for loan losses	4,145	3,310
Non-interest income	21,328	18,678
Non-interest expense	81,242	81,757
Income tax expense	24,629	16,884
Net income	$ 33,360	15,869

Net Interest Income

Net interest income is the difference between interest earned on assets and interest incurred on liabilities.

The following table presents an analysis of net interest income by each major category of interest-earning assets and interest-bearing liabilities for the years ended December 31, 2006 and December 31, 2005:

	Years ended December 31,					
	2006			*2005*		
(dollars in thousands)	**Average Balance**	**Interest Income/ Expense**	**Average Yield/ Rate**	**Average Balance**	**Interest Income/ Expense**	**Average Yield/ Rate**

Money market accounts	1,804,086	63,314	3.51%	1,559,905	33,388	2.14%
Time deposits	295,957	12,946	4.37%	261,168	7,697	2.95%
Non-interest-bearing deposits	1,060,882	-	-	891,059	-	-
Total deposits	3,397,211	80,070	2.36%	2,914,547	42,523	1.46%
Borrowings	824,024	37,539	4.56%	491,613	15,871	3.23%
Total deposits and borrowings	4,221,235	117,609	2.79%	3,406,160	58,394	1.71%
Other non-interest-bearing liabilities and shareholders' equity	385,277			363,846		
Total liabilities and shareholders' equity	$ 4,606,512			$ 3,770,006		
OTHER DATA						
Net interest income / interest rate spread		122,048	2.71%		99,142	2.70%
Net interest margin			2.80%			2.78%
Ratio of average interest-earning assets to average interest-bearing liabilities			103.25%			104.81%

(1) Non-performing loans are included in average loan balances.

(2) Loan interest income includes net amortization of deferred fees and costs of approximately $2,377,000 and $1,615,000 for the years ended December 31, 2006 and 2005, respectively.

Interest income and interest expense are affected both by changes in the volume of interest-earning assets and interest-bearing liabilities and by changes in yields and interest rates. The tables below analyze the impact of changes in volume (changes in average outstanding balances multiplied by the prior period's rate) and changes in interest rate (changes in interest rates multiplied by the current period's average balance). Changes that are caused by a combination of interest rate and volume are allocated proportionately to both changes in volume and changes in interest rate. For purposes of calculating the changes in our net interest income, non-performing assets are included in the appropriate balance and shown as a change due to rate.

	Year ended December 31, 2006 vs. 2005		
(in thousands)	**Change Due to Rate**	**Change Due to Volume**	**Total Change**

Consumer loans	1,836	3,716	5,552
Loans held for sale	1,493	(247)	1,246
Total interest income	$ 40,108	42,013	82,121
INTEREST EXPENSE			
NOW and interest-bearing checking	$ 2,131	241	2,372
Money market accounts	24,700	5,226	29,926
Time deposits	4,224	1,025	5,249
Total deposits	31,055	6,492	37,547
Borrowings	10,937	10,731	21,668
Total interest expense	$ 41,992	17,223	59,215

Net interest income for the year ended December 31, 2006 was $122.0 million, an increase of $22.9 million, or 23.1%, over the year ended December 31, 2005. The increase in net interest income over the twelve month period was largely driven by increases in average earnings assets and average deposits of $788.5 million and $482.7 million, respectively, as well as an increase in net interest margin of two basis points to 2.80%.

Total average investment securities for the year ended December 31, 2006 were $3.02 billion compared to $2.72 billion for the year ended December 31, 2005. The overall yield on the securities portfolio for the year ended December 31, 2006 was 4.64%, up 74 basis points from the year ended December 31, 2005. Yield expansion in the twelve month period was primarily the result of investing new funds and cash flow from existing investments into higher yielding investments. Additionally, yields on the portfolio were also favorably affected by lower premium amortization and a more favorable market environment. Our portfolio primarily consists of high quality government agency mortgage-backed securities and collateralized mortgage obligations. We continue to mitigate extension risk through our overall strategy of purchasing relatively short duration securities that, by their nature, have lower yields. At December 31, 2006, the baseline average duration of our

investment securities portfolio was approximately 2.01 years, compared to 1.76 years at December 31, 2005.

Total commercial loans and commercial mortgages averaged $986.1 million for the year ended December 31, 2006, an increase of $398.3 million or 67.8% over the year ended December 31, 2005. The average yield on this portfolio increased to 7.43%, up 134 basis points. The increase in average yield is mostly due to the increase in the Federal funds rate of 100 basis points that occurred throughout 2006 and a corresponding increase in our prime rate. In order to assist in monitoring and controlling credit risk, we primarily lend to existing clients with whom we have deposit and/or brokerage relationships. We target our lending to privately owned businesses, their owners and senior managers who are generally high net worth individuals who meet our credit standards. We primarily extend variable rate loans in which the interest rate fluctuates with a predetermined indicator such as the U.S. prime rate or LIBOR. Our use of variable rate loans is designed to reduce our exposure to risks associated with interest rate fluctuations.

We are an active participant in the SBA loan and SBA pool secondary market by purchasing, securitizing, and selling the guaranteed portions of SBA Section 7(a) loans. Once purchased, we typically warehouse the guaranteed loan for approximately 30 to 180 days and classify them as loans held for sale. From this warehouse we aggregate like SBA loans by similar characteristics into pools for securitization to the secondary market. The timing of the purchase and sale of such loan pools drives the quarter-to-quarter fluctuations in average balances of loans held for sale, which averaged $72.2 million and $77.5 million for the years ended December 31, 2006 and 2005, respectively. Most SBA Section 7(a) loans have adjustable rates and float at a spread to the prime rate.

Average total deposits and borrowings grew $815.1 million, or 23.9%, to $4.22 billion during the year ended December 31, 2006 from $3.41 billion for the year ended December 31, 2005. Overall cost of funding was 2.79% during 2006, increasing 108 basis points from 1.71% in 2005. The increase in overall cost of funding was primarily driven by the increase in the Federal funds rate and the highly competitive deposit market environment.

For the year ended December 31, 2006, average non-interest-bearing demand deposits were $1.06 billion as compared to $891.1 million for the year ended December 31, 2005, an increase of $169.8 million, or 19.1%. Non-interest-bearing demand deposits continue to represent a significant component of our deposit mix, representing 37.7% of all deposits at December 31, 2006. Additionally, average NOW and interest-bearing checking and money market accounts totaled $2.04 billion for the year ended December 31, 2006, an increase of $278.1 million, or 15.8%, over the year ended December 31, 2005. These core deposits have provided us with a source of stable, low cost funding which has positively affected our net interest margin and income. Average time deposits, which were relatively short-term in nature and totaled $296.0 million for the year ended December 31, 2006, carried an average cost of 4.37%. We do not actively compete for such time deposits as our experience indicates that clients in this market are typically attracted by rate as opposed to service, thereby making such deposits more costly than our average core deposits.

For the year ended December 31, 2006, average total borrowings were $824.0 million compared to $491.6 million for the year ended December 31, 2005, an increase of $332.4 million or 67.6%. The average cost of total borrowings was 4.56% and 3.23% for the years ended December 31, 2006 and 2005, respectively. The increase in average cost of total borrowings for the year ended December 31, 2006, compared to the year ended December 31, 2005, is mostly attributable to the increase in prevailing short-term market interest rates during 2006. At December 31, 2006, total borrowings represent approximately 14.8% of all funding compared to 12.5% at December 31, 2005.

Allowance for Loan Losses

The allowance for loan losses increased $3.8 million to $13.8 million for the year ended December 31, 2006 from $10.1 million for the year ended December 31, 2005. This increase is primarily due to an increase in loans outstanding.

The following table allocates the allowance for loan losses based on our judgment of inherent losses in each respective area according to our methodology for allocating reserves.

	December 31,			
	2006		*2005*	
(dollars in thousands)	**Amount**	**% to Total Allowance by Category**	**Amount**	**% to Total Allowance by Category**
Risk rated commercial and industrial loans and commercial real estate loans	$ 13,119	94.87%	9,435	93.88%
Residential mortgages	163	1.18%	72	0.72%
Home equity lines of credit	85	0.61%	69	0.69%
Consumer and other	462	3.34%	474	4.71%
Total	$ 13,829	100.00%	10,050	100.00%

Non-Interest Income

For the year ended December 31, 2006, non-interest income was $21.3 million, an increase of $2.7 million or 14.2% when compared with 2005. This increase was primarily the result of an increase of $1.9 million in commissions and an increase of $1.5 million in fees and service charges. The increase was partially offset by a decrease of $608,000 in net gains on sales of securities and loans. The increases in commissions and fees and service charges are reflective of our growth in clients and client activity.

Non-Interest Expense

Non-interest expense decreased $515,000 or 0.63%, to $81.2 million for the year ended December 31, 2006 from $81.8 million for the year ended December 31, 2005.

The decrease in non-interest expense was primarily driven by a $2.9 million decrease in salaries and benefits, which were $49.2 million for the year ended December 31, 2006. In 2005, a special one-time bonus payment of cash and stock totaling $12.0 million directly contributed by Bank Hapoalim, our former parent company, was included in our salaries and benefits expense. Excluding this one-time special bonus, salaries and benefits would have increased $9.1 million. The majority of this increase was due to the addition of nine new private client groups. At December 31, 2006, we had 416 employees compared to 347 employees at December 31, 2005.

Occupancy and equipment expense increased $1.7 million to $9.0 million in 2006. This increase was predominantly due to the addition of three private client offices during the year. At December 31, 2006, we had 18 private client offices compared to 15 at December 31, 2005.

Other general and administrative expenses for the year ended December 31, 2006 were $23.0 million, an increase of $664,000, or 3.0%, from $22.4 million for the year ended December 31, 2005. The modest increase in other general and administrative expenses is principally attributable to volume-related operational costs required for our expanding business.

Stock-Based Compensation

On January 1, 2006, we began accounting for our stock-based compensation plan in accordance with the requirements of Statement of Financial Accounting Standards ("SFAS") No. 123 (Revised 2004), *"Share-Based Payment"* ("SFAS No. 123R") applying the modified prospective method. Under this method of adoption, financial statements for prior interim periods and fiscal years will not reflect any restated amounts. Accordingly, compensation expense is now recognized in our statement of operations for all stock-based compensation awards over the requisite service period with a corresponding credit to equity, specifically additional paid-in capital.

Prior to our adoption of SFAS No. 123R, we accounted for our stock-based compensation plan in accordance with the requirements specified in SFAS No. 123, "*Accounting for Stock-Based Compensation*", as amended by SFAS No. 148, "*Accounting for Stock-Based Compensation—Transition and Disclosure*" which established a fair value-based method of accounting for employee stock compensation plans. Under this method, compensation cost was measured at the grant date based on the value of the award and was recognized over the service period, which was generally the vesting period. As permitted under these statements, we elected to apply the intrinsic value method in accounting for our option plan in accordance with Accounting Principles Board ("APB") Opinion No. 25, "*Accounting for Stock Issued to Employees*." Accordingly, compensation expense was not recognized in our statements of operations, other than for restricted stock awards. Restricted stock awards were recorded as unearned compensation, a component of shareholders' equity, at fair value at the date of grant, and were amortized to compensation expense over the awards' specified vesting periods. Under SFAS No. 148, issuers applying the intrinsic value method were also required to disclose the pro-forma impact on net income and earnings per share as if compensation expense had been determined using the fair value-based method. This is illustrated by the table presented in Note 2(n), Stock-Based Compensation, to our consolidated financial statements.

On December 20, 2005, our Compensation Committee of our Board of Directors and our Board of Directors approved the accelerated vesting and exercisability of all outstanding unvested and unexercisable stock options to purchase our common shares held by employee directors, officers, employees and consultants. As a result, options to purchase 1,039,466 common shares, which would have vested and become exercisable from time to time through November 2008, became fully vested and immediately exercisable as of December 20, 2005. The number of shares and exercise prices of the options subject to acceleration were unchanged. The accelerated options had exercise prices ranging between $15.50 and $28.97 per share, with a total weighted average exercise price per share of $17.25. The accelerated options included 866,329 options held by directors and executive officers and 173,137 held by other officers and employees. The accelerated vesting resulted in an additional $2.5 million of pro-forma net compensation expense in the fourth quarter of 2005. In addition, we recognized compensation expense in the amount of $30,000 in accordance with FASB Interpretation No. 44, *"Accounting for Certain Transactions involving Stock Compensation - an interpretation of APB Opinion No. 25"* ("FIN 44") during the fourth quarter of 2005.

As of December 31, 2006, there were 1,998 nonvested options with a related unrecognized compensation cost of $14,000 that consist entirely of options granted to our independent directors in March 2005. The remaining unrecognized compensation cost will be expensed over the next 15 months. During the year ended December 31, 2006, we recognized compensation expense of $11,000 for nonvested options.

To date, none of our outstanding options were granted on a backdated basis and it is against our policy to backdate option grants.

As of December 31, 2006, there was $2.1 million of total unrecognized compensation cost related to nonvested restricted shares that is expected to be recognized over a weighted-average period of 1.95

years. During the years ended December 31, 2006 and 2005, we recognized compensation expense of $1.0 million and $743,000, respectively, for nonvested restricted shares. The total fair value of restricted shares that vested during the years ended December 31, 2006 and 2005 was $1.5 million and $973,000, respectively.

Income Taxes

The provision for income taxes for the years ended December 31, 2006 and 2005 was an expense of $24.6 million and $16.9 million, respectively. The 2006 and 2005 provisions were calculated based on statutory tax rates. The increase in income taxes was predominantly driven by the increase in income before income taxes.

The components of income tax expense for the years ended December 31, 2006 and 2005 are set forth in the following table:

	Years Ended December 31,		
(in thousands)		**2006**	**2005**
Current provision	$	27,570	17,720
Deferred income tax benefit		(2,941)	(836)
Total income tax expense		24,629	16,884

Year Ended December 31, 2005 Compared to Year Ended December 31, 2004

Net income for the year ended December 31, 2005 was $15.9 million, or $0.53 diluted earnings per share, compared to $29.8 million, or $1.15 diluted earnings per share, for the year ended December 31, 2004. Returns on average equity and average assets for the year ended December 31, 2005 were 4.63% and 0.42%, respectively, compared to 11.70% and 1.16%, respectively, for the year ended December 31, 2004.

	Years Ended December 31,

Net Interest Income

Net interest income is the difference between interest earned on assets and interest incurred on liabilities.

The following table presents an analysis of net interest income by each major category of interest-earning assets and interest-bearing liabilities for the years ended December 31, 2005 and December 31, 2004:

	Years ended December 31,					
	2005			*2004*		
(dollars in thousands)	**Average Balance**	**Interest Income/ Expense**	**Average Yield/ Rate**	**Average Balance**	**Interest Income/ Expense**	**Average Yield/ Rate**

Net interest income / interest rate spread		99,142	2.70%		66,990	2.67%
Net interest margin			2.78%			2.72%
Ratio of average interest-earning assets to average interest-bearing liabilities			104.81%			107.25%

(1) Non-performing loans are included in average loan balances.

(2) Loan interest income includes net amortization of deferred fees and costs of approximately $1,615,000 and $911,000 for the years ended December 31, 2005 and 2004, respectively.

Interest income and interest expense are affected both by changes in the volume of interest-earning assets and interest-bearing liabilities and by changes in yields and interest rates. The tables below analyze the impact of changes in volume (changes in average outstanding balances multiplied by the prior period's rate) and changes in interest rate (changes in interest rates multiplied by the prior period's average balance). Changes that are caused by a combination of interest rate and volume are allocated proportionately to both changes in volume and changes in interest rate. For purposes of calculating the changes in our net interest income, non-performing assets are included in the appropriate balance and shown as a change due to rate.

	Year ended December 31, 2005 vs. 2004		
(in thousands)	**Change Due to Rate**	**Change Due to Volume**	**Total Change**

Total interest expense	$ 26,415	11,763	38,178

Net interest income for the year ended December 31, 2005 was $99.1 million, an increase of $32.2 million, or 48.0%, over the year ended December 31, 2004. The increase in net interest income over the twelve month period was largely driven by increases in average earnings assets and average deposits of $1.11 billion and $872.9 million, respectively, as well as an increase in net interest margin of six basis points to 2.78%.

Total average investment securities for the year ended December 31, 2005 were $2.72 billion compared to $1.92 billion for the year ended December 31, 2004. The overall yield on the securities portfolio for the year ended December 31, 2005 was 3.90%, up 60 basis points from the year ended December 31, 2004. Yield expansion in the twelve month period was primarily the result of investing new funds and cash flow from existing investments into higher yielding investments. Additionally, yields on the portfolio were also favorably affected by lower premium amortization and a more favorable market environment. Our portfolio primarily consists of high quality government agency mortgage-backed securities and collateralized mortgage obligations. We continue to mitigate extension risk through our overall strategy of purchasing relatively short duration securities that, by their nature, have lower yields. At December 31, 2005, the baseline average duration of our

investment securities portfolio was approximately 1.76 years, which is unchanged from December 31, 2004.

Total commercial loans and commercial mortgages averaged $587.8 million for the year ended December 31, 2005, an increase of $260.1 million or 79.4% over the year ended December 31, 2004. The average yield on this portfolio increased to 6.09%, up 167 basis points. The increase in average yield is mostly due to the increase in the Federal funds rate of 200 basis points that occurred throughout 2005 and a corresponding increase in our prime rate. In order to assist in monitoring and controlling credit risk, we primarily lend to existing clients with whom we have deposit and/or brokerage relationships. We target our lending to privately owned businesses, their owners and senior managers who are generally high net worth individuals who meet our credit standards. We primarily extend variable rate loans in which the interest rate fluctuates with a predetermined indicator such as the U.S. prime rate or LIBOR. Our use of variable rate loans is designed to reduce our exposure to risks associated with interest rate fluctuations.

We are an active participant in the SBA loan and SBA pool secondary market by purchasing, securitizing, and selling the guaranteed portions of SBA Section 7(a) loans. Once purchased, we typically warehouse the guaranteed loan for approximately 30 to 180 days and classify them as loans held for sale. From this warehouse we aggregate like SBA loans by similar characteristics into pools for securitization to the secondary market. The timing of the purchase and sale of such loan pools drives the quarter-to-quarter fluctuations in average balances of loans held for sale, which averaged $77.5 million and $72.2 million for the years ended December 31, 2005 and 2004, respectively. Most SBA Section 7(a) loans have adjustable rates and float at a spread to the prime rate.

Average total deposits and borrowings grew $1.11 billion, or 48.5%, to $3.41 billion during the year ended December 31, 2005 from $2.29 billion for the year ended December 31, 2004. Overall cost of funding was 1.71% during 2005, increasing 83 basis points from 88 basis points in 2004.

For the year ended December 31, 2005, average non-interest-bearing demand deposits were $891.1 million as compared to $640.7 million for the year ended December 31, 2004, an increase of $250.4 million, or 39.1%. Non-interest-bearing demand deposits continue to represent a significant component of our deposit mix, representing 36.6% of all deposits at December 31, 2005. Additionally, average NOW and interest-bearing checking and money market accounts totaled $1.76 billion for the year ended December 31, 2005, an increase of $495.3 million, or 39.1%, over the year ended December 31, 2004. These core deposits have provided us with a source of stable, low cost funding which has positively affected our net interest margin and income. Average time deposits, which were relatively short-term in nature and totaled $261.2 million for the year ended December 31, 2005, carried an average cost of 2.95%. We do not actively compete for such time deposits as our experience indicates that clients in this market are typically attracted by rate as opposed to service, thereby making such deposits more costly than our average core deposits.

For the year ended December 31, 2005, average total borrowings were $491.6 million compared to $251.8 million for the year ended December 31, 2004, an increase of $239.8 million or 95.2%. The average cost of total borrowings was 3.23% and 1.70% for the years ended December 31, 2005 and 2004, respectively. The increase in average cost of total borrowings for the year ended December 31, 2005, compared to the year ended December 31, 2004, is mostly attributable to the increase in prevailing short-term market interest rates during 2005. At December 31, 2005, total borrowings represent approximately 12.5% of all funding compared to 13.4% at December 31, 2004.

Allowance for Loan Losses

The allowance for loan losses increased $2.4 million to $10.1 million for the year ended December 31, 2005 from $7.7 million for the year ended December 31, 2004. This increase is primarily due to an increase in loans outstanding and increased specific reserves mostly related to one classified loan. This loan was restructured in January 2006, which resulted in additional collateral and an anticipated significant paydown within the next 12 months.

The following table allocates the allowance for loan losses based on our judgment of inherent losses in each respective area according to our methodology for allocating reserves.

	December 31,			
	2005		2004	
(dollars in thousands)	Amount	% to Total Allowance by Category	Amount	% to Total Allowance by Category
Risk rated commercial and industrial loans and commercial real estate loans	$ 9,435	93.88%	6,488	84.70%
Residential mortgages	72	0.72%	73	0.95%
Home equity lines of credit	69	0.69%	49	0.64%
Consumer and other	474	4.71%	1,050	13.71%
Total	$ 10,050	100.00%	7,660	100.00%

Non-Interest Income

For the year ended December 31, 2005, non-interest income was $18.7 million, a decrease of $4.3 million or 18.5% when compared with 2004. This decrease was primarily the result of a decrease of $8.9 million in net gains on sales of securities and loans. In 2004, there were four sales of SBA interest only strip securities for net gains of $9.3 million compared to no sales in 2005. The decrease was partially offset by increases of $1.2 million in commissions from brokerage activities, $1.6 million in fees and service charges and $1.9 million in other income. The increases in commissions from brokerage activities and fees and service charges are reflective of our growth in clients and client activity. The increase in other income is due to the purchase of a $50 million bank owned life insurance policy on January 3, 2005. Income from this policy is recorded as other income.

Non-Interest Expense

Non-interest expense increased $23.3 million, or 39.8%, to $81.8 million for the year ended December 31, 2005 from $58.5 million for the year ended December 31, 2004.

The increase in non-interest expense was primarily driven by increases in salaries and benefits, which were $52.1 million for the year ended December 31, 2005, an increase of $17.5 million from $34.6 million for the year ended December 31, 2004. Included in this increase is the expense of a special one-time bonus payment of cash and stock totaling $12.0 million directly contributed by Bank Hapoalim, our former parent company, which is reflected in our statement of operations. The remainder of the increase was mainly caused by the addition of eight new private client groups. At December 31, 2005, we had 347 employees compared to 296 employees at December 31, 2004.

Occupancy and equipment expense increased $1.9 million to $7.3 million in 2005. This increase was predominantly due to the addition of three private client offices during the year. At December 31, 2005, we had 15 private client offices compared to 12 at December 31, 2004.

Other general and administrative expenses for the year ended December 31, 2005 were $22.4 million, an increase of $3.9 million, or 20.8%, from $18.5 million for the year ended December 31, 2004. The increase in other general and administrative expenses is principally attributable to an increase of $534,000 in data processing expenses. This increase is attributable to volume-related operational costs required for our expanding business. Additionally, professional fees increased $1.0 million predominantly due to the cost of compliance with section 404 of the Sarbanes-Oxley Act. There

was also an increase of $559 thousand in depreciation expense on leasehold improvements, furniture and fixtures and equipment. This increase was the result of the opening of new locations in 2005 and 2004.

Income Taxes

The provision for income taxes for the years ended December 31, 2005 and 2004 was an expense of $16.9 million and a benefit of $1.7 million, respectively. The 2005 provision was calculated based on statutory tax rates. The 2004 provision was calculated based on statutory tax rates, average assets and alternative minimum taxes. During the second quarter of 2004, we recognized a deferred tax asset in the amount of $17.1 million in accordance with SFAS No. 109, "*Accounting for Income Taxes.*" Of the total amount of deferred tax asset, $9.8 million was recognized in current period earnings with the remainder of $7.3 million recognized in other comprehensive income as it related to the mark-to-market of available-for-sale securities. We determined that it was no longer necessary to carry a valuation allowance against our deferred tax asset as we determined that it was more likely than not that the tax asset would be utilized in future periods. We were profitable in the second half of 2004 and sustained profitability during 2005 thus incurring income tax expense over those periods. In 2005, the net effect of the utilization of deferred tax assets and current period taxes on earnings resulted in an income tax expense for the year in the amount of $16.9 million.

The components of income tax expense (benefit) for the years ended December 31, 2005 and 2004 are set forth in the following table:

	Years Ended December 31,	
(in thousands)	**2005**	**2004**
Current provision	$ 17,720	2,940
Deferred income tax benefit	(836)	(4,661)
Total income tax expense (benefit)	$ 16,884	(1,721)

Financial Condition

Securities Portfolio

Securities are designated as either held-to-maturity or available-for-sale on purchase based upon various factors, including asset/liability management strategies, liquidity and profitability objectives and regulatory requirements. Held-to-maturity securities are carried at cost and adjusted for amortization of premiums or accretion of discounts. Available-for-sale securities are securities that may be sold prior to maturity, based upon asset/liability management decisions. Securities identified as available-for-sale are carried at fair value. Unrealized gains or losses on available-for-sale securities are recorded in accumulated other comprehensive income (loss) in shareholders' equity. Amortization of premiums or accretion of discounts on mortgage-backed securities is periodically adjusted for estimated prepayments.

At December 31, 2006, our total securities portfolio was $3.04 billion compared to $2.97 billion at December 31, 2005. The $66.0 million increase is primarily the result of the investment of additional deposits. Our portfolio primarily consists of government agency mortgage-backed securities and collateralized mortgage obligations. The mortgage-backed portfolio primarily consists of adjustable hybrid securities with modest, fixed rate balloon and seasoned 15-year structure positions. The collateralized mortgage obligations portion of our portfolio primarily consists of short duration planned amortization and current pay sequential structures. The commercial mortgage-backed portfolio mainly consists of AAA rated securities collateralized by commercial and multifamily real estate with

subordinated credit enhancement. Our asset-backed portfolio primarily consists of intermediate term fixed rate AAA and variable rate A rated credit card, auto and home equity collateralized securities. Overall, approximately 99% of our securities portfolio had an A credit rating or better, with 89% being rated AAA.

Unrealized depreciation net of tax on available-for-sale securities decreased $2.5 million, or 10.7%, from $23.1 million at December 31, 2005 to $20.6 million at December 31, 2006. Refer to Notes 3 and 4 to the Consolidated Financial Statements for further details.

The baseline average duration of the investment portfolio was 2.01 years at December 31, 2006. The weighted average life of the investment portfolio was 2.53 years at December 31, 2006. The estimated effect of possible changes in interest rates on our earnings and equity is discussed below under "Quantitative and Qualitative Disclosures About Market Risk."

The following table summarizes the components of our available-for-sale and held-to-maturity securities portfolios at December 31, 2006, 2005 and 2004:

	December 31,					
	2006		*2005*		*2004*

Premiums, deferred fees, and costs	6,667		11,146		8,391		9,653		6,717	
Total	$1,703,596		$1,143,548		$ 683,930		$ 506,710		$ 299,669	

Total loans increased by $560.0 million, or 49.0%, to $1.70 billion at December 31, 2006, from $1.14 billion at December 31, 2005. Our total loan-to-deposit ratio, excluding loans held for sale and associated premiums on those loans, increased to 37.5% at December 31, 2006 from 28.8% at December 31, 2005. The increase in loans reflects the successes of our established private client teams, as well as the commercial real estate lending initiative that began in the third quarter of 2005. Additionally, several of the recently hired teams bring us clients that present greater lending opportunities. We continue generally to restrict lending to existing clients with whom we have deposit or brokerage relationships to assist us in monitoring and controlling credit risk.

At December 31, 2006, loans fully secured by cash and marketable securities represented 13.6% of outstanding loan balances. The SBA portfolio, consisting only of the guaranteed portion of the SBA loans, represented 7.1% of outstanding loan balances. Our fully unsecured loan portfolio represented 16.3% of our total outstanding loan portfolio at December 31, 2006. We generally limit unsecured lending for consumer loans to private clients who we believe possess ample net worth, liquidity and repayment capacity. The remainder of our loans are secured by real estate, company assets, personal assets and other forms of collateral.

The following loan table presents commercial loans and commercial mortgages and loans at fixed and variable rates, by maturity for the periods indicated:

	As of December 31, 2006			
(in thousands)	**Within One Year**	**One to Five Years**	**After Five Years**	**Total**
Commercial loans and commercial mortgages	$ 746,163	339,524	196,170	1,281,857
Loans at fixed rates	73,133	161,000	179,287	413,420
Loans at variable rates	673,030	178,524	16,883	868,437

Deferred Tax Asset/Liability

In accordance with SFAS No. 109 "*Accounting for Income Taxes*" and after considering all available positive and negative evidence pursuant to Paragraph 25 of SFAS No. 109, management concluded that a valuation allowance is not necessary because it was more likely than not that the deferred tax assets would be utilized. We will continue to monitor the need for a valuation allowance going forward; however, we do not expect to need one. Net deferred tax assets are reflected in other assets in our consolidated statements of financial condition.

The components of the net deferred tax asset at December 31, 2006 and 2005 are set forth in the following table:

	December 31,	
(in thousands)	**2006**	**2005**
DEFERRED TAX ASSETS		
Loan loss provision	$ 6,059	4,354
Depreciation	486	251
Unearned compensation - restricted shares	393	273
Non-accrual interest	584	354
Other	1,118	586
Total deferred tax assets recognized in earnings	8,640	5,818
Mark-to-market on available for sale securities	16,383	18,424
Total deferred tax assets	25,023	24,242
DEFERRED TAX LIABILITY		
Prepaid expenses	201	321
Total deferred tax liability recognized in earnings	201	321
Net deferred tax asset	$ 24,822	23,921

Deferred tax assets arise from expected future tax benefits attributable to temporary differences and carry-forwards. Deferred tax liabilities arise from expected future tax expense attributable to temporary differences. Temporary differences are defined as differences between the tax basis of an asset or liability and its reported amount in the financial statements that will result in taxable or deductible amounts in future years. Carry-forwards are defined as deductions or credits that cannot be currently utilized for tax purposes that may be carried forward to reduce taxable income or taxes payable in a future year.

Deposits

The market for deposits continues to be very competitive. We primarily focus our deposit gathering efforts in the greater New York metropolitan area market with money center banks, regional banks and community banks as our primary competitors. We distinguish ourselves from competitors by focusing only on our target market. This niche approach, coupled with our relationship-banking model, provides our clients with a personalized service, which we believe gives us a competitive advantage.

We offer a variety of deposit products to our clients at interest rates that are competitive with other banks. Our business deposit products include commercial checking accounts, escrow deposit accounts, money market accounts, lockbox accounts, cash concentration accounts and other cash management products. Our personal deposit products include checking accounts, money market accounts and time deposits. We also allow our personal and business deposit clients to access their accounts, transfer funds, pay bills and perform other account functions over the Internet and through ATM machines. At December 31, 2006, we maintained approximately 39,500 deposit accounts representing $4.21 billion in total deposits compared to approximately 34,500 accounts and $3.49 billion in total deposits at December 31, 2005. This increase is primarily due to the deposit gathering efforts of our private client teams.

The following tables set forth information regarding the composition of our deposits and deposit products as of December 31, 2006 and 2005:

	December 31,	
(in thousands)	**2006**	**2005**
Demand - non-interest-bearing	$ 1,586,440	1,277,207
NOW	261,788	212,526
Money market and other	2,003,913	1,670,565
Time deposits less than $100,000	25,517	21,446
Time deposits equal to or greater than $100,000	333,501	305,989
Total deposits	$ 4,211,159	3,487,733

The following table presents a summary of our average deposits and average interest rates accrued as of the dates indicated:

	Years ended December 31,			
	2006		*2005*	
(dollars in thousands)	**Average Balance**	**Average Rate**	**Average Balance**	**Average Rate**
NOW and interest-bearing checking accounts	$ 236,286	1.61%	202,415	0.71%
Money market accounts	1,804,086	3.51%	1,559,905	2.14%
Time deposits	295,957	4.37%	261,168	2.95%
Non-interest-bearing deposits	1,060,882	-	891,059	-
Total deposits	$ 3,397,211	2.36%	2,914,547	1.46%

Included in deposits at December 31, 2006 and 2005 were approximately $550.3 million and $293.6 million, respectively, of short-term escrow deposits. We have developed a core competency in catering to the needs of law firms, accounting firms, and title companies, which allows us to obtain from our clients both on-balance sheet and off-balance sheet short-term escrow deposits that banks of our size typically do not attract.

The following table presents time deposits of $100,000 or more by their maturity as of December 31, 2006:

(dollars in thousands)	**December 31, 2006**
Three months or less	$ 251,455
Over three months through 12 months	69,441
Over one year through three years	11,280
Over three years	1,325

The following tables set forth information regarding the mix of our deposits and deposit products as of December 31, 2006 and 2005:

	December 31,			
	2006		*2005*	
(dollars in thousands)	**Amount**	**Percentage**	**Amount**	**Percentage**
Personal demand deposit accounts	$ 412,058	9.78%	$ 140,944	4.04%
Business demand deposit accounts	1,174,382	27.89%	1,136,263	32.58%
Rent security	13,982	0.33%	12,901	0.37%
Personal NOW	33,690	0.80%	6,433	0.18%
Business NOW	228,098	5.42%	206,093	5.92%

Business	3,314,295	78.70%	2,907,101	83.36%
Total	$ 4,211,159	100.00%	$ 3,487,733	100.00%

Borrowings

The following table sets forth certain information regarding our borrowings:

	At or for the year ended December 31,					
	2006		2005		2004	
(dollars in thousands)	**Amount**	**Weighted Average Rate**	**Amount**	**Weighted Average Rate**	**Amount**	**Weighted Average Rate**
Federal Home Loan Bank advances	$ 260,000	4.53%	$ 220,000	3.72%	$ 285,000	2.46%
Repurchase agreements	467,000	4.62%	195,000	3.74%	115,000	2.52%
Federal funds purchased	-	-	65,000	4.01%	-	-
Other short-term borrowings	6,687	4.99%	20,000	4.03%	-	-
Total borrowings	$ 733,687	4.59%	$ 500,000	3.78%	$ 400,000	2.48%
Maximum total outstanding at any month-end	$ 927,594		$ 564,795		$ 400,000	
Average balance	$ 824,024		$ 491,613		$ 251,803	
Average rate		4.56%		3.23%		1.70%

At December 31, 2006, borrowings were 14.8% of our funding liabilities. These borrowings are collateralized by our mortgage-backed and collateralized mortgage obligation securities. We also hold $17.0 million in Federal Home Loan Bank of New York capital stock as required collateral for our outstanding borrowing position with the FHLB. Based on our existing financial condition, asset size and available collateral, our additional borrowing capacity with the FHLB totals $1.09 billion at December 31, 2006. Additional borrowing capacity on existing repurchase agreement lines totals $1.70 billion at December 31, 2006.

The following table shows the maturity or re-pricing of our borrowings at December 31, 2006.

(in thousands)

Maturity or repricing period:

3 months or less	**3 - 12 months**	**1 - 3 years**	**Over 3 years**	**Total**
$ 288,687	30,000	190,000	225,000	733,687

Credit Quality

Non-performing Assets

Non-performing assets are comprised of non-performing loans. At December 31, 2006, we had $8.8 million in non-performing assets, which primarily consisted of two non-performing loans. One loan was paid-off in January 2007, which resulted in a $3.7 million reduction in non-performing loans. At December 31, 2005 and 2004, we had $8.8 million and $6.1 million, respectively, in non-performing assets, which primarily consisted of two non-performing loans.

Loans are generally placed in non-accrual status upon becoming 90 days past due as to interest or principal. Single family property loans are placed in non-accrual status after becoming three payments past due as to interest or principal. There were no single family loans past due and non-accruing at December 31, 2006 and 2005. Generally, consumer loans that are not secured by real estate are placed in non-accrual status when deemed uncollectible. Such loans are generally charged off when they reach 180 days past due.

At the time a loan is placed in non-accrual status, the accrued but uncollected interest receivable is reversed and accounted for on a cash recovery method thereafter, until qualifying for return to accrual status. Management's classification of a loan as non-accrual does not necessarily indicate that the principal of the loan is uncollectible in whole or in part.

Additional interest income of $741,000, $671,000 and $265,000 would have been recorded for the years ended December 31, 2006, 2005 and 2004, respectively, had all loans been accruing according to their original terms. As of December 31, 2006, 2005 and 2004 there were $4.0 million, $2.2 million and $0, respectively, of loans 90 days past due and still accruing.

At December 31, 2006, there was one loan for $3.7 million that was restructured as troubled debt, and there was no commitment to lend additional funds to this debtor. This loan was partially paid-off in January 2007, which resulted in a charge to earnings of $807,000. This charge-off amount had been reserved for in accordance with SFAS No. 114 at December 31, 2006. There were no troubled debt restructurings December 31, 2005 and 2004.

Summary of Loan Loss Experience

The provision for loan losses is a charge to earnings to maintain the allowance for loan losses at a level consistent with management's assessment of the loan portfolio in light of current economic conditions and market trends. We recorded a provision of $4.1 million for the year ended December 31, 2006, $3.3 million for the year ended December 31, 2005 and $3.4 million for the year ended December 31, 2004. These provisions were made to reflect management's assessment of the inherent and specific risk of loan losses relative to the growth of the portfolio.

The allowance for loan losses is comprised of specific reserves for impaired loans and a pooled formula estimate of losses inherent in the portfolio at the balance sheet date. We regularly evaluate our allowance for loan losses to maintain an allowance that we believe is appropriate based on estimated inherent and specific losses. Factors contributing to the determination of specific reserves include the creditworthiness of the borrower and, more specifically, changes in the expected future receipt of principal and interest payments and/or in the value of pledged collateral. All loans considered for our watch list are specifically reviewed for impairment as appropriate. A reserve is recorded on impaired loans when the carrying amount of the loan exceeds the discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral-dependent loans. We consider all loans on our watch list (generally rated substandard or worse) to be potential problem loans. For purposes of determining the pooled formula reserve, the portfolio is segregated by product types to recognize differing risk profiles among categories, and then further segregated by credit grades. Credit grades are assigned to all loans greater than $250,000. Each credit grade is assigned a risk factor or reserve allocation percentage. These risk factors are multiplied by the outstanding principal balance and risk-weighted by product type to calculate the reserve amount.

The risk factor or reserve allocation percentages assigned to each credit grade have been developed based on an analysis of our historical loss rates and loss rates at selected peer banks and industry data, adjusted for certain qualitative factors, and on our management's experience.

Qualitative adjustments for such factors as national and local economic conditions, market interest rates, changes in credit policies and lending standards, and changes in the trend and severity of problem loans can cause the estimation of inherent losses to differ from past experience. In addition, the reserve considers the results of reviews performed by independent third-party reviewers as reflected in their confirmation of assigned credit grades within the portfolio.

The methodology used in the periodic review of reserve adequacy, which is performed at least quarterly, is designed to be dynamic and responsive to changes in portfolio credit quality and inherent credit losses. The changes are reflected in both the pooled formula reserve and in specific reserves as the collectibility of larger classified loans is regularly recalculated with new information as it becomes available. As our portfolio matures, historical loss ratios are closely monitored. Eventually, our reserve adequacy analysis will rely more on our own loss history and less on the experience of our management and peer banks. Currently, the review of reserve adequacy is performed by our senior management, assessed by a credit review function, and presented to our Board of Directors for their review, consideration and ratification on a quarterly basis.

The allowance for loan losses totaled $13.8 million at December 31, 2006, $10.1 million at December 31, 2005 and $7.7 million at December 31, 2004. This represents 0.88%, 1.00% and 1.34% of total loans (excluding loans held for sale) at December 31, 2006, 2005 and 2004, respectively.

The table below presents a summary of our loan loss experience in 2006, 2005, 2004, 2003 and 2002.

(in thousands)	**2006**	**2005**	**2004**	**2003**	**2002**
Charge-offs	$ 383	949	56	160	24
Recoveries	17	29	38	48	3
Net charge-offs	$ 366	920	18	112	21

Allowance for Loan Losses

The following table allocates the allowance for loan losses in the respective area based on our methodology for allocating reserves.

	December 31,									
	2006		*2005*		*2004*		*2003*		*2002*	
(dollars in thousands)	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**
Risk rated commercial and industrial loans and commercial real estate loans	$13,119	94.87%	$ 9,435	93.88%	$ 6,488	84.70%	$ 4,104	94.93%	$ 2,259	93.93%
Residential mortgages	163	1.18%	72	0.72%	73	0.95%	52	1.20%	24	1.00%
Home equity lines of credit	85	0.61%	69	0.69%	49	0.64%	24	0.56%	7	0.29%
Consumer and other	462	3.34%	474	4.71%	1,050	13.71%	143	3.31%	115	4.78%
Total	$13,829	100.00%	$10,050	100.00%	$ 7,660	100.00%	$ 4,323	100.00%	$ 2,405	100.00%

Contractual Obligations

The following table sets forth our significant contractual obligations as of December 31, 2006:

	Payments due by period				
(in thousands)	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years	Total
Information technology contract	$ 2,964	5,928	5,928	4,446	19,266
Borrowings	36,687	215,000	377,000	105,000	733,687
Operating leases	6,492	13,040	11,590	22,570	53,692
Total contractual cash obligations	$ 46,143	233,968	394,518	132,016	806,645

Off-Balance Sheet Arrangements

In the normal course of business, we have various outstanding commitments and contingent liabilities that are not reflected in the accompanying consolidated financial statements.

We enter into transactions that involve financial instruments with off-balance sheet risks in the ordinary course of business to meet the financing needs of our clients. Such financial instruments include commitments to extend credit, standby letters of credit, and unused balances under confirmed letters of credit, all of which are primarily variable rate. Such instruments involve, to varying degrees, elements of credit and interest rate risk.

Our exposure to credit loss in the event of nonperformance by the other party with regard to financial instruments is represented by the contractual notional amount of those instruments. Financial instrument transactions are subject to our normal credit policies and approvals, financial controls and risk limiting and monitoring procedures. We generally require collateral or other security to support financial instruments with credit risk.

A summary of commitments and contingent liabilities as of December 31, 2006 and 2005 is as follows:

	December 31,	
(in thousands)	2006	2005
Unused commitments to extend credit	$ 380,976	304,767
Financial standby letters of credit	128,296	76,043
Commercial and similar letters of credit	24,908	11,653
Other	822	587
Total	$ 535,002	393,050

Commitments to extend credit consist of agreements having fixed expiration or other termination clauses and may require payment of a fee. The total commitment amounts may not necessarily represent future cash requirements. We evaluate each client's creditworthiness on a case-by-case basis. The amount of collateral we obtain, if deemed necessary upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include deposits held in financial institutions, commercial properties, residential properties, accounts receivable, property, plant and equipment and inventory.

In accordance with FIN No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others and Interpretation of FASB Statements No. 5, 57 and 197 and Rescission of FASB No. 34," we recognize a liability at the inception of the guarantee that is equivalent to the fee received from the guarantor. This liability is amortized over the life of the guarantee on a straight-line basis. At December 31, 2006 and December 31, 2005, we had deferred revenue for commitment fees paid for the issuance of standby letters of credit in the amounts of $511,000 and $314,000, respectively. None of these commitments was to creditors that are considered sub-standard; therefore, a reserve for off-balance sheet credit losses has not been established.

Standby letters of credit are conditional commitments issued by us to guarantee the performance of a client's obligation to a third party. They are primarily used to support clients' business trade transactions and may require payment of a fee. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to clients.

At December 31, 2006 and December 31, 2005, we had commitments to sell loans of $960,000 and $119,000, respectively.

Capital Resources

As a New York state-chartered bank, we are required to maintain minimum levels of regulatory capital. These standards generally are as stringent as the comparable capital requirements imposed on national banks. The FDIC is also authorized to impose capital requirements in excess of these standards on individual banks on a case-by-case basis.

We are required by FDIC regulations to maintain a minimum ratio of qualifying total capital to total risk-weighted assets (including off-balance sheet items) of 8%, at least one-half of which must be in the form of Tier 1 capital, and a ratio of Tier 1 capital to total risk-weighted assets of 4%. Tier 1 capital is generally defined as the sum of core capital elements less goodwill and certain other deductions. Core capital includes common shareholders' equity, non-cumulative perpetual preferred stock and minority interests in equity accounts of consolidated subsidiaries. Supplementary capital, which qualifies as Tier 2 capital and counts towards total capital subject to certain limits, includes allowances for loan losses, perpetual preferred stock, subordinated debt and certain hybrid instruments.

We are also required to maintain a certain leverage capital ratio - the ratio of Tier 1 capital (net of intangibles) to adjusted total assets. Banks that have received the highest rating of five categories used by regulators to rate banks and are not anticipating or experiencing any significant growth must maintain a leverage capital ratio of at least 3.0%. All other institutions must maintain a minimum leverage capital ratio of 4.0%.

For an institution to be considered "well capitalized" by the FDIC, it must maintain a minimum leverage capital ratio of 5.0% and a minimum risk-based capital ratio of 10.0%, of which at least 6.0% must be Tier 1 capital.

The actual capital amounts and ratios set forth in the following table demonstrate that we are "well capitalized" under the capital adequacy guidelines outlined above:

	Actual		*Required for Capital Adequacy Purposes*		*Required to be Well Capitalized*	
(dollars in thousands)	**Amount**	**Ratio**	**Amount**	**Ratio**	**Amount**	**Ratio**
As of December 31, 2006:						
Total capital (to risk-weighted assets)	$426,494	16.73%	$203,983	8.00%	$254,979	10.00%
Tier I capital (to risk-weighted assets)	412,665	16.18%	101,991	4.00%	152,987	6.00%
Tier I leverage capital (to average assets)	412,665	8.41%	196,236	4.00%	245,295	5.00%
As of December 31, 2005:						
Total capital (to risk-weighted assets)	$378,068	20.08%	$150,621	8.00%	$188,277	10.00%
Tier I capital (to risk-weighted assets)	368,018	19.55%	75,311	4.00%	112,966	6.00%
Tier I leverage capital (to average assets)	368,018	8.67%	169,702	4.00%	212,128	5.00%

Liquidity

Liquidity is the measurement of our ability to meet our cash needs. Our objective in managing liquidity is to maintain our ability to meet loan commitments, meet deposit withdrawals, purchase investments and pay other liabilities in accordance with their terms, without an adverse impact on our current or future earnings. Our liquidity management is guided by policies developed and monitored by our asset/liability management committee. The asset/liability management committee consists of, among others, the Chairman, the President and Chief Executive Officer, the Vice-Chairman, the Chief Financial Officer and the Treasurer. These policies take into account the marketability of assets, the source and stability of deposits, our wholesale borrowing capacity and the amount of loan commitments. For the years ended December 31, 2006, 2005 and 2004, our primary source of liquidity has been core deposit growth.

Additionally, we have borrowing sources available to supplement deposit flows. These borrowing sources include the FHLB and securities sold under repurchase agreements.

Credit availability at the FHLB is based on our financial condition, asset size and the amount of collateral we hold at the FHLB. At December 31, 2006, our FHLB borrowings included $260.0 million in advances with an average rate of 4.53% that mature by December 1, 2016.

Also, we have repurchase agreement lines with leading financial institutions totaling $2.17 billion. At December 31, 2006 we had $467 million of securities sold under a repurchase agreement to various institutions.

Based on our financial condition, our asset size, the amount of collateral we hold at FHLB and the available capacity under our repurchase agreement lines, we estimate our additional combined borrowing capacity to be approximately $2.79 billion as of December 31, 2006.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is defined as the sensitivity of income, fair market values and capital to changes in interest rates, foreign currency exchange rates, commodity prices and other relevant market prices and rates. The primary risk to which we are exposed is interest rate movement inherent in our lending, investment management, deposit taking and borrowing activities. Substantially all of our interest rate risk arises from these activities entered into for purposes other than trading.

The principal objective of asset/liability management is to manage the sensitivity of net income to changes in interest rates. Asset/liability management is governed by policies approved by our Board of Directors. Our Board of Directors has delegated the day-to-day oversight of this function to our asset/liability management committee. Senior management and our Board of Directors, on an ongoing basis, review our overall interest rate risk position and strategies.

Interest Rate Risk Management

Our asset/liability management committee seeks to manage our interest rate risk by structuring our balance sheet to maximize net interest income while maintaining an acceptable level of risk exposure to changes in market interest rates. The achievement of this goal requires a balance among liquidity, interest rate risk and profitability considerations. The committee meets regularly to review the sensitivity of assets and liabilities to interest rate changes, deposit rates and trends, the book and market values of assets and liabilities, unrealized gains and losses, purchase and sales activities and the maturities of investments and borrowings.

We use various asset/liability strategies to manage and control the interest rate sensitivity of our assets and liabilities. The strategies include pricing of loans and deposit products, adjusting the terms of loans and borrowings and managing the deployment of our securities and short-term assets to reduce or increase the mismatches in interest rate re-pricing.

To effectively measure and manage interest rate risk, we use simulation analysis to determine the impact on net interest income under various interest rate scenarios. Based on these simulations, we quantify interest rate risk and develop and implement appropriate strategies. At December 31, 2006, we used a simulation model to analyze net interest income sensitivity to a parallel and sustained shift in interest rates derived from the current treasury and LIBOR yield curves. For rising and falling interest rate scenarios, the base market interest rate forecast was increased and decreased by 100 and 200 basis points.

The interest rate sensitivity of net interest income, forecasted for one year based on balances at December 31, 2006, is reflected in the following table:

(dollars in thousands)	Adjusted Net Interest Income	Percentage Change from Base
Interest Rate Scenario:		
Up 200 basis points	$ 130,624	(9.11)
Up 100 basis points	137,497	(4.32)
Base	143,710	-
Down 100 basis points	147,030	2.31
Down 200 basis points	142,670	(0.72)

We also use a simulation model to measure the impact market interest rate changes will have on the net present value of assets and liabilities, which is defined as market value of equity. At

December 31, 2006, we used a simulation model to analyze the market value of equity sensitivity to a parallel and sustained shift in interest rates derived from the current treasury and LIBOR yield curves. For rising and falling interest rate scenarios, the base market interest rate forecast was increased and decreased by 100 and 200 basis points.

The following table indicates the sensitivity of market value of equity to the interest rate movements described above:

(dollars in thousands)		**Sensitivity**	**Percentage Change from Base**
Interest Rate Scenario:			
Up 200 basis points	$	(94,870)	(15.35)
Up 100 basis points		(47,290)	(7.65)
Base		-	-
Down 100 basis points		39,790	6.44
Down 200 basis points		59,036	9.55

The computation of prospective effects of hypothetical interest rate changes is based on numerous assumptions, including relative levels of interest rates, asset prepayments, deposit decay and changes in re-pricing levels of deposits to general market rates, and should not be relied upon as indicative of actual results. Further, the computations do not take into account any actions that we may undertake in response to future changes in interest rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

For our Consolidated Financial Statements, see index on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The Company’s management, with the participation of the Company’s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company’s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. Based on such evaluation, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company’s disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act, including this report.

a) Management's Report on Internal Control over Financial Reporting

The management of Signature Bank (the "Company") is responsible for establishing and maintaining effective internal control over financial reporting. Our system of internal control is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

Internal control over financial reporting includes procedures that pertain to the maintenance of records that, in reasonable detail, accurately reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are made only in accordance with the authorization of management and the Board of Directors; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on our consolidated financial statements.

All internal control systems, no matter how well designed, have inherent limitations, including the possibility of human error and the circumvention of controls. Furthermore, because of changes in conditions, the effectiveness of internal control may vary over time. Accordingly, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Since these limitations are known features of the financial reporting process, however, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

As of December 31, 2006, management evaluated the effectiveness of internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management believes that the Company's internal control over financial reporting as of December 31, 2006 is effective using these criteria.

Management's evaluation of the effectiveness of internal control over financial reporting as of December 31, 2006 has been audited by KPMG LLP, an independent registered public accounting firm that has also audited the Company's consolidated financial statements as of and for the year ended December 31, 2006.

b) Report of Independent Registered Public Accounting Firm

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Signature Bank:

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that Signature Bank and subsidiaries (the "Company") maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Signature Bank maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also, in our opinion, Signature Bank maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of Signature Bank and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2006, and our report dated February 28, 2007 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Signature Bank:

We have audited the accompanying consolidated statements of financial condition of Signature Bank and subsidiaries (the "Company") as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2006. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Signature Bank and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2007 expressed an unqualified opinion on management's assessment of, and the effective operation of, internal control over financial reporting.

Additional income taxes that would have been paid during the year in the absence of the stock-based compensation related benefit	1,866	-	-

See accompanying notes to consolidated financial statements.

SIGNATURE BANK

Notes to Consolidated Financial Statements

December 31, 2006, 2005 and 2004

(1) Organization

Signature Bank and subsidiaries (the "Bank") is a New York State chartered bank, which received its charter from the New York State Banking Department on April 5, 2001. We commenced business on May 1, 2001.

Signature Securities Group Corporation ("SSG" or "Signature Securities") was incorporated on May 26, 2000 in the State of New York and is a registered broker and dealer in securities under the Securities Exchange Act of 1934 and a member of the National Association of Securities Dealers, Inc.

(2) Summary of Significant Accounting Policies

(a) Basis of Presentation and Consolidation

The accompanying consolidated financial statements of the Bank have been prepared in accordance with U.S. generally accepted accounting principles and practices within the banking industry. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to the current year presentation.

(b) General Accounting Policy

The accompanying consolidated financial statements are presented on the accrual basis of accounting.

(c) Management's Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

(d) Cash and Cash Equivalents

For the purpose of presentation in the statements of cash flows, we have defined cash and cash equivalents as cash and due from banks and short-term investments with original maturities of 90 days or less. Short-term investments consist of Federal funds sold, interest-bearing deposits with banks and money market mutual funds.

Cash and cash equivalents at December 31, 2006 consisted of cash and due from banks of $150.2 million, Federal funds sold of $310.0 million, interest-bearing deposits with banks of $8.7 million and Fidelity U.S. Government money market funds of $1.9 million.

We are required by the Federal Reserve System to maintain non-interest bearing cash reserves equal to a percentage of certain deposits. The reserve requirement amounted to $38.3 million and $34.1 million at December 31, 2006 and 2005, respectively.

(e) Securities Available-for-Sale

The designation of a security as available-for-sale is made at the time of acquisition. The available-for-sale classification includes debt and equity securities which are carried at estimated fair

value. Unrealized gains or losses on securities available-for-sale are included as a separate component of shareholders' equity. Amortization of premiums and accretion of discounts are recognized using the level yield method. Realized gains and losses on sales of securities are computed using the specific identification method.

(f) Securities Held-to-Maturity

The designation of a security as held-to-maturity is made at the time of acquisition. Securities that we have the positive intent and ability to hold to maturity are classified as held-to-maturity and carried at amortized cost. Amortization of premiums and accretion of discounts are recognized using the level yield method.

(g) Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to current earnings. Gains or losses resulting from sales of loans held for sale, net of unamortized deferred fees and costs, are recognized at the time of sale and are included under the caption "Net gains on sales of securities and loans" in the Consolidated Statements of Operations.

(h) Loans, Net

Loans are carried at the principal amount outstanding, less unearned discounts, net of deferred loan origination fees and costs and the allowance for loan losses. Unearned income and net deferred loan fees and costs are accreted into interest income over the loan term, using the straight-line method which approximates the level yield method.

The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured or in process of collection. Other personal loans are typically charged-off no later than 180 days past due. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest previously accrued but not collected for loans that are placed on non-accrual or charged-off are reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

(i) Allowance for Loan Losses

The total allowance for loan losses includes activity related to allowances calculated in accordance with Statement of Financial Accounting Standards (SFAS) No. 114, *Accounting by Creditors for Impairment of a Loan*, and SFAS No. 5, *Accounting for Contingencies*. The allowance for loan losses is established through a provision for loan losses charged to current earnings. The amount maintained in the allowance reflects management's continuing evaluation of losses inherent in the loan portfolio. The allowance for loan losses is comprised of two components: specific reserves assigned to certain classified loans individually evaluated for impairment, and reserves calculated based on formulas for pools of loans. Factors contributing to the determination of specific reserves include the creditworthiness of the borrower and, more specifically, changes in the expected future receipt of principal and interest payments and/or in the value of pledged collateral. A reserve is recorded when the carrying amount of the loan exceeds the discounted estimated cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. For purposes of determining formulas for pools of loans, the portfolio is segregated by product types in order to recognize differing risk profiles among categories, and then further segregated by credit grades.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, prevailing economic conditions and industry data. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

(j) Loan Origination and Commitment Fees

Loan origination and commitment fees are deferred and amortized into interest income on a basis that approximates the level yield method. Net revolving lines of credit commitment fees are recognized in income on the straight-line method over the period the revolving line is active. Any fees that are unamortized at the time a loan is paid off or a commitment is closed are recognized into income immediately.

(k) Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation of furniture, fixtures, and equipment is computed by the straight-line method over the estimated useful lives of the related assets. Furniture and fixtures are normally amortized over seven years and equipment, computer hardware and computer software are normally amortized over five years. Amortization of leasehold improvements is computed by the straight-line method over their estimated useful lives or the terms of the leases, whichever is shorter.

(l) Securities Sold Under Agreements to Repurchase

Qualifying securities sold under agreements to repurchase are treated as financings and the obligations to repurchase securities sold are reflected as liabilities in the consolidated statements of financial condition and are carried at the amounts at which the securities will be subsequently repurchased. The dollar amount of securities underlying the agreements remains in the asset accounts, although the securities underlying the agreements are delivered to the counterparties who arranged the transactions. In certain instances, the counterparties may have sold, loaned, or disposed of the securities to other parties in the normal course of their operations, and have agreed to resell to us substantially similar securities at the maturity of the agreements.

(m) Income Taxes

We will file consolidated Federal, New York State, and New York City tax returns for the year ended December 31, 2006. Additionally, SSG files other state and local returns on a separate basis.

Income tax expense consists of current and deferred income tax expense (benefit). Deferred income tax expense (benefit) is determined by recognizing deferred tax assets and liabilities for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and certain unused carry-forward deductions and credits. The realization of deferred tax assets and liabilities is assessed and a valuation allowance provided for that portion of the asset or liability for which it is more likely than not that it will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled and carry-forward deductions and credits are utilized.

(n) Stock-Based Compensation

Effective upon consummation of our Initial Public Offering ("IPO") in March 2004, we adopted the Signature Bank 2004 Long-Term Incentive Plan (the "2004 equity incentive plan") for grants to be made to participants in anticipation of, and following, the IPO.

On January 1, 2006, we began accounting for our stock-based compensation plan in accordance with the requirements of Statement of Financial Accounting Standards ("SFAS") No. 123 (Revised 2004), *"Share-Based Payment"* ("SFAS No. 123R") applying the modified prospective method. Under this method of adoption, financial statements for prior interim periods and fiscal years will not reflect any restated amounts. Accordingly, compensation expense is now recognized in our statement of operations for all stock-based compensation awards over the requisite service period with a corresponding credit to equity, specifically additional paid-in capital. The present impact of SFAS No. 123R may not be representative of the effect it will have on income in future years due to the possibility that additional option grants may be made.

Prior to our adoption of SFAS No. 123R, we accounted for our stock-based compensation plan in accordance with the requirements specified in SFAS No. 123, "*Accounting for Stock-Based Compensation*", as amended by SFAS No. 148, "*Accounting for Stock-Based Compensation—Transition and Disclosure*" which established a fair value-based method of accounting for employee stock compensation plans. Under this method, compensation cost was measured at the grant date based on the value of the award and was recognized over the service period, which was generally the vesting period. As permitted under these statements, we elected to apply the intrinsic value method in accounting for our option plan in accordance with Accounting Principles Board ("APB") Opinion No. 25, "*Accounting for Stock Issued to Employees*." Accordingly, compensation expense was not recognized in our statements of operations, other than for restricted stock awards. Restricted stock awards were recorded as unearned compensation, a component of shareholders' equity, at fair value at the date of grant, and were amortized to compensation expense over the awards' specified vesting periods. Under SFAS No. 148, issuers applying the intrinsic value method were also required to disclose the pro-forma impact on net income and earnings per share as if compensation expense had been determined using the fair value-based method as illustrated by the table below for the year ended December 31, 2005.

(in thousands, except per share amounts)	**2005**
Net income:	
As reported	15,869
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	443
Deduct: Total stock-based employee compensation expense determined under fair value-based method for all awards, net of related tax effects	(4,634)
Pro-forma	11,678
Basic earnings per share:	
As reported	0.54
Pro-forma	0.40
Diluted earnings per share:	
As reported	0.53
Pro-forma	0.39

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. The assumptions used for the grants made in 2005 and 2004 are as follows:

	November 2005 Grants	October 2005 Grants	July 2005 Grants	May 2005 Grants	March 2005 Grants	March 2004 Grants
Dividend yield	0.00%	0.00%	0.00%	0.00%	0.00%	0.00%
Expected volatility	28.40%	28.47%	28.54%	30.99%	31.13%	31.53%
Risk free interest rate	4.41%	4.38%	4.05%	4.06%	4.37%	3.56%
Expected option life	7 Years	7 Years	7 Years	7 Years	7 Years	6 Years

(o) Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted-average common shares outstanding during the year.

Diluted earnings per share is computed using the same method as basic earnings per share, but includes the potential dilutive effect of stock options outstanding and the unvested portions of restricted stock awards. The dilutive effect is calculated using the treasury stock method.

(p) Disclosures About Fair Value of Financial Instruments

Statement of Financial Accounting Standards No. 107 "*Disclosures About Fair Value of Financial Instruments*" ("SFAS No. 107") requires that we disclose estimated fair values for our financial instruments. Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. SFAS No. 107 has no effect on the financial position or results of operations in the current year or any future period. Furthermore, the fair values disclosed under SFAS No. 107 are not representative of our total value. Fair value estimates, methods and assumptions are set forth below.

The carrying amounts for cash and cash equivalents are reasonable estimates of fair value. The fair value of securities is estimated based on quoted market prices as published by various quotation services, or if quoted market prices are not available, on dealer quotes.

Federal Home Loan Bank stock is carried at cost which approximates its fair value.

Loans, net, most of which bear floating interest rates re-priced at regular intervals, had a carrying value of $1.56 billion and an estimated fair value of $1.60 billion at December 31, 2006. The estimated fair value was based on the discounted value of contractual cash flows using interest rates that approximated those offered for loans with similar maturities and collateral requirements.

Deposits are mostly non-interest-bearing or NOW and money market deposits that bear floating interest rates that are re-priced at regular intervals. Therefore, the difference between the carrying value and fair value is not material. The carrying and fair values do not include the intangible fair value of core deposit relationships, which comprise a significant portion of our deposit base. Management believes that its core deposit relationships represent a relatively stable, low-cost source of funding that has a substantial intangible value separate from the value of the deposit balances. Time deposits, 94.8% of which mature within one year, had a carrying value of $359.0 million and an estimated fair value of $357.9 million at December 31, 2006. The estimated fair value is based on the discounted value of contractual cash flows using interest rates that approximated those offered for time deposits with similar maturities and terms.

The estimated fair value of borrowings is based on the discounted value of contractual cash flows using interest rates that approximate those offered for borrowings with similar maturities and collateral requirements. The following table summarizes the carrying and estimated fair values of our borrowings:

	December 31,			
	2006		2005	
(in thousands)	**Carrying Amount**	**Estimated Fair Value**	**Carrying Amount**	**Estimated Fair Value**
Repurchase agreements	$ 467,000	465,331	195,000	193,673
Federal funds purchased	-	-	65,000	65,000
Federal Home Loan Bank advances	260,000	259,416	220,000	218,800
Other short-term borrowings	6,687	6,687	20,000	20,000
Total borrowings	$ 733,687	731,434	500,000	497,473

(q) Segment Reporting

SFAS No. 131 "*Disclosures about Segments of an Enterprise and Related information*" ("SFAS No. 131") requires public companies to report certain financial information about operating segments for which such information is available and utilized by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Specific information to be reported for individual operating segments includes a measure of segment profit and loss, certain specific revenue and expense items and segment assets. As presented in Note 20, we have identified two operating segments, the Bank and SSG.

(r) New Accounting Standards

In February 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 155, *"Accounting for Certain Hybrid Financial Instruments-an amendment of FASB Statements Nos. 133 and 140"* ("SFAS No. 155"). The Statement amends FASB Statements No. 133, "*Accounting for Derivative Instruments and Hedging Activities*" ("SFAS No. 133") and No. 140, *"Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities"* ("SFAS No. 140"). The Statement: permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; clarifies which interest-only and principal-only strips are subject to the requirements of SFAS No. 133; establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; and amends SFAS No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. The Statement is effective for all financial instruments acquired or issued after the beginning of the first fiscal year that begins after September 15, 2006. At this time, we do not anticipate the adoption of SFAS No. 155 to have any impact on our consolidated financial statements.

In March 2006, the FASB issued SFAS No. 156, *"Accounting for Servicing of Financial Assets-an amendment of FASB Statement No. 140"* ("SFAS No. 156"). The Statement amends FASB Statement No. 140 and is effective as of the beginning of the first fiscal year beginning after September 15, 2006. Under SFAS No. 156, an entity is: required to recognize a servicing asset or liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in specified situations; required to initially measure all separately recognized servicing assets and liabilities at fair value, if practicable; permitted to measure each class of servicing assets and liabilities using either the amortization method or the fair value measurement method; permitted to do

a one-time reclassification of available-for-sale securities to trading securities, at initial adoption, provided that those securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or liabilities; and required to separately present servicing assets and liabilities measured at fair value in the statement of financial condition. At this time, we do not anticipate the adoption of SFAS No. 156 to have any impact on our consolidated financial statements.

In June 2006, the FASB issued Interpretation No. 48, *"Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109"* ("FIN 48"). FIN 48 clarifies Statement 109 by establishing a criterion that an individual tax position would have to meet in order for some or all of the associated benefit to be recognized in an entity's financial statements. The Interpretation applies to all tax positions within the scope of Statement 109. In applying FIN 48, an entity is required to evaluate each individual tax position using a two step-process. First, the entity should determine whether the tax position is recognizable in its financial statements by assessing whether it is "more-likely-than-not" that the position would be sustained by the taxing authority on examination. The term "more-likely-than-not" means "a likelihood of more than 50 percent." Second, the entity should measure the amount of benefit to recognize in its financial statements by determining the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. Each tax position must be re-evaluated at the end of each reporting period to determine whether recognition/derecognition is warranted. The liability resulting from the difference between the tax return position and the amount recognized and measured under FIN 48 should be classified as current or noncurrent depending on the anticipated timing of settlement. An entity should also accrue interest and penalties on unrecognized tax benefits in a manner consistent with the tax law. FIN 48 requires significant new annual disclosures in the notes to the financial statements that include a tabular roll-forward of the beginning to ending balances of an entity's unrecognized tax benefits. The Interpretation is effective for fiscal years beginning after December 15, 2006 and the cumulative effect of applying FIN 48 should be reported as an adjustment to retained earnings at the beginning of the period in which it is adopted. We do not expect the adoption of FIN 48 to have a material impact on our consolidated financial statements.

In September 2006, the Emerging Issues Task Force ("EITF") of the FASB reached a Consensus on accounting for life insurance in Issues Nos. 06-4, *"Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements"* ("EITF Issue No. 06-4") and 06-5, *"Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance With FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance ("FTB 85-4")"* ("EITF Issue No. 06-5").

EITF Issue No. 06-4 concluded that an employer, entering into an endorsement split-dollar life insurance arrangement that provides an employee with a postretirement benefit, has not effectively settled the obligation by purchasing the life insurance. Therefore, a liability for the future benefits should be recognized in accordance with SFAS No. 106, *"Employers' Accounting for Postretirement Benefits Other Than Pensions"* or APB Opinion No. 12, *"Omnibus Opinion – 1967."* The Consensus is effective for fiscal years beginning after December 15, 2007 and would be recognized as a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. Retrospective application is also permitted. We do not expect the adoption of EITF Issue 06-4 to have a material impact on our consolidated financial statements.

EITF Issue No. 06-5 concluded that a policyholder should consider other amounts included in the contractual terms of an insurance policy, in addition to cash surrender value, when determining the amount (asset value) that could be realized under the terms of the insurance contract in accordance with FTB 85-4. These other amounts include: non-discretionary amounts (those items that are not contingent as of the balance sheet date) and time-based amounts (i.e., Deferred

Acquisition Costs ("DAC") Tax) which would be accounted for on a present value basis. Items that are "probable" to be received and/or subject to the insurance company's intent to pay would not be included in asset value. In addition, the amount that could be realized should be determined on an individual policy or certificate level. Amounts that would be realized upon surrender of all policies or certificates would not be included when measuring assets. The Consensus is effective for fiscal years beginning after December 15, 2006 and would be recognized through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption for all life insurance contracts currently held. Retrospective application is also permitted. We do not expect the adoption of EITF Issue 06-5 to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, *"Fair Value Measurements"* ("SFAS No. 157"). The Statement establishes a single definition of fair value, sets up a framework for measuring it, and requires additional disclosures about the use of fair value to measure assets and liabilities. SFAS No. 157 also emphasizes that fair value is a market-based measurement by establishing a three level "fair value hierarchy" that ranks the quality and reliability of inputs used in valuation models, i.e., the lower the level the more reliable the input. The hierarchy provides the basis for the Statement's new disclosure requirements which are dependent upon the frequency of an item's measurement (recurring versus nonrecurring). SFAS No. 157 is effective for fair-value measures already required or permitted by other standards for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Its provisions will generally be applied prospectively. The adoption of SFAS No. 157 is not expected to have a material impact on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, *"Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132(R)"* ("SFAS No. 158"). SFAS No. 158 requires a calendar year-end company with publicly traded equity securities that sponsors a postretirement benefit plan to fully recognize the overfunded or underfunded status of its benefit plan in its 2006 year-end balance sheet. For all other entities, this provision is effective for fiscal years ending after June 15, 2007. The Statement also requires a company to measure its plan assets and benefit obligations as of its year-end balance sheet date, eliminating the use of earlier measurement dates currently permissible. This provision is effective for fiscal years ending after December 15, 2008. At this time, we do not anticipate the adoption of SFAS No. 158 to have any impact on our consolidated financial statements.

In September 2006, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 108, codified as SAB Topic 1.N, *"Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements"* ("SAB 108"). SAB 108 states that registrants should use both a balance sheet and an income statement approach when quantifying and evaluating the materiality of a misstatement. It also contains guidance on correcting errors under this dual approach and provides transition guidance for correcting errors that existed in prior years. SAB 108 is effective for annual financial statements covering the first fiscal year ending after November 15, 2006. Earlier application is encouraged for any interim period of the first fiscal year ending after November 15, 2006 and filed after September 13, 2006. We do not anticipate the adoption of SAB 108 to have a material impact on our consolidated financial statements.

(3) Securities Available-for-Sale

The following tables present information related to our portfolio of securities available-for-sale at December 31, 2006 and 2005:

	December 31,							
	2006				*2005*			
(in thousands)	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Market Value	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Market Value
U.S. Treasury obligations	$ 7,930	3	(1)	7,932	7,973	-	(13)	7,960
U.S. Government agency obligations	1,594,520	2,737	(20,624)	1,576,633	1,505,668	298	(25,278)	1,480,688
Other securities	1,089,114	1,988	(21,062)	1,070,040	1,098,633	1,331	(17,813)	1,082,151
Total	$2,691,564	4,728	(41,687)	2,654,605	2,612,274	1,629	(43,104)	2,570,799

Other securities consist of collateralized mortgage obligations, collateralized mortgage backed securities, asset backed securities, corporate bonds, closed-end mutual funds and interest-only strip securities.

Gross realized gains on sales of available-for-sale securities for the years ended December 31, 2006, 2005 and 2004 were $188,000, $534,000 and $1.2 million, respectively.

Gross realized losses on sales of available-for-sale securities for the years ended December 31, 2006, 2005 and 2004 were $47,000, $260,000 and $682,000, respectively.

At December 31, 2006 and 2005, we had available-for-sale securities of $1.53 billion and $946.4 million, respectively, pledged as collateral for debtor-in-possession accounts in excess of FDIC insurance, clients' treasury tax and loan deposits, public deposits, securities sold under agreements to repurchase and advances with the Federal Home Loan Bank of New York.

Trade date security purchases of $11.7 million and $9.1 million were included in accrued expenses and other liabilities at December 31, 2006 and 2005, respectively.

The amortized cost and estimated fair value of securities available-for-sale at December 31, 2006, by contractual maturity, are presented in the table below. Expected maturities will differ from contractual maturities since borrowers may have the right to call or prepay obligations without penalties.

	December 31, 2006	
(in thousands)	Amortized Cost	Fair Market Value
Within one year or less	$ 109,050	98,651
Over one year through five years	179,568	176,804
After five years through ten years	207,257	204,198
Over ten years	2,195,689	2,174,952
Total	$ 2,691,564	2,654,605

The following table presents information regarding securities available-for-sale with temporary unrealized losses outstanding for the periods indicated.

	Less than 12 months		12 months or longer		Total	
(in thousands)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2006						
U.S. Treasury obligations	$ 1,951	(1)	-	-	1,951	(1)
U.S. Government agency obligations	293,219	(1,417)	969,403	(19,207)	1,262,622	(20,624)

U.S. Treasury obligations	$ 7,960	(13)	-	-	7,960	(13)
U.S. Government agency obligations	691,808	(8,057)	716,360	(17,221)	1,408,168	(25,278)
Other securities	498,629	(10,244)	271,281	(7,569)	769,910	(17,813)
Total	$1,198,397	(18,314)	987,641	(24,790)	2,186,038	(43,104)

We generally invest in U.S. Treasury, U.S. Government agency obligations and A rated or better investments. The fair value of these investments fluctuates based on several factors, including credit quality and general interest rate changes. The unrealized losses in our securities portfolio are primarily due to the prevailing interest rate environment. We have evaluated our portfolio and deem the unrealized losses to be temporary in nature given the credit quality of the securities and the nature of the temporary impairment being predominantly due to the current interest rate environment. As we have the ability to hold those investments to maturity, we do not expect to recognize these unrealized losses. At December 31, 2006, we had 458 securities with an unrealized loss, 85 of which were for less than 12 months and 373 of which were for more than 12 months.

(4) Securities Held-to-Maturity

The following tables present information related to our portfolio of securities held-to-maturity at December 31, 2006 and 2005:

	December 31,							
	2006				*2005*			
(in thousands)	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Market Value	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Market Value
U.S. Government agency obligations	$ 238,035	242	(3,752)	234,525	242,150	-	(4,548)	237,602
Other securities	143,693	-	(4,677)	139,016	157,351	9	(4,561)	152,799
Total	$ 381,728	242	(8,429)	373,541	399,501	9	(9,109)	390,401

Other securities consists of collateralized mortgage backed securities.

At December 31, 2006 and 2005, we had held-to-maturity securities of $269.4 million and $175.7 million, respectively, pledged as collateral for debtor-in-possession accounts in excess of FDIC insurance, clients' treasury tax and loan deposits and letter of credit transactions.

The amortized cost and estimated fair value of securities held-to-maturity at December 31, 2006, by contractual maturity, are presented in the table below. Expected maturities will differ from contractual maturities since borrowers may have the right to call or prepay obligations without penalties.

(in thousands)	Amortized Cost	Fair Market Value
Within one year or less	$ 61,250	60,866
Over one year through five years	64,861	64,053
After five years through ten years	38,873	38,086
Over ten years	216,744	210,536
Total	$ 381,728	373,541

The following table presents information regarding securities held-to-maturity with temporary unrealized losses outstanding for the periods indicated.

	Less than 12 months		12 months or longer		Total	
(in thousands)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2006						
U.S. Government agency obligations	$ 25,555	(347)	191,743	(3,405)	217,298	(3,752)
Other securities	24,895	(270)	114,122	(4,407)	139,017	(4,677)
Total	$ 50,450	(617)	305,865	(7,812)	356,315	(8,429)
December 31, 2005						
U.S. Government agency obligations	$ 63,288	(1,071)	174,314	(3,477)	237,602	(4,548)
Other securities	68,425	(1,497)	81,546	(3,064)	149,971	(4,561)
Total	$ 131,713	(2,568)	255,860	(6,541)	387,573	(9,109)

We generally invest in U.S. Treasury, U.S. Government agency obligations and A rated or better investments. The fair value of these investments fluctuates based on several factors, including credit quality and general interest rate changes. A significant portion of the unrealized losses in our held-to-maturity portfolio are greater than 12 months old and are primarily due to the prevailing interest rate environment. We have made an evaluation that we have the intent and ability to hold our investments until maturity and, therefore, realize the full carrying value of the investment. At December 31, 2006, we had 60 securities with an unrealized loss, four of which were for less than 12 months and 56 of which were for more than 12 months.

(5) Federal Home Loan Bank Stock

The carrying value of Federal Home Loan Bank stock at December 31, 2006 and 2005 was $17.0 million and $14.5 million, respectively. All investments in Federal Home Loan Bank stock are pledged as collateral for Federal Home Loan Bank advances.

(6) Loans Held for Sale

Loans held for sale at December 31, 2006 and 2005 were $126.0 million and $138.4 million, respectively. Gains on sales associated with the securitization of pooled loans and sale of mortgage loans for the years ended December 31, 2006, 2005 and 2004 amounted to $1.6 million, $2.1 million and $1.5 million, respectively.

We are an active participant in the Small Business Administration (SBA) loan and SBA pool secondary market by purchasing, securitizing, and selling the guaranteed portions of SBA 7(a) loans. Most SBA 7(a) loans have adjustable rates and float at a spread over prime and reset monthly or quarterly. The guaranteed portions of SBA loans are backed by the full faith and credit of the U.S. Government and therefore have no credit risk and carry a 0% risk weight for capital purposes.

We utilize the services of SSG to act as agent for and consultant to the Bank on the purchase, assembly, and sale of SBA loans and pools.

We warehouse loans for generally up to 180 days until there are enough loans of similar characteristics to securitize the pool. In order to meet the SBA's rate requirement, we may strip excess servicing from loans with different coupons to create a pool at a common rate. This results in the creation of two assets: a par pool, which is sold to accredited investors, and an interest-only strip, which we maintain as an available-for-sale security. The interest-only strip represents the portion of the coupon stripped from a loan.

(7) Loans, Net

The types of loans at December 31, 2006 and 2005 are summarized as follows:

	December 31,	
(in thousands)	**2006**	**2005**
Commercial and industrial	$ 1,281,857	799,186
Consumer	133,753	135,119
Mortgage loans on residential real estate	163,532	72,133
	1,579,142	1,006,438
Less:		
Net deferred fees and costs	(1,524)	(1,285)
Allowance for loan losses	(13,829)	(10,050)
Net loans	$ 1,563,789	995,103

Of the commercial and industrial loans outstanding, $14.6 million on December 31, 2006 and $11.7 million on December 31, 2005 are commercial overdrafts. Of the other consumer loans, $1.9 million on December 31, 2006 and $911,000 on December 31, 2005 are personal overdrafts.

Loans to related parties include loans to directors and their related companies and our executive officers. Such loans are made in the ordinary course of business on substantially the same terms as loans to other individuals and businesses of comparable risks. Related party loans were $105,000 and $182,000 at December 31, 2006 and 2005, respectively.

Non-accrual loans at December 31, 2006 and 2005 totaled $8.8 million. The interest income that would have been earned on non-accrual loans outstanding at December 31, 2006 and 2005 in accordance with their original terms was approximately $741,000 and $671,000 for the years then ended, respectively. Interest income realized on these loans was $38,000 and $85,000 for the years ended December 31, 2006 and 2005. In addition, there were no commitments to lend additional funds on non-accrual loans.

(8) Allowance for Loan Losses

Changes in the allowance for loan losses for the years ended December 31, 2006, 2005 and 2004 are as follows:

	December 31,		
(in thousands)	**2006**	**2005**	**2004**
Balance at beginning of year	$ 10,050	7,660	4,323
Provision for loan losses	4,145	3,310	3,355
Loans charged off	(383)	(949)	(56)
Recoveries of loans previously charged off	17	29	38
Balance at end of year	$ 13,829	10,050	7,660

We had impaired loans in the amount of $8.8 million, $8.8 million and $6.0 million with a related allowance for loan losses determined in accordance with SFAS No. 114 of $4.8 million, $4.2 million and $4.0 million at December 31, 2006, 2005 and 2004, respectively. These reserves are included in the overall allowance for loan losses. Interest income recorded on impaired loans for the year ended December 31, 2006 was $38,000 as compared to $84,000 for the year ended December 31, 2005. The amount of interest income that would have been recorded if the loans were not considered to be impaired during the years ended December 31, 2006 and 2005 was $740,000 and $666,000, respectively. Average impaired loans for the years ended December 31, 2006, 2005 and 2004 totaled $8.9 million, $6.8 million and $5.0 million, respectively.

At December 31, 2006, there was one loan for $3.7 million that was restructured as troubled debt, and there was no commitment to lend additional funds to this debtor. This loan was partially paid-off in January 2007, which resulted in a charge to earnings of $807,000. This charge-off amount had been reserved for in accordance with SFAS No. 114 at December 31, 2006. There were no troubled debt restructurings December 31, 2005 and 2004.

(9) Premises and Equipment

Premises and equipment are summarized as follows at:

(in thousands)		*December 31,* 2006	2005
Leasehold improvements	$	22,428	18,486
Furniture, fixtures and equipment		9,266	5,838
		31,694	24,324
Less accumulated depreciation and amortization		(9,473)	(6,539)
Premises and equipment, net	$	22,221	17,785

Depreciation and amortization expense amounted to $2.9 million, $2.0 million and $1.5 million for the years ended December 31, 2006, 2005 and 2004, respectively.

(10) Deposits

The types of deposits are summarized as follows at:

(in thousands)		*December 31,* 2006	2005
Demand - non-interest-bearing	$	1,586,440	1,277,207
NOW		261,788	212,526
Money market and other		2,003,913	1,670,565
Time deposits		359,018	327,435
Total deposits	$	4,211,159	3,487,733

The aggregate amount of time deposits in denominations of $100 thousand or more at December 31, 2006 and 2005 were $333.5 million and $306.0 million, respectively. The related interest expense on these types of deposits for the years ended December 31, 2006 and 2005 amounted to $12.0 million and $7.2 million, respectively.

At December 31, 2006, the scheduled maturities of time deposits are as follows:

(in thousands)		December 31, 2006
2007	$	340,517
2008		7,615
2009		8,255
2010		1,192
2011		1,439
Total time deposits	$	359,018

At December 31, 2006 and 2005, we had approximately $1.2 million and $2.2 million, respectively, in deposits from our directors.

(11) Incentive Savings Plan

We have a 401(k) program under which employees may make personal contributions of up to 25% of their pretax earnings by means of payroll deductions. We match 100% of the first 3% of compensation contributed to the plan and 50% of the next 4% of compensation contributed. Our contributions, included in employee benefits expense, were $1.2 million, $1.0 million and $833,000, respectively, for the years ended December 31, 2006, 2005 and 2004.

(12) Federal Funds Purchased and Securities Sold Under Agreements to Repurchase

The following is a summary of Federal funds purchased at or for the years ended:

(dollars in thousands)		*December 31,* 2006	2005
Year-end balance	$	-	65,000
Maximum amount outstanding at any month-end	$	184,000	148,000
Average outstanding balance	$	117,969	69,593
Weighted-average interest rate paid		4.90%	3.41%
Weighted-average interest rate at year-end		-	4.01%

The following is a summary of securities sold under agreements to repurchase at or for the years ended:

(dollars in thousands)		*December 31,* 2006	2005
Year-end balance	$	467,000	195,000
Maximum amount outstanding at any month-end	$	467,000	230,000
Average outstanding balance	$	367,658	185,997
Weighted-average interest rate paid		4.47%	3.25%
Weighted-average interest rate at year-end		4.62%	3.74%

(13) Federal Home Loan Bank Advances

The following is a summary of Federal Home Loan Bank advances at or for the years ended:

(dollars in thousands)		*December 31,* 2006	2005
Year-end balance	$	260,000	220,000
Maximum amount outstanding at any month-end	$	335,000	320,000
Average outstanding balance	$	288,454	212,175
Weighted-average interest rate paid		4.40%	3.16%
Weighted-average interest rate at year-end		4.53%	3.72%

The following is a summary of Federal Home Loan Bank advances outstanding at December 31, 2006:

(dollars in thousands)	December 31, 2006 Amount	Rate
PAYABLE DATE		
August 4, 2008	$ 25,000	4.97%
July 21, 2009	30,000	4.86%
July 28, 2009	25,000	4.85%
August 31, 2009	25,000	4.78%
September 8, 2009	25,000	4.73%
February 11, 2010	20,000	3.38%
March 1, 2010	10,000	3.72%
August 8, 2010	25,000	4.78%
January 10, 2011	25,000	4.12%
August 15, 2011	15,000	4.60%
September 7, 2011	25,000	4.57%
December 1, 2016	10,000	3.92%
Total advances	$ 260,000	4.53%

(14) Other Short-Term Borrowings

The following is a summary of Federal Reserve Treasury Tax and Loan borrowings at or for the years ended:

(dollars in thousands)	December 31, 2006	2005
Year-end balance	$ 6,687	20,000
Maximum amount outstanding at any month-end	$ 169,037	100,000
Average outstanding balance	$ 49,943	23,848
Weighted-average interest rate paid	5.11%	3.21%
Weighted-average interest rate at year-end	4.99%	4.03%

(15) Income Taxes

The Bank will file consolidated Federal, New York State, and New York City tax returns for the year ended December 31, 2006. Additionally, SSG files other state and local returns on a separate basis.

The provision for income taxes for the years ended December 31, 2006, 2005 and 2004 was an expense of $24.6 million, $16.9 million, and a benefit of $1.7 million, respectively. The provision for the year ended December 31, 2006 includes a deferred tax benefit of $2.9 million. The current year provision was calculated based on statutory tax rates. Prior year provisions were calculated based on statutory tax rates, average assets and alternative minimum taxes.

The components of income tax expense (benefit) for the years ended December 31, 2006, 2005 and 2004 are set forth in the following table:

(in thousands)		*Years ended December 31,* 2006	2005	2004
FEDERAL				
Current provision	$	18,663	12,094	531
Deferred income tax benefit		(2,111)	(440)	(3,375)
Total	$	16,552	11,654	(2,844)
STATE AND LOCAL				
Current provision	$	8,907	5,626	2,409
Deferred income tax benefit		(830)	(396)	(1,286)
Total	$	8,077	5,230	1,123
TOTAL				
Current provision	$	27,570	17,720	2,940
Deferred income tax benefit		(2,941)	(836)	(4,661)
Total	$	24,629	16,884	(1,721)

We provided a valuation allowance for the entire deferred tax asset in all periods prior to June 30, 2004. At June 30, 2004, we recognized deferred tax assets in accordance with SFAS No. 109, "Accounting for Income Taxes," after considering all available positive and negative evidence pursuant to paragraph 25 of the standard. Our management felt that a valuation allowance was no longer necessary since it was more likely than not that the deferred tax assets would be utilized. Management continues to believe that a valuation allowance is not necessary at December 31, 2006 given that we had experienced "core" profitability since recognition of the deferred tax assets. We will continue to monitor the need for a valuation allowance going forward. Net deferred tax assets are reflected in other assets in the Consolidated Statements of Financial Condition.

The components of the net deferred tax asset at December 31, 2006 and 2005 are set forth in the following table:

(in thousands)		*December 31,* 2006	2005
DEFERRED TAX ASSETS			
Loan loss provision	$	6,059	4,354
Depreciation		486	251
Unearned compensation - restricted shares		393	273
Non-accrual interest		584	354
Other		1,118	586
Total deferred tax assets recognized in earnings		8,640	5,818
Mark-to-market on available for sale securities		16,383	18,424
Total deferred tax assets		25,023	24,242
DEFERRED TAX LIABILITY			
Prepaid expenses		201	321
Total deferred tax liability recognized in earnings		201	321
Net deferred tax asset	$	24,822	23,921

The following table presents a reconciliation of statutory federal income tax expense to combined effective income tax expense (benefit) for the years ended December 31, 2006, 2005 and 2004:

	Years ended December 31,					
	2006		*2005*		*2004*	
(in thousands)	**Expense (Benefit)**	**Rate**	**Expense (Benefit)**	**Rate**	**Expense (Benefit)**	**Rate**
Statutory federal income tax expense	$ 20,296	35%	11,463	35%	9,826	35%
State and local income taxes, net of federal income tax benefit	5,251	9	3,590	11	1,581	6
Non-deductible executive compensation	-	-	2,375	7	-	-
Tax exempt income on bank-owned life insurance	(724)	(1)	(764)	(2)	-	-
Reversal of valuation allowance	-	-	-	-	(13,391)	(48)
Other items, net	(194)	(1)	220	1	263	1
Effective income tax expense (benefit)	$ 24,629	42%	16,884	52%	(1,721)	(6%)

(16) Equity Incentive Plan

We have an equity incentive plan designed to assist in attracting, retaining and motivating officers, employees, directors and/or consultants and to provide us and our subsidiaries and affiliates with a stock plan providing incentives directly related to increases in our shareholder value.

Activity related to the equity incentive plan for the years ended December 31, 2006 and 2005 is summarized as follows:

	Years ended December 31,	
	2006	**2005**
Shares available for future awards at beginning of the year	701,016	899,934
Options granted	-	(178,250)
Options forfeited	-	3,832
Restricted stock granted	(74,162)	(25,000)
Restricted stock forfeited	3,380	500
Shares available for future awards at end of the year	630,234	701,016

Stock Options

On December 20, 2005, our Compensation Committee of our Board of Directors and our Board of Directors approved the accelerated vesting and exercisability of all outstanding unvested and unexercisable stock options to purchase our common shares held by employee directors, officers, employees and consultants. As a result, options to purchase 1,039,466 common shares, which would have vested and become exercisable from time to time through November 2008, became fully vested and immediately exercisable as of December 20, 2005. The number of shares and exercise prices of the options subject to acceleration were unchanged. The accelerated options had exercise prices ranging between $15.50 and $28.97 per share, with a total weighted average exercise price per share of $17.25. The accelerated options included 866,329 options held by directors and executive officers and 173,137 held by other officers and employees. The accelerated vesting resulted in an additional $2.5 million of pro-forma net compensation expense in the fourth quarter of 2005. In addition, we recognized compensation expense in the amount of $30,000 in accordance with FASB Interpretation No. 44,

"Accounting for Certain Transactions involving Stock Compensation - an interpretation of APB Opinion No. 25" ("FIN 44") during the fourth quarter of 2005.

As of December 31, 2006, there were 1,998 nonvested options with a related unrecognized compensation cost of $14,000 that consist entirely of options granted to our independent directors in March 2005. The remaining unrecognized compensation cost will be expensed over the next 15 months. During the year ended December 31, 2006, we recognized compensation expense of $11,000 for nonvested options.

The following table summarizes information regarding the stock option portion of the equity incentive plan for the years ended December 31, 2006 and 2005:

	Years ended December 31,			
	2006		*2005*	
	Shares Underlying Options	**Weighted Average Exercise Price**	**Shares Underlying Options**	**Weighted Average Exercise Price**
Balance outstanding at beginning of year	1,455,283	$ 16.77	1,307,000	$ 15.50
Granted	-	-	178,250	25.98
Exercised	(174,283)	16.54	(26,135)	28.60
Forfeited or expired	(334)	15.50	(3,832)	22.42
Balance outstanding at end of year	1,280,666	$ 16.80	1,455,283	$ 16.77

The following is a summary of outstanding and exercisable stock options as of December 31, 2006:

	Options Outstanding		*Options Exercisable*	
Exercise Price	**At December 31, 2006**	**Weighted Average Remaining Contractual Life**	**At December 31, 2006**	**Weighted Average Exercise Price**
$15.50	1,121,999	7.22 years	1,121,999	$15.50
24.09	15,000	8.38 years	15,000	24.09
24.98	2,750	8.80 years	2,750	24.98

$15.50 to 28.97	1,280,666	7.35 years	1,278,668	$16.78

Restricted Stock

The following table summarizes information regarding the restricted stock portion of the equity incentive plan for the years ended December 31, 2006 and 2005:

	Years ended December 31,			
	2006		*2005*	
	Shares	**Weighted Average Grant Price**	**Shares**	**Weighted Average Grant Price**
Balance outstanding at beginning of year	66,754	$ 19.39	79,516	$ 15.50
Granted	74,162	33.74	25,000	26.11
Vested	(45,427)	17.41	(37,262)	15.50
Forfeited	(3,380)	30.73	(500)	26.11
Balance outstanding at end of year	92,109	$ 31.50	66,754	$ 19.39

As of December 31, 2006, there was $2.1 million of total unrecognized compensation cost related to nonvested restricted shares that is expected to be recognized over a weighted-average period of 1.95 years. During the years ended December 31, 2006 and 2005, we recognized compensation expense of $1.0 million and $743,000, respectively, for nonvested restricted shares. The total fair value of restricted shares that vested during the years ended December 31, 2006 and 2005 was $1.5 million and $973,000, respectively.

(17) Earnings Per Share

The following table shows the computation of basic and diluted earnings per common and common equivalent share for the years ended December 31, 2006 and 2005:

	Years ended December 31,	
(in thousands, except per share amounts)	**2006**	**2005**
Net income	$ 33,360	$ 15,869
Common and common equivalent shares:		
Weighted average common shares outstanding	29,480	29,349
Weighted average common equivalent shares	393	344
Weighted average common and common equivalent shares	29,873	29,693
Basic earnings per share	$ 1.13	$ 0.54
Diluted earnings per share	$ 1.12	$ 0.53

(18) Commitments and Contingent Liabilities

In the normal course of business, we have various outstanding commitments and contingent liabilities that are not reflected in the accompanying consolidated financial statements.

(a) Lease Commitments

We have entered into noncancelable operating lease agreements for premises and equipment with expiration dates through the year 2021. Our premises are used principally for financial center and private client offices and administrative operations.
Rental expense for our premises for the years ended December 31, 2006, 2005 and 2004 amounted to $7.1 million, $6.0 million and $4.4 million, respectively.

The required minimum rental payments under the terms of the noncancelable leases at December 31, 2006 (in thousands) are summarized as follows:

(in thousands)	**December 31, 2006**
2007	$ 6,492
2008	6,461
2009	6,579
2010	6,174
2011	5,416
Thereafter	22,570
Total	$ 53,692

(b) Information Technology Services Contract

On September 9, 2005, we entered into a Master Agreement for the Provision of Hardware, Software and/or Services (the "Agreement") with Fidelity Information Services, Inc. ("Fidelity"). Under the terms of the agreement, Fidelity is to provide us with hardware, software and account processing services related to our core banking applications. More particularly, Fidelity will provide us with enterprise banking services, core data processing services and managed operations services. Additionally, Fidelity will provide us with implementation and training services for the software and hardware provided under the Agreement.

The Agreement allows us to continue to use our existing core banking applications, which were previously supported by Bank Hapoalim, and will now be supported directly by Fidelity.

The term of the Agreement is 94 months from the date of the execution of the Agreement and terminates in June 2013. We are required to make monthly payments of $247,000 beginning on July 1, 2006 for a total contractual cost of $20.7 million. We have the right to terminate the Agreement upon a change of control of us, or a failure by Fidelity to meet the terms of the Agreement, subject to certain penalties.

(c) Financial Instruments with Off-Balance Sheet Risks

We enter into transactions that involve financial instruments with off-balance sheet risks in the ordinary course of business to meet the financing needs of our clients. Such financial instruments include commitments to extend credit, standby letters of credit, and unused balances under confirmed

letters of credit all of which are primarily variable rate. Such instruments involve, to varying degrees, elements of credit and interest rate risk.

Our exposure to credit loss in the event of nonperformance by the other party with regard to financial instruments is represented by the contractual notional amount of those instruments. Financial instrument transactions are subject to our normal credit policies and approvals, financial controls, and risk limiting and monitoring procedures. Unless noted otherwise, we will require collateral or other security to support financial instruments with credit risk.

A summary of our commitments and contingent liabilities is as follows:

	December 31,	
(in thousands)	**2006**	**2005**
Unused commitments to extend credit	$ 380,976	304,767
Financial standby letters of credit	128,296	76,043
Commercial and similar letters of credit	24,908	11,653
Other	822	587
Total	$ 535,002	393,050

Commitments to extend credit consist of agreements having fixed expiration or other termination clauses and may require payment of a fee. The total commitment amounts may not necessarily represent future cash requirements. We evaluate each client's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include deposits held in financial institutions, commercial properties, residential properties, accounts receivable, property, plant and equipment, and inventory.

In accordance with Financial Accounting Standards Board Interpretation (FIN) No. 45, "*Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others—an Interpretation of FASB Statements No. 5, 57 and 197 and Rescission of FASB No. 34*", we recognize a liability at the inception of the guarantee that is equivalent to the fee received from the guarantor. This liability is amortized over the life of the guarantee on a straight-line basis. At December 31, 2006 and 2005, we had deferred revenue for commitment fees paid for the issuance of standby letters of credit in the amount of $511,000 and $314,000, respectively. None of these commitments were to creditors that are considered sub-standard; therefore, a liability for off-balance sheet credit losses has not been established.

Standby letters of credit are conditional commitments issued by us to guarantee the performance of a client to a third party. They are primarily used to support clients' business trade transactions and may require payment of a fee. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to clients.

At December 31, 2006 and 2005, we had commitments to sell loans of $960,000 and $119,000, respectively.

(19) Regulatory Matters

We are subject to various regulatory capital requirements administered by local and Federal regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory—and possible additional discretionary—actions by regulators that, if undertaken, could have a direct material adverse effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

In addition, we are subject to the provisions of the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA") which imposes a number of mandatory supervisory measures. Among other matters, FDICIA established five capital categories ranging from "well capitalized" to "critically under capitalized." Such classifications are used by regulatory agencies to determine a bank's deposit insurance premium, approval of applications authorizing institutions to increase their asset size or otherwise expand business activities or acquire other institutions. Under the provisions of FDICIA, a "well capitalized" bank must maintain minimum leverage, Tier 1 and Total Capital ratios of 5%, 6% and 10%, respectively.

Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). As of December 31, 2006 and 2005, we met all capital adequacy requirements to which we were subject.

The most recent notification from the Federal Deposit Insurance Corporation categorized us as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, we must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

Our actual capital amounts and ratios are presented in the table below.

	Actual		*Required for Capital Adequacy Purposes*		*Required to be Well Capitalized*	
(dollars in thousands)	**Amount**	**Ratio**	**Amount**	**Ratio**	**Amount**	**Ratio**
As of December 31, 2006:						
Total capital (to risk-weighted assets)	$426,494	16.73%	$203,983	8.00%	$254,979	10.00%
Tier I capital (to risk-weighted assets)	412,665	16.18%	101,991	4.00%	152,987	6.00%
Tier I leverage capital (to average assets)	412,665	8.41%	196,236	4.00%	245,295	5.00%
As of December 31, 2005:						
Total capital (to risk-weighted assets)	$378,068	20.08%	$150,621	8.00%	$188,277	10.00%
Tier I capital (to risk-weighted assets)	368,018	19.55%	75,311	4.00%	112,966	6.00%
Tier I leverage capital (to average assets)	368,018	8.67%	169,702	4.00%	212,128	5.00%

A depository institution, under federal law, is prohibited from paying a dividend if such dividend would cause the depository institution to be "undercapitalized" as determined by federal bank

regulatory agencies. The relevant federal regulatory agencies and the state regulatory agency, the New York State Banking Department, also have the authority to prohibit a bank from engaging in what, in the opinion of such regulatory body, constitutes an unsafe or unsound practice in conducting its business. The payment of dividends could, depending upon our financial condition, be deemed to constitute such an unsafe or unsound practice.

(20) Segment Reporting

We operate two principal lines of business, the Bank and SSG. The Bank offers a wide variety of business and personal banking products and services. SSG offers investment, brokerage, asset management and insurance products and services.

The following tables present certain information regarding our reportable segments:

	At or for the years ended December 31,		
(in thousands)	**2006**	**2005**	**2004**
The Bank			
Interest income	$ 239,494	157,450	87,167
Interest expense	117,554	58,358	20,180
Fee and other income	17,146	13,864	18,084
Non-interest expense (1)	80,679	79,775	56,476
Income tax expense (benefit)	24,605	16,881	(1,724)
Net income	$ 33,802	16,300	30,319
Total assets	$ 5,400,331	4,385,205	3,355,069
SSG			
Interest income	$ 163	86	39
Interest expense	55	36	36
Fee and other income (2)	4,182	4,814	4,840
Fee income from the Bank	2,689	3,138	4,436
Non-interest expense	7,397	8,430	9,797
Income tax expense	24	3	3
Net loss	$ (442)	(431)	(521)
Total assets	$ 2,766	2,493	4,069

(1) For purposes of this disclosure, non-interest expense includes the provision for loan losses.
(2) Includes fee and other income from external clients.

The following table sets forth reconciliations of net interest income, fee and other income, non-interest expense, net income (loss), and total assets for reportable segments to the consolidated financial statement totals:

(in thousands)	At or for the years ended December 31, 2006	2005	2004
Net interest income:			
Bank	$ 121,940	99,092	66,987
SSG	108	50	3
Consolidated	$ 122,048	99,142	66,990
Fee and other income:			
Bank	$ 17,146	13,864	18,084
SSG	6,871	7,952	9,276
Eliminations	(2,689)	(3,138)	(4,436)
Consolidated	$ 21,328	18,678	22,924
Non-interest expense (1):			
Bank	$ 80,679	79,775	56,476
SSG	7,397	8,430	9,797
Eliminations	(2,689)	(3,138)	(4,436)
Consolidated	$ 85,387	85,067	61,837
Net income (loss):			
Bank	$ 33,802	16,300	30,319
SSG	(442)	(431)	(521)
Consolidated	$ 33,360	15,869	29,798
Total assets:			
Bank	$ 5,400,331	4,385,205	3,355,069
SSG	2,766	2,493	4,069
Eliminations	(3,672)	(2,760)	(2,590)
Consolidated	$ 5,399,425	4,384,938	3,356,548

(1) For purposes of this disclosure, non-interest expense includes the provision for loan losses.

(21) Other Comprehensive Loss

The following table presents the components of accumulated other comprehensive loss included in shareholders' equity:

(dollars in thousands)	Pre-tax Amount	Tax Effect	After-tax Amount
December 31, 2006			
Net unrealized loss on securities available-for-sale	$ (36,959)	16,383	(20,576)
Total other comprehensive loss	$ (36,959)	16,383	(20,576)
December 31, 2005			
Net unrealized loss on securities available-for-sale	$ (41,476)	18,424	(23,052)
Total other comprehensive loss	$ (41,476)	18,424	(23,052)

CERTIFICATIONS

I, Joseph J. DePaolo, the President and Chief Executive Officer of Signature Bank, certify that:

1. I have reviewed this annual report on Form 10-K of Signature Bank for the fiscal year ended December 31, 2006;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's Board of Directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Certain statements in this Annual Report that are not historical facts constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on the Bank's current expectations, speak only as of the date of this Annual Report and are susceptible to a number of risks, uncertainties and other factors. The Bank's actual results, performance and achievements may differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. For those statements, the Bank claims the protection of the safe harbor for forward-looking statements contained in the Reform Act. See "Private Securities Litigation Reform Act Safe Harbor Statement" and "Item 1A. Business—Risk Factors," appearing in the Bank's Annual Report on Form 10-K for the fiscal year ended December 31, 2006, included herein.
